WEEKS' BREAK-UP-A-COLD TABLETS
guaranteed remedy for Colds and Grippe. Price 25c of your druggist. Good. Take nothing else.—Adv.

Solid Grub.
Mrs. Van Wombat's buffet lunch was a great hit with the men present.

Something new?
At a woman's lunch, yes. In addition to the fruit salads and macaroons she provided a few ham sandwiches. —Louisville Courier-Journal.

Chopping Him Off.
"I don't want to interfere with your business, but—" began the village judge.

All right," interrupted Cyrus K. Pepper. "Go ahead and interfere with me." —Judge.

In Far-off India.
In some unknown manner a little sample of Hanford's Balsam of Myrrh found its way into an interior village in India. It was its own agent, and that small beginning a steady development has developed and each subsequent shipment has been larger. Adv.

A Good Mate.
"Why wouldn't the girl who 'took everybody's eye' be an appropriate mate for the man who succeeded in getting the public's ear?"—Browning's Magazine.

According to Ability.
Country Judge—How long have you had a car?
Motorist (charged with speeding)—Week, your honor.
Judge—Um—then you can still afford to pay a fine. Twenty dollars!—

ARD E. BURTON— Assayer and Chemist, Lowell, Colorado. Specimen prices: Gold, Low, \$1; Gold, Silver, 50c; Gold, Silver, Zinc, 5c. Mailing envelopes and full price list on application. Control and Empire work. Reference: Carbonate National Bank.

MAIRY H.

You have such a cow, buy a package of Kow-Kure from your feed dealer or druggist and use it according to directions. You'll be surprised at the way it makes in her general health and milk. Kow-Kure is especially recommended as a preventive and cure for Abortion, Barrenness, Milk Scouring, Lost Appetite, Bunches and other ailments.
Write for free Treatise, "The Home Cow Doctor,"

Charting The Arctic Archipelago

AFTER a cruise of more than 4,000 miles through the Arctic archipelago, during which he placed on the map many new islands, bays and promontories, Capt. Joseph E. Bernier has returned to warmer climes.

During eleven years of Arctic exploration this hardy skipper has charted over 500,000 square miles of islands in the great northern archipelago and has discovered many records of Arctic expeditions, including documents left by ill-fated mariners, and pieces of wreckage, grim reminders of craft that went down in the Arctic seas, writes C. H. Dorr in the New York Sun.

Captain Bernier has left a record of his own work in various places to guide future explorers. If Vilhjalmr Stefansson, leader of the Canadian Arctic expedition, now in the polar regions, happens to reach Winter Harbor, Melville island, he will find there a substantial cache built several years ago by Captain Bernier, and well stocked with provisions, enough to last him a year or more. Captain Bernier established many of these caches or life-saving stations in the polar regions, for he knows by experience the needs of Arctic explorers.

Relics of Former Explorers.
On his last voyage Captain Bernier started from Pond's inlet, Baffin's island, with the exploring ship Guide and a crew of ten men and an equipment including forty dogs and sledges. While voyaging through Arctic seas two of his crew found parts of the hull of one of the vessels of Sir Edward

Belcher's squadron. These relics of Arctic disaster were discovered on the north end of Bylott's island, in the Arctic sea.

Captain Bernier believes that these relics were part of the Pioneer or the Intrepid of Sir Edward Belcher's squadron. Three vessels in the Belcher squadron were not accounted for, the Pioneer, the Intrepid and the Assistant. The Pioneer was abandoned in the Arctic and all on board were lost.

Another relic of the Arctic found by Captain Bernier's crew is a spear from Sir John Franklin's expedition, which drifted in on the tide in Erebus bay, North Devon island, the bay being named after the Franklin ship Erebus. It is a wooden spear with iron point and the name Erebus stamped upon it. The spear from the Franklin expedition was probably lost overboard in a storm and drifted, swept on by ice and tide, to Erebus bay. The wreck of the Erebus was found on O'Reilly island, south of Victoria strait, by Eskimos years ago.

