## Rock Road Promised

The county court has purchased of H. G. Luck four acres about a half mile above the Meachem school for a quarry. The stone appears to be of excellent quality and will be used on the roads in the northern part of the country. It is a volcanic formation and little blasting will be necessary, as much of the rock is broken and all ready for the crusher. Judge Reasoner figures that rock from this quarry will cost the county 25 cents a yard against 90 cents a yard at the county quarry at Goodin station. On figuring up available funds it has been found that there is money enough to rock the gap in the Base Line road left after present district work is done and the work will be completed during the present season. This will mean a solid stretch of rock road between Hillsboro and Forest Grove.
