The City Fathers Want Sidewalks

With Councilman Todd the only absentee, the city council met Tuesday evening and transacted a little important business.

Bills amounting to \$1,891.00 were allowed and ordered paid, although there was less than \$700 on hand to meet the obligations. The deficit will be taken care of by the local banks.

Street Commissioner Watkins presented a list nearly a mile long of places where new sidewalks were needed and the recorder was instructed to publish a notice of the establishing of sidewalk grades. After this is done the city will put down cement walks in the paved district where they are needed, unless the property owners elect to do the work themselves. If the city does the work, the cost will be a lien against the property.

Street Commissioner was instructed to post official notices in condemnation of many bad board walks in the unpaved districts and if the walks are not rebuilt or repaired within five days after notice, the city will do the work.

The street committee reported the street to the hospital being graveled at public expense.

The hospital management asked free light and water service and council compromised by giving electric current at 7c per kilowat.

Although the city had advertised in a local paper for bids for laying macadam on Seventh street, between First avenue and the Baseline road, and for wood for the power plant, no bids were received, and the proper committees were instructed to do some more advertising.

Recorder Dyke, who had been instructed to look into the date of the expiration of the Telephone company franchise, reported that the Independent franchise expires a year from next February and the Pacific States franchise, now owned by the Independent company, expires in 1926. He also reported that the company is charging more for service than the prices fixed by the franchise. He was instructed to look further into the matter and report later.