For fifteen days Captain Bernier and members of his Arctic expedition on board the Guide were caught in the ice of Melville bay, in latitude 75. After battling with huge masses of ice drifting down from the north for two weeks the Guide managed to get free from the ice packs and make her way into the open sea.

An interesting theory of a route to the pole for a vessel is advanced by Captain Bernier, and is based upon deductions made from his discoveries of relics of marine disasters in the Arctic and study of the polar tides. He believes that, starting from a certain point in the Arctic, a ship well equipped can make the voyage from ocean to ocean and to the Pole.

Thinks Ship Can Reach Pole.
"Capt. George De Long was a pioneer in the field of Arctic exploration," said Captain Bernier the other day while in New York, "and his first ex-

pedition aroused my interest in voyages in the North Pole regions. "I followed De Long's expedition with keen interest, and I realized that he was undertaking a voyage almost certain to lead to destruction. But his experience pointed out a route leading into the northland, and other explorers have doubtless profited by his example. When Doctor Nansen proposed a trip to the Arctic he planned his voyage along the lines of Doctor Long's trip to the polar seas.

"Diatoms found on the east coast of Greenland are similar to those brought back by that great explorer Nordenskjold from regions to the westward, and comparison showed that these specimens were of the same type as the diatoms brought from Cape Wadardum, in Asia.

"The finding of these diatoms proved that a passage existed from the Pacific to the Atlantic, but did not indicate the time it took to pass through from sea to sea. Later an American harpoon was found by an English whaler in the Atlantic Arctic sea, which proved also that there was a passage by which a whale could go through.

"Then later on wreckage of the Jeannette and some part of the clothing of two members of the Jeannette's crew came ashore on the west coast of Greenland at Julianehaab. This proved to me that if the Jeannette had not been lost she would have drifted into the Atlantic ocean in about four years and a half. It also proved that there is a passage from ocean to ocean.

"When the Fram was caught in the ice she drifted into the Atlantic ocean from the Pacific, which also proved my theory of a free passage. When Admiral Melville and President Bryant of the Philadelphia Geographical society placed casks in Bering strait and set them adrift they demonstrated the time it took to pass from ocean to ocean.

"Now the last link in my theory is illustrated by the wreck of the Karluk, Stefansson's ship, which was caught in the ice off Point Barrow. It was not a good place to start, but she drifted in a short time to latitude 73 north, and would have completed her voyage to the Atlantic in about four years, because she was drifting faster than the Jeannette."

On his last voyage the captain secured numerous interesting pictures of Eskimo life in the Arctic; the midnight sun, fishing in the far North, seal hunting and norwhal hunting over the ice.

Teaches History of City.
New Orleans has adopted the New Orleans book as a textbook in the public schools. This book contains a succinct history of the city from its earliest days, a review and summary of its industries and commerce, a study of its people, their institutions, government and organization; in fact, it presents in a compact and convenient form facts which "every citizen should know and most of the city's visitors inquire about."

Worst Is Yet to Come.
A eugenist declares that women will be eight feet tall in future generations. They present a rather difficult sociological and political problem now. What will they present when they are grown up?—Cincinnati Times-Star.

Described.
"Pa, what is the difference between good taste and good judgment?"
"Well, my boy, the man who marries a pretty girl may have excellent taste but mighty poor judgment"

He had just paid a dollar and a quarter for having the differential in his 1913 car overhauled when another man drove in the garage and said:
"That's just the job I want done—go to it at the same price."
But the repair man replied:

"Sorry, but it can't be done. Why, it would take five dollars' worth of time just to get to your differential before starting to work on it.
"Your car is Not a Reo!"

Reo accessibility means low cost of maintenance. Write for full details of **Reo The Fifth. The Incomparable Car. \$875 f. o. b. Factory.**
This model has satisfied seventy thousand users—many of them among your neighbors—because it saves money by reason of its accessibility.

Scraps.
There are 297,866 Sunday schools in the world.

Cuba is seeking designs for a memorial of the battleship Maine.
New Zealand is to have its first roof garden, over a six-story department store now building.

Kings in the earliest days were merely "fathers of families" and the word is derived from the same source as "kin."
A plant has been discovered in Cuba bearing fruit like figs in which flies lay their eggs, to be hatched by the sun.

