Don't Use Any Other Than Cuticura Soap To Clear Your Skin

With the Fingers! Says Corns Lift Out Without Any Pain

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezezone, which the moment a few drops are applied to any corn or callous the soreness is relieved and soon the entire corn or callous, root and all, lifts off with the fingers.

Freezone dries the moment it is applied, and simply shrivels the corn or callous without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callous. If your druggist hasn't any freezezone he can get it at any wholesale drug house for you—Adv.

Now His Move.
"Wife, I'm afraid I can't afford new clothes for you this spring."
"Well, then, Dick, we must move. I don't mind wearing my old clothes in a new neighborhood, but I won't stay here and wear them."—Boston Transcript.

GRANDMA USED SAGE TEA TO DARKEN HAIR

She mixed Sulphur with it to Restore Color, Gloss, Youthfulness.

Common garden sage brewed into a heavy tea with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a 50-cent bottle of Wyeth's Sage and Sulphur Compound at any drug store all ready for use. This is the old time recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and, after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.

This preparation is a delightful toilet requisite and is not intended for the cure, mitigation or prevention of disease.—Adv.

The Judge and the Expert.

Mayor Hylan of New York has no belief in efficiency experts and has banished them from the city hall.

An efficiency expert undertook to teach Judge Hylan, as he then was, a lesson some years ago.

"I observe, judge," the man said, "that you've given notice to your office boy, Jimmy. That's a great mistake."

"But he's the most worthless little—"

"Judge," the expert interrupted, with a superior smile, "I'm going to give you an efficiency lesson. Take Jimmy back, for he sings at his work, and there's no surer sign of efficiency."

"Humph, that's no sign," said the Judge. "A mosquito does that."

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

A One-Man Job.

Ferdinand De Footlites was billed for a one-night stand at Mallow-on-the-Marsh. So he sent a telegram to the proprietor of the local theater:

"Will hold a rehearsal tomorrow night. Have stage manager, stage carpenter, property man, assistant electrician and all other stage hands there without fail."

Within a few hours he got a reply from the proprietor, who wired back: "He will be there."—Tit-Bits.

Hard Worked.

"There goes the hardest worked man in town."
"Nonsense! He's rich and independent."

"Yes, but he has three daughters who work him for the support of their husbands."—Exchange.

Weary.

Actress (to her fiance)—Please don't ask me to kiss you for a week or so, darling. You must remember I took over £200 yesterday selling kisses for the Red Cross.—Passing Show.

A Saving Theory.

"Billings isn't very generous with all his money, is he?"

"No; he holds that wealth is a burden, and that it is not fair to put one's burdens on other people's shoulders."—Baltimore American.

Divided Authority.

"Who really is boss in your home?" inquired the abrupt person.

"Well," replied Meekton, "of course Henrietta assumes command of the pug dog and the canary. But I can say pretty much what I like to the goldfish."—Exchange.

THE REFLECTIONS OF A MARRIED WOMAN—are not pleasant if she is delicate, run-down or overworked. She feels "played out."

Her smile and her good spirits have taken flight. It worries her husband as well as herself. This is the time to build up her strength and cure those weaknesses or ailments which are the seat of her trouble. Dr. Pierce's Favorite Prescription regulates and promotes all the proper functions of womanhood, enriches the blood, dispels aches and pains, melancholy and nervousness, brings refreshing sleep; and restores health and strength. It cures those disorders and derangements incident to womanhood.

A well-known agent which can be procured at all drug stores is "Pleasant Pellets," made up of the May-apple, the dried juice of the leaves of aloes and the root of jalap. First put out by Dr. Pierce nearly fifty years ago.—Adv.

POULTRY

SUITABLE HOUSE FOR FOWLS

Hens Should Be Comfortable, With Floor Space of 3 or 4 Square Feet for Each Bird.

(Prepared by the United States Department of Agriculture.)

The poultry flock should be comfortably but not expensively housed. A house which provides a floor space of 3 or 4 square feet per bird is ample for the purpose, and fowls are often successfully kept with an allowance no greater than 2½ to 3 square feet. Houses must be dry and free from draft, but must allow ventilation. Often there is an unused shed or small building on the place which can easily be converted into a chicken house. The front of the poultry house should be faced toward the south, if possible, so that the sun will shine into it. Perfectly satisfactory houses can be made cheaply from piano boxes or other packing cases. Two piano boxes with the backs removed can be nailed together and a door cut in the end. These boxes should be covered with a roofing paper in order to keep the house dry and to make it wind-proof. A portion of the door should be left open or covered with a piece of muslin, so as to allow ventilation. Similar houses can be constructed of packing cases at a relatively small cost. A small amount of 2 by 4 or 2 by 3 lumber can be purchased for framing. The box boards can be applied for siding or sheathing and then covered with roofing paper. Where there is a board fence it is sometimes possible to take advantage of this by building the poultry house in the corner of the fence, and making the fence itself, with the cracks covered by strips or battens, serve as the back and one side of the house.

A cheap house 8 by 8 feet square can be made by 2 by 4-inch pieces and 12-inch boards. The 2 by 4 pieces are used for sills, plates, corner posts, and three rafters. No studding is required except that necessary to frame the

Good Type of Poultry House.

door and window space. The boards are run up and down and add sufficient stiffness to the house. They are used also for the roof and covered with roofing paper. The back and sides of the house also can be covered with roofing paper, or the cracks can be covered with wooden battens or strips 1½ to 3 inches wide. In the front of the house there should be left a window or opening which can be closed, when desired, by a muslin screen or curtain which serves as a protection against bad weather but allows ventilation. In the side a door should be provided which will allow entrance. A shed or single-slope roof is best because easiest to build. A height of 6 feet in front and 4 feet in the rear is ample. If desired, the house may be built higher, so that it is more convenient to work in; the increase in cost will be slight. The ventilator in the rear is not needed in the northern part of the country, but is desirable in the South, where summers are very warm.

Such a house would be ample for a flock of 20 to 25 hens. It can be built quickly and easily and is cheap in construction.

INSURE CHICKENS AND EGGS

Farmer Who Hatches Early in Spring Seems to Have Beat of Argument—Lay in Winter.

An essential part of the endeavor to insure more chickens and eggs is contained in the maxim—hatch early. The farmer who hatches early in the spring, either by incubation or natural methods, seems to have all the best of the argument. When chickens are hatched early in the spring they mature in the fall and lay eggs in the winter. Then, in the spring, they are ready to hatch early. Late-hatched fowls are late in maturing, do not lay in the winter, and do not sit until late in the following spring.

There Is No Monopoly

in the packing industry.

Swift & Company, although the largest packer, handles not to exceed one-eighth of the total meat production of the United States.

The five large packers do not handle to exceed one-third of the total meat production of the United States.

Swift & Company is not in combination with any other packer or packers to control prices.

There is very active competition in the buying of live-stock and equally keen competition in the sale of dressed meats and by-products.

1918 year book of interesting and instructive facts sent on request.
