IF

If you were busy being kind,
Before you knew it you would find
You'd soon forget to think 'twas true
That someone was unkind to you.
If you were busy being glad
And cheering people who are sad,
Altho your heart might ache a bit,
You'd soon forget to notice it.
If you were busy being good
And doing the very best you could,
You'd not have time to blame the man
Who's doing just the best he can.
If you were busy being true
To what you know you ought to do,
You'd be so busy you'd forget
The blunders of the folks you've met.
If you were busy being right,
You'd find yourself too busy, quite,
To criticize your neighbor long
Because he's busy doing wrong.
—Southern Churchman.

A Strange Rock Dweller.

One of the strangest creatures known
to science is the pholas, or boring
clam. When still very minute the
animal bores into the sandstone ledges at
extreme low water, by means of its
sharp shell, which is replaced by se-
cretions as it is worn away. It pen-
etrates the rock to a depth of six or
eight inches and hollows out its bur-
rows as it increases in size. Shaped
roughly like a top, it could not leave
its rock dwelling even if it wished to
do so. For food it depends on the ani-
malcules that float in sea water, which
it seizes by its long siphon, or tongue.
The pholas is in great demand at the
seaside resorts along the Pacific coast,
for its meat is very tender and makes
excellent soup. The clams are dis-
lodged in great numbers from the
ledges by the use of dynamite, al-
though it is possible to obtain them
with a pick or crowbar.—Exchange.

Mexico City is Aged.

Mexico City is traditionally nearly
600 years old. It was founded when
the Aztecs settled on an island near
Lake Tezcoco. Cortez practically de-
stroyed the city in 1521. From this
time on there was hardly a break in
the ordinary events until 1692, when
there was a revolt against Spanish
rule. Later it was the scene of many
revolutions and much bloody fighting
until the iron rule of Porfirio Diaz
made revolutions for thirty years some-
what unprofitable ventures. In the
war between the United States and
Mexico the principal movement of the
American troops was directed against
Mexico City. After capturing the hill
of Chapultepec by assault General
Scott occupied the city Sept. 14, 1847.

The Word Tramway.

Tramway is the term applied in
Great Britain to all kinds of street
railroads, whether using horses, en-
gines, a cable or electricity. The word
tram originally meant a log or stump.
The evolution of the word into modern
English use is given as: End—fragment
—stump—log—pole—bar—beam—rail. In
the earliest forms of railroads the
tracks consisted of trams of wood or
flat stones, at a later period of wooden
stringers covered with strap iron and
lastly of iron rails.

On a visit to his grandmother Harry
examined her handsome furniture with
interest and then asked, "Grandma,
where is the miserable table that papa
says you always keep?"

The reputation that is built on cleve-
ness is temporary; that built on char-
acter is permanent.
