Running Water in Your Home

Wherever you live—in town, suburb or country—in a 5, 8 or 12 room house—an adequate, satisfying, lasting supply of water on any floor or in any room every day of every year is now possible.

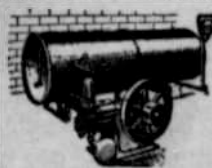

For here is a compressed air system that cannot be frozen out of service—or that no summer's gale can cripple. Will do the work of a thousand pairs for you—saves drudgery, safeguards the family health and protects the home from dangers of fire. A piping is all that is necessary.

Leader Water System

consisting of a steel Leader tank in your cellar connected with your well, cistern or spring—a gas engine, wind-mill or hand-pump, and a simple, easy-to-install system of piping is all that is necessary.

Let us show you how a Leader Water System in your home will save you money—in doctor's bills, and add to your own comfort and satisfaction at the same time.

A Leader Water System suited to the needs of your home will never get out of order or need repairs. A few minutes attention each day is all that the apparatus requires.

Wenatchee Peaches in London

There arrived in London on Tuesday a first consignment of 2,000 cases of peaches from the Wenatchee Valley, in the State of Washington. The peaches were packed in ice cars attached to the mail train, and sent to New York, whence they were shipped for England. They were delivered at Convent Garden within 13 days from the date of dispatch, which constitutes a "record" for American fruit. Several hundred cases were sold immediately on arrival. The fruit is large, well-coloured and and of the "free stone" variety. It arrived in good solid condition, and was splendidly packed. No American peaches have previously been placed on the London market, though peaches from Ontario, Canada, have been imported for some time.—London Times.
