The only way to success; what little we know and what a lot we do not know. Why our hens do not lay when eggs are 40 cents per dozen. Owing to the change of feed in the spring when they get plenty of oily insects they lay the most, so why not feed them oily feeds such as millet, rape, kale, sorgum and meat scraps, in connection with another receipt you can obtain at the commission store.

## Edison Phonographs and Records at Staehr's Bazaar

Next to Post Office, Forest Grove, Ore.

Edison Phonographs and Records are fast coming to the front. They are driving every other talking machine and record out of the market. Why? Because they have stood the test for years. A number of other talking machines have been compelled to quit business because either the machine or the records did not give satisfaction. A good feature with the Edison machine is that the records never wear out. And another good feature is that the Edison machine and records are sold at the same price the world over. Whether it is in New York, Chicago, Portland or Forest Grove, the prices are all the same. Of course a number of people are sending east for them, having been led to believe, by some fake advertisements, that they could get them cheaper by sending east, but if they investigate they find out they have paid exactly the same price that they could have bought the machine of the home dealer for, and perhaps \$5 or \$6 express charges extra. Besides this they get a machine that is not adjusted and they do not have a chance to hear the records. Every Edison Talking Machine that is sold at Staehr's Bazaar has been set up, adjusted and tried before it goes out. A full line of records are always kept in stock. The Edison Talking Machines are sold on easy monthly payments and absolutely guaranteed to give satisfaction.
