

The Dollar in Hiding is a Deserter!

The Dollar circulating for useless or extravagant purposes is a "slacker."

Every Dollar dragged from concealment or diverted from light or frivolous service into legitimate banking channels is a SOLDIER that will multiply its power many times in carrying on the business of the United States.

In what way may we serve and co-operate with you?

We have a supply of the Treasury Notes which, when exchanged for the bonds to be issued July 1st, will enable us to supply in amounts to suit purchasers and at no cost for conversion, or other expense.

Why Gas Is Preferable

Fifty thousand, or 90 per cent, of the homes in Portland cook with gas.

There is no mystery regarding this overwhelming popularity of gas. The reasons are ample and plain—

GAS is the ideal home fuel.

GAS is the most economical, convenient and reliable fuel.

GAS reduces the cost and amount of Kitchen labor.

GAS insures perfect sanitation.

GAS eliminates all baking failures.

GAS is the only fuel that gives you the absolute assurance of dependable service.

GAS is the LOGICAL and MOST ECONOMICAL fuel for heating water; no other fuel offers you the same time- and labor-saving qualities. No other fuel affords the same general, all-around cleanliness and convenience.

The Portland Gas & Coke Company, which supplies 90 per cent of the homes in Portland, Oregon City, Milwaukie, Gladstone and Gresham, maintains a service which is equalled by few gas companies in the United States and excelled by none. In the quality of its product and reliability of service, it has established a local standard of its own. Our rate of 95 cents NET per 1,000 cubic feet makes a difference in price, in favor of gas, for cooking purposes, as compared with other fuels.

Special gas rate, 50 cents, net, per thousand cubic feet for house-heating purposes.

Our Minimum charge is only 50 cents per Month.

Oil Stove Safety

The Florence is the clean, safe, simple, reliable, economical oil stove—ready to give as much cooking heat as you wish, when you wish it.

You can keep one—or four—burners at an intensely hot flame, or merely simmering. To change the heat you turn a simple, little (patented) lever device. Burners close up under the cooking; no heat wasted.

There are no wicks to trim nor valves to leak. A glass "bull's eye" shows you always how much oil is in the tank. Upper reservoir holds a full gallon.
