Dilley Man Invents Gas Engine

C. W. Comstock of Dilley has recently secured a patent on a new type of rotary valve for gasoline engines. The engines equipped with this device are almost noiseless and free from vibration. The device also eliminates 40 to 50 parts of the ordinary four-cylinder engine and gas engine experts claim the new device will be especially adaptable to engines to be used on autos, motorcycles and airplanes. Uncle Sam will be given the first chance to purchase the Comstock device, according to the inventor.

The Thrift campaign in the schools is well under way. School children are investing freely in War Savings certificates and Thrift Stamps. There is no better place to put small savings.

While we are saving and conserving let us not neglect to "give." It will be a great mistake if we do not plan to let the children have a part in the great relief program which America is called upon to shoulder up. We are calling upon the schools to contribute to the Armenian Relief Fund an amount equal to 2c apiece for the number enrolled in the school. No pupil is asked to contribute more than 5c. This seems like a very modest contribution, but our idea is to respond to every legitimate call rather than give so much to one that we do not feel able to give to others.

MUST CHANGE THE LABEL

By Eugene Blake
Infernal Palace, Hades.

My Dear Wilhelm—Before we started this war, any article would sell faster in almost any country if "Made in Germany" was stamped on it. Confidence in the product and good will for Germany put the sale across dead easy. But now, my dear Kaiser, look what you've done. You have:

- * Plans for world conquest—"Made in Germany."
- Scrapped Belgian treaties—"Made in Germany."
- Poison gases—"Made in Germany."
- Plans for Armenian holy wars—"Made in Germany."
- Lusitania murders—"Made in Germany."
- Broken pledges—"Made in Germany."
- Hymns of hate—"Made in Germany."
- Zeppelin baby-brainings—"Made in Germany."
- Barbarities against prisoners—"Made in Germany."
- Betrayals of Neutrals—"Made in Germany."
- Sink-without-a-trace notes—"Made in Germany."

It's good work all right, Wilhelm, but if you don't watch out you never can use "Made in Germany" after the war. You gotta think about that, you know. An article marked "Made in Hades" would sell better.

I'm afraid we've overdone this thing. What do you think?

Faithfully your friend and ally,
BEELZEBUB,
Prince of Devils and Kaiser of Hades.

Home Economic Work Vital in War Measures

Corvallis, Ore., Jan. 29.—Will-ing and effective service by women trained to solve the intricate problems concerned with food and the home, are counted on by Herbert Hoover, from the women trained in college home economics. In a letter just received by Dean Ava B. Milan, of O. A. C., he says:

"Graduates of these departments will find themselves called to places of usefulness far surpassing in number and responsibility anything heretofore thought possible. Interests that demand the rarest talent and the highest scientific training await their attention. Thousands of young women are being trained to grapple with the problems concerned with food and the home through the excellent work done by the departments of home economics in the colleges and universities."

Because of the great and pressing need for these trained women, Mr. Hoover requested Miss

Milan to give wide publicity to this notice of government recognition.
