OFFICIAL PAPER OF THE CITY

FRIDAY, JUNE 29.

There is a great gathering of republicans at Denver, Colorado, this week. Between 5,000 and 4,000 delegates are in attendance at the national league of republican clubs.

Nat Hump is, again on the witness stand fighting in the smugling cases that were tried last winter, but continued till now because the former jury could not agree on a verdict.

The coal strike is about ended, and the tariff bill will soon be a law, and that other shadow the democratic party will be retired at the congressional elections in November, after which trade may be expected to become active.

The prosperity and happiness of Astoria according to the daily organ of that town, depends upon the health of one man, that of Judge Brown of Salt Lake. The flood in the Columbia cut off communication with the outside world.

If books are the repository of knowledge, honesty and patriotism, let us not look that way for a ballot qualification, for see how the teacher in Portland have been debauched by the book trust—those who would not bear the yoke have been turned down.

Only one democrat is elected to the lower house of the Oregon legislature. The top-heavy democratic majority in congress is discouraging, but isn't the party cutting it rather close in this case—St. Louis Globe-Democrat. We have taken another shaving off and that lone democrat is not there.

Another congressional scandal is developing. This time it is the British tin plate combine that is said to have furnished the money. Let the virtuous democracy that had so many fault finding words for republicans, examine its own house for broken window panes.

The champion of the world in chess has been held for twenty-eight years by W. Steinitz, a German, till a few weeks ago, when Emanuel Lasker beat him in a series of nineteen games. Lasker won ten of the nineteen, Steinitz five and four were drawn. Lasker is now acknowledged to be champion.

The police of Lyons, France, but did their duty when they prevented the furious mob from wreaking vengeance upon President Carnot's assassin, and we admire their courage and discipline, yet at the same time, there lies deep in the being of every law-abiding citizen a half expressed wish that the outraged Frenchmen had got hold of him.

Casimir-Perier has been elected president of France for a full term of 7 years. He reached 451 votes of the 853 cast. He is a Frenchman from civil life, though his name is that borne by the ancient kings of Poland. The new president will have to deal with some domestic turbulence, since the socialists are quite numerous, and favor a revolution.

Indeed, they demanded the suppression of the presidency in the hall when the vote for that office was taken.

Railroad travel is interrupted by the boycott of the Pullman car service, employees of the railroad refusing to handle trains containing any Pullman cars. The Southern Pacific Company gives notice to the Pullman Company that the contract between the two companies will be cancelled unless the Pullman will accept its service. The S. P. Company claims to own the cars on its system which the other company operates under contract.

It seems to the INDEPENDENT that had precedents are establishing in the bringing of criminal examinations from remote portions of the county to be made at the county seat. This week two such cases occurred. Witnesses are brought here at great expense for mileage, which the county has to pay. Justice could be done quite as well in the justice of the peace district where the crime is committed as to bring them here, and much cheaper. It may be necessary to fix the venue in criminal cases in the justice of the peace district where the branch of the peace is committed.

The O. R. and N. Co's railroad has passed into the hands of a receiver, who is E. McNeill. Suit was commenced this week for the foreclosure of two mortgages given some years ago to secure the payment of \$17,525,000, which mortgages became due on June 1st, 1894, because default was made in the payment of interest December 1st, 1893. The suit is in Judge Bellinger's court, and the complaint asks for judgment and an order of court to sell the road which consists of 1064 miles of track and boats that cover 952 miles of water transportation. This proceeding will probably bring to an end the O. R. & N. lease held by the Central Pacific. Portland people see an advantage for that city. O. R. & N. stock was always gilt-edged before the lease was executed, and was always quoted at a premium in New York.

CALIFORNIA POLITICS.

The full text of the California republican platform has not come to hand yet, hence all its provisions have not been studied. From the telegraph report it would seem that the politicians of the state dominated the convention rather than the people, and that they have tried to give expression to the wishes of the voters without knowing just what their views are.

Unless California republicans are very different from Oregonians, free silver will not be entirely satisfactory to the republican voter. But the Oregon populist must not strain his voice in shouting for California republicans balance free silver with a strong protection resolution. In no other way can unlimited coinage, of the white metal be controlled. We can use the product of the American mines, and with a stiff duty on silver bullion there may be safety for the currency.

The idea of using a part of the revenue of the government, collected from imports to reduce the cost of carrying agricultural products from American sea boards to the end that the price of these products should be advanced is an idea which resembles paternalism which we in Oregon have not considered with much favor.

The party in the gold state seems to have committed itself to woman suffrage, and after all there are worse things. Women, as a class, are not more intelligent, or honest, or politically pure or patriotic than men, but if it is true that there are monstrous frauds committed in elections, it has never been said that a majority of the electors have been guilty of those irregularities, wherefore in doubling the voting population the percentage of legal votes, which is admitted now to be a majority of those cast, will still be a majority when the women vote, and to keep it, the ratio of purchased votes will require an expenditure of money beyond the contribution even of a sugar trust, or a Welch tin-plate syndicate. It is safe to inject into politics a voting population when so great a per cent. is honest, as would be the case when our mothers, our wives and our sisters go to the voting booth with us. It will probably be a burden to the women, but, if it is imposed, they must bear it. There must be no stay-at-homes on election day.

The immigration plank in the California platform is only the expression of an idea that has been growing in the American mind for the past five years. It has been applied to Chinamen for a longer time, but it is just as suitable for the ignorant Europeans. We are hardly yet prepared to exclude skilled mechanics, for of them our natives learn. The republicans will carry California by a large majority, though we of Oregon will hardly have as much respect for the result as we would had the platform been somewhat different.

President Carnot, of France, was assassinated in Lyons last Sunday. The president was visiting the city on the occasion of an international exhibition holding there. He was at the head of a procession of carriages slowly driving through one of the principal streets of the city, bowing and returning the salutes of an admiring constituency, when the dastard crowded forward and raised a thrust a triangular blade fast seven inches into the body of the president. Before he could strike another blow the officer riding with the president threw him from the carriage into the hands of the dazed spectators. The police soon took charge of the murderer. The president was driven to the prefecture where surgeons gave his wound attention. From the first it was seen to be mortal. Carnot died during the night. The assassin is one of those Bedouin anarchists, whose hand is against every man and every man's hand against him. He is said to be a native of that part of Switzerland bordering on Italy, where the Italian language is spoken. He is a baker by trade. It is thought that a conspiracy had been formed to murder Carnot in revenge for the execution a short time ago of two anarchist bomb throwers, and that this fellow is the tool appointed to execute the decree of the conspirators.

President Carnot's term of office would have expired in December next, and since French politics are in a feverish condition it is particularly unfortunate that he was killed at this time. The French constitution provides no effect to take the place of the president, but his successor must be elected to the legislature in three days after the vacancy occurs.

Carnot was an executive much respected by all classes, and in many ways resembled our Garfield. He had great influence with each of the many factions existing among French politicians and more than once by his personal strength carried France over a political crisis. His place will not easily be filled.

Adj. Gen. Tarsney of Colorado, was kidnapped by parties unknown last Saturday, who carried him off a few miles and tarred and feathered him. His life was threatened, but the tormentors finally let him off with the new suit. It is said the perpetrators of the outrage are of the sheriff's posse, though all law-abiding citizens of whatever party denounce the outrage.

The Denver meeting of republican clubs adopted free silver and woman suffrage resolutions. The air of that city must be peculiar.

SHERIFF'S SALE.

Delinquent Tax List for 1893.
