Will Wage War on Heron Killers of Oregon

The Club women of Oregon have instituted a campaign against the pitiless killing of the mother Heron, in order that the beautiful plumage may be secured with which to trim millinery creations for the adornment of the fair sex.

This murder, for it can be called nothing else, is always committed directly after the young are hatched, as it is at that time when the plumage is most beautiful. Not only one life is extinguished, but the young are left to die of starvation.

Cornelius is doing things in the way of building. Contractor Drorbaugh has just finished a beautiful cottage for Thomas Talbot; John Neeps' new dwelling on Maple St. is nearing completion; J. S. Mow is erecting a modern structure in the Northeast part of town; Loren Pizer and others have carpenters at work on new buildings. The three modern residences of A. S. Sholes and others in Pleasant View addition are buildings any city might be proud of.

William Merrill had a very unpleasant experience while trying to round-up an old sow and pigs in the pasture adjoining the slaughter house a couple days ago. The sow did not take kindly to Bills' instructions and after leading him out into the pasture away from all fences she suddenly turned and started for Bill. Those who were present say Bill done some of the best sprinting they ever witnessed. The sow being the swiftest and striking Bill in the back, she laid him out. Just at this period the boys say Bill made some queer noises but I am not at liberty to go further into details. Bill was not seriously hurt but he is offering the whole litter of pigs to any one who will catch them. Says he is not afraid of comets or bears but when it comes to female hogs—let George do it.

W. H. Galvani chief engineer for the Oregon Electric is in the employ of the United Railway for a few days and is assisting Judge Hollis in the buying of the right of way in this section for that road.
