WE told you we were going to give you the greatest sale ever advertised at Forest Grove. Now you know we made good! Ever since we opened this mighty Unloading Sale our store has been packed and jammed with eager buyers, every one expressing appreciation of the wonderful Bargains offered during these war times, when prices are going higher and higher every day. Hundreds of customers were turned away opening day, as it was not humanely possible for our large force of salespeople to wait on everyone. Never in the history of Forest Grove have there been such crowds as attended our sale on opening day. If you are one of those who could not get waited upon, we urge you, by all means, to visit this sale now, as we will have many more surprises for you each and every day and want you to know it is to be a real sale all the time and that the good things were not just for the first day only.

PEOPLE ARE BUYING AS NEVER BEFORE

No wonder people are buying as they never did before. If there ever was a time when one needed to economize on the price of Dry Goods, Shoes, Groceries, etc., that time is NOW! Footwear has doubled in price within just a few months and is still going higher. Groceries and other necessities of life have advanced higher and higher and no telling what you will have to pay later on. We bought our stock before the big advance in prices and we are giving you the advantage right now of buying merchandise in many instances for less than any merchant can buy the same goods at wholesale today.

This Sale Continues All Next Week!

Have You Ever THOUGHT

The money you could easily save, together with that you are holding idle, would buy your clothes if you were to deposit it with us at interest, and you would still have the money you had saved. Why not earn a little and let that earn some thing too? Why do all the earning yourself?

A strong, conservative bank, willing to serve you.

Oil Stove Safety

The Florence is the clean, safe, simple, reliable, economical oil stove—ready to give as much cooking heat as you wish, when you wish it.

You can keep one—or four—burners at an intensely hot flame, or merely simmering. To change the heat you turn a simple, little (patented) lever device. Burners close up under the cooking; no heat wasted.

There are no wicks to trim nor valves to leak. A glass "bull's eye" shows you always how much oil is in the tank. Upper reservoir holds a full gallon.
