Good Roads in Colorado.
Judging from the report of the state highway commission of Colorado, the people of that state believe in the doctrine of good roads, says the Town Development Magazine. The report shows that Colorado has more money invested in roads than in all public institutions combined, including the state capitol. In round figures there are 6,000 miles of state highways and 25,000 miles of county roads, making a total of 31,000 miles of public highways in the state. This is a type of preparedness which may well be recommended to the people of the nation at large. It is preparedness both for the piping times of peace and the dark days of war, and it is all the more impressive in view of the fact that the outside public frequently thinks of Colorado as a state of towering peaks and well nigh impassable mountain ranges.