Annual production of honey and wax in the United States has gradually mounted until it now totals in value more than \$6,000,000.
Millions of bad eggs are seized every year in London, and the way they are destroyed is to tip them out of their cases and run a steam roller over them.

A revival in hemp growing is reported from Kentucky. This year's crop is estimated at 8,000,000 pounds, against 1,600,000 last year, and 6,500,000 in 1909. Wisconsin also increased its acreage.

Forty states of the union have taken some legal action toward safeguarding the sanitation of public school buildings, according to a recent bulletin issued by the federal bureau of education.

Dr. W. T. Grenfell, noted for his work among the Labrador fisherfolk, has accepted an invitation to take charge of a division of a hospital unit that has been sent to France by Harvard university.

A dynamometer mounted on an ordinary dray is used by the United States department of agriculture to register the tractive force required to draw various weights over different kinds of roadways.

For wire cuts use Hanford's Balsam. Adv.

To Safety.
A wedding company on their way to church had to cross a river in a skiff, when, as luck would have it, the bridegroom fell into the water.
Wringing her hands, the bride cried out that somebody would save her beloved.

"What for?" asked one of the company. "He's a good swimmer."
"That's just it!" cried the bride. "Don't you see that he is swimming toward the other bank?"—Philadelphia Ledger.

All For Nothing.
"Mother was rather angry with you last night."
"Why, I didn't kiss you!"
"Just so. And she waited all the evening at the keyhole for nothing."—Philadelphia Record.

PORTLAND Y. M. C. A.
will fit any ambitious young Man or Woman for high-class position in
Bookkeeping, Stenography, Salesmanship
To men this includes valuable athletic, aquatic and membership privileges, although tuition cost is less than elsewhere. Valuable courses can also be had in Grammar grade and College Preparatory Subjects. **WRITE FOR CATALOG.**

No Respect For A Lawyer.
An English journal tells of an action brought against a farmer for having called another a "rascally lawyer." An old husbandman, being a witness, was asked if he heard the defendant call the plaintiff a lawyer.

"I did," was the reply.
"Pray," said the judge, "what is your opinion of the import of the word?"
"There can be no doubt of that," replied the fellow.

"Why, my good man," said the judge, "there is no dishonor in the name, is there?"
"I know nothing about that," answered he, "but this I know—if a man called me a lawyer I'd knock him down."

"Why, sir," said the judge, pointing to one of the counsel, "that gentleman is a lawyer and I, too, am a lawyer."
"No, no," replied the fellow; "no, my lord. You are a judge, I know, but I'm sure you are no lawyer."—New York Sun.

For the big and little burns in cooking and baking, keep Hanford's Balsam of Myrrh near for quick relief. Adv.

This Didn't Really Happen.
"I won't wear my new dresses at Atlantic City after all."
"And after all the money you spent?"
"Yes; but you see they're packed so nicely that I hate to take them out of the trunk."—Philadelphia Public Ledger.

Have Healthy, Strong, Beautiful Eyes
Oculists and Physicians used Murine Eye Remedy many years before it was offered as a Domestic Eye Medicine. Murine is Skill Comounded by Our Physicians and guaranteed by them as a Reliable Relief for Eyes that Need Care. Try it in your Eyes and in Baby's Eyes—No Smarting—Just Eye Comfort. Buy Murine of your Druggist—accept no Substitute, and if interested write for Book of the Eye Free. **MURINE EYE REMEDY CO., CHICAGO**

No Wonder.
The sentimental bride at a fashionable seaside resort watched the sun set in rapturous silence.
Then she murmured:
"See, George, darling, how phosphorescent!"
"It's no wonder," responded the matter-of-fact bridegroom, "when you think how many matches are made in this place."—Chicago Herald.

For lame back use Hanford's Balsam, applied thoroughly and well rubbed in. Adv.

SPONH'S COLT DISTEMPER
You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how colts or horses at any age are "exposed." All good druggists and turf goods houses and manufacturers sell SPOHN'S at 50 cents and \$1 a bottle; \$5 and \$10 a dozen. **SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind., U. S. A.**
