

## WAR BREAD COSTLY TO BRITISH GOVERNMENT

Every year the British government pays \$200,000,000 toward the cost of that nation's war bread. That is the principal reason why English bread prices are lower today to the consumer than in America. Incidentally the British bread is much poorer than the American.

Great Britain has taken over all home grown grain, bought at an arbitrary price, and all imported wheat bought in markets of the world at prevailing prices. This is turned over to the mills by the government at a price that allows the adulterated war bread loaf of four pounds to sell at 18 cents. The two pound loaf costs 9 cents, and the one pound loaf sells for 5 cents.

In milling, however, 14 per cent more flour is extracted from the wheat than in America. And there is a compulsory adulteration of 20 per cent, and an allowable adulteration of 50 per cent.

Compared with American bread, the British product is only about 65 per cent pure at its best.

In France, under conditions somewhat similar, but with a larger extraction, the four pound loaf sells for 16 cents.

## HASTENED RUSSIAN COLLAPSE

"We must not overlook the fact that Russia collapsed, not because of the Germans on her borders, but because she failed to organize and feed her own citizenship," the food administration announced.

"We must be warned that if we are to emerge victorious from this war we cannot risk the collapse of another of our associates in this war from this cause.

"Anybody that is looking for the collapse of the German people on the food question had better turn around and look at the moon, because the results will be the same. Germany is in no more danger of collapsing on that score than we are, if as much."

## WHY WE MUST SAVE FOOD.

The 1917 wheat crop in France was less than half normal, using the crop of 1913 as a basis of comparison. There was a shortage of 178,000,000 bushels, or 53.3 per cent. The potato crop was only within one-third of normal. The sugar beet crop showed a deficit of 67.9 per cent. Her meat herds in the early fall showed a shortage of 1,800,000 animals.

Those are a few of the reasons America must feed her associates in the war. They are no longer able to feed themselves, and unless we come to the rescue are face to face with starvation. And starvation means defeat in the war.
