

Carranza is Tired of American Troops

New London, Conn., Sept. 27.—The fat has been thrown into the fire, so far as the American and Mexican commissioners are concerned, by developments which took place here today.

The Mexican commissioners precipitated a situation which bodes ill for success unless President Wilson should back down.

Acting under instructions from General Carranza, they demanded that General Pershing's troops be withdrawn. The American commissioners flatly refuse to do anything of the kind.

It is certain that General Pershing will not be withdrawn, so far as the American commissioners are concerned, until security for life and property along the border has been arranged.

Jap Question Not Settled

Washington, Sept. 27.—Japan's purpose to renew at the end of the European war, her contention for the right of her people to emigrate to and own land in the United States, suggested in New York yesterday by Baron Yoshio Sakatani, former finance minister in the Tokyo Cabinet, was frankly admitted today at the Japanese Embassy.

Negotiations over these questions, which came to a deadlock two years ago; are not regarded by Japan as concluded, it was explained, but merely postponed while the larger issues of the war are being dealt with.

Strike Not Yet Serious

New York, Sep. 27.—Although labor leaders insisted tonight that the general strike of trades unionists in the greater city in aid of the carmen, who quit their places September 6, eventually will involve at least 500,000 workers, there were no surface indications of a tie-up of the city's industries, as threatened after announcement today that the strike had begun.

While union leaders said that 125,000 workers in various trades already had joined the movement, with twice as many more ready to "walk out" tomorrow, the police said they had received no reports to substantiate such estimates. The actual situation, it was said, was confused because of Jewish holidays, which are being celebrated here by more than 100,000 union workers.

Baking a Watch.

Only the best made chronometer would ever survive the tests made at the Royal observatory, Greenwich. Usually there are about 200 watches under examination for use in the royal navy. On certain occasions there is a complete trial of chronometers open to all makers who have sufficient confidence in their watches being able to withstand the severity of the tests. During the competition the watches are exposed to every possible variation of temperature. They are baked in furnaces sufficiently hot to cook a joint. In fact, so great is the heat that a badly made watch has been known to tumble to pieces during the baking test. The moment a watch is taken out of the oven it is plunged into mixtures registering 40 degrees of frost. To such perfection has the manufacture of some chronometers attained that even the most stringent tests fail to cause the slightest variation.—London Telegraph.

Bored Audience.

"Mr. Jaggs never opened his mouth while his wife was entertaining her guests the other night."
"Oh, yes, he did several times."
"I didn't hear him. What did he say?"
"Nothing. He yawned."—Baltimore American.

The Clove Tree.

The limbs of the clove tree being very brittle, a peculiar four sided ladder is used in stripping the tree. As fast as the buds are collected they are spread in the sun until they assume a brownish color, when they are put into the storehouse ready for market.
