New settlers are pouring into the western country by thousands every month, seeking new homes. Welcome the stranger within our gates.

It is well to hitch your wagon to a star and make it your aim in life to reach the top, but if you climb always at the expense of the other fellow, success will be but as ashes in your mouth at the end.

We have heard of an editor who calls the citizens of his town scandal-mongers one week and follows shortly with the statement that he has no fault to find with the fine people of his community. First rub them up and then rub them down. "I would that thou wert hot or cold."

Farmers and fruit raisers from all sections of Washington county report that conditions are favorable for a yield equal to that of any season for several years past, and the increased population in the west will consume most of the surplus product, saving the raiser the necessity of shipping to the east for a market. This will give prosperity a boost and make for greater content and happiness.

The chairman of this school district has requested that suggestions be made for a name for the new High school building. We suggest that it be called the Washington High school. We have a Lincoln school, therefore it would be appropriate to name the new building after the Father of his country, who shares undying fame equally with the Great Emancipator.

A crew of men has been at work the past week grading the road between Cornelius and Hillsboro and filling in the chuck holes. It is to be hoped that this road will be rocked this summer, as there was a stretch of about a half a mile of it that was one of the worst roads in Washington county the past winter. The writer drove over it a couple of months ago with one horse and an empty light wagon, and it was all the animal could do to draw the vehicle through the deep mud. It passes understanding how a team with a heavy load could struggle over such a road. This is one of the most traveled highways in the county, and it is a disgrace to allow it to remain unrocked.

Every citizen in Forest Grove should work to bring the annual encampment of the Grand Army of the Republic of Oregon to this city next year. Forest Grove has one of the finest camping grounds in the state, and all conditions are ideal for having the old boys in blue with us next year. Should the Grand Encampment be held here, thousands of soldiers and their friends will come to Forest Grove. This will be a great advertisement for the city, and besides it will be an occasion of real pleasure and enjoyment to have the old defenders of our nation with us in large numbers.

Governor Johnson, of California, in spite of the pressure brought to bear upon him by the

Federal Government, has signed the alien land bill. The people of California understand the situation in that state better than any outsider can, and did they not consider the owning of agricultural land by the Japanese a real menace to the future of the white race in California, they would not have passed this bill. That the honor of Japan has been insulted by the passage of this bill is all tommyrot. Any nation has a right to pass such laws as it believes necessary for the welfare of its own people. The only question at issue is whether California, as a state, has passed a law which will conflict with treaties the United States now has with Japan.

DRUG NAMES

A living language is a changing one. Each day brings variations that oft times leads to confusion in the interpretation of words and phrases. Hence it is the dead Latin language is used in medicine. There is safety in its unchanging word-forms and fixed meanings. No matter how a prescription may be presented, the Latin name of each specified drug means but one substance and the prescriptionist knows.

Bring your prescription to us and it will be filled right, with the purest of drugs.

GAPES, THEIR PREVENTION AND CURE.
 "What do you do for gapes?" is a question that meets us wherever we lecture at farmers' institutes, and we always astonish our hearers with the reply, "Don't have any gapes."
 Really, reader, it's easy to prevent gapes.
 Have you noticed few brooder chicks have gapes? That's because they are kept dry. They are kept on dry litter and kept from running in rain until old enough to stand it. Then they are kept clean. They sleep in a clean nursery, eat off a clean table, and the brooder being moved often, they run and browse on clean ground. Catch the point here?
 The study of the origin of evil we leave to the preachers, and the tracking of microbes and wigglers back to their Adamite ancestor we leave to the lynx eyed experiment station baid-heads.

Your humble servant finds gapes prevalent where there is rotten ground and gapes galore where this rot is rain soaked.
 Here's the prevention. Now for the cure. You have tried the horsehair lasso or have wiggled the trimmed turpentine feather in the chicks' windpipes and have had them to flutter and die in your hand because you pushed the worms and bloody mucus down into the lungs. You put them in a box and made them breathe the slaked lime—that stinging, suffocating stuff. In all these ways you killed more than you cured. You fed them "gape cures," but they didn't hit the spot, for gapes are in the windpipe, not the digestive tract. But here is a simple sure cure for gapes: Place a hot stove lid in a bucket and cover the bucket with a cloth in the center of which is a small hole. Pour carbolic acid on the plate and make the chick or turkey pout breathe the vapor through the hole.
