Photos for Christmas Presents

We want to assure you we are prepared to give you the very best work in the latest approved designs, and that your early order for Portraits will insure you the perfection of careful attention to detail.

Forest Grove Studio.

WHY NOT?

1st. Good, honest Dentistry to the best of my ability. Could one do more?

2nd. I examine your mouth and tell you its actual condition before I begin your actual work, stating in advance what the cost will be. If ready, we begin; if not, the examination costs you nothing.

3rd. I guarantee all that I do, as I consider work not worth guaranteeing, not worth doing. This has been my policy.

4th. Absolute cleanliness. Every instrument must be cleaned, and are used as they are taken from the sterilizers.

5th. My prices are reasonable, not advertised cheap prices to lure you in, and then charge you more—but a price that will make more friends; more patients; one price to all.

Thankfulness.

I am no friend to the people who receive the bounties of Providence without visible gratitude. When the sixpence falls into your hat you may laugh. When the messenger of an unexpected blessing takes you by the hand and lifts you up and bids you walk you may leap and run and sing for joy, even as the lame man whom St. Peter healed skipped piously and rejoiced aloud as he passed through the beautiful gate of the temple. There is no virtue in solemn indifference. Joy is as much a duty as beneficence is. Thankfulness is the other side of mercy.—Henry Van Dyke.

'She Did Not Know.

A local justice of the peace was about to perform the marriage ceremony for a colored couple who called at his office for the purpose. Previous to the performance of the "official act" the justice proceeded to ask the usual questions of the prospective groom as to his father's Christian name and his mother's maiden name, whereupon the future bride chimed in with this remark: "You all better not ask me what my father's maiden name is, 'cause I don't know!"—National Monthly.

The Mole Has Eyes.

The majority of people believe that the mole is even "blinder" than the proverbial bat, but the naturalists know that such is not the case. Sir John Lubbock and Carl Hess, the latter a noted German naturalist, by careful investigation proved that the mole has eyes which are as perfect as those of a horse or an elephant. They are very small optics, to be sure (only one millimeter in diameter), but in the matter of reflection and refraction do not differ from the normal eyes in larger animals.
