### "CASCARETS" IF BILIOUS OR COSTIVE GENTLE ITALIAN BEES

Stinging Black and Hybrid Breeds Have Been Discarded.

Expert of Oklahoma Experiment Sta tion Advises Beginners to Get Modern Fixtures to Keep the Honey Gatherers In.

(By C. F. SANBORN, Oklahoma Experi-

A great many people fear the sting tonight will give your constipated of bees, but it is just as the Western country was years ago, where there were large herds of cattle. Very little butter was made because the cows were so wild and kicked so much that only one or two per family were milked. Now, however, with the improved breeds, nearly every farmer the sale of these products.

The same applies to bees. The stinging black and hybrid bees have given place to gentle Italians. I often handle my bees throughout a year without being stung.

In the first place, don't fool with black bees any more than you would attempt to milk Texas cows. Get pure Italians. In the second place, don't monkey with boxes or gums to keep them in, but get modern fixtures.

Don't imagine that you can get rich at the business just because you take off, say, 200 or 300 pounds of honey some years.

If you can buy from a neighbor more cheaply than from a dealer, do so; but bear in mind that when you sell a cow, you don't always sell your best one, but more likely one with a pecultarity that you don't like. Likewise with bees, for which reason it is often better to buy from a dealer. He will be inclined to sell you something good because he has a reputation to sustain.

The colonies of Italian bees in a complete one-and-one-half-story hive will cost about \$20. Two empty hives (ready to put new swarms in), supplied with full sheets of foundation in the brood chamber, and starters in the upper stories or supers, will cost \$9.60.
