sorvices are paid for by the year, month, week or day, from president of a railway system to indearrier and those who draw pendons from the government. Bistory teaches that wages have never participated in boom prices created by debanching the momey of a country. They have remained about the same whether paid it good or bad money. The wage carner is a traitor to himself and his family when he lets his prejudice lead him to the inflation camp and agrees to take his fixed pay in a depreciated money. If this is to incorrent should succeed, he would find that he had lest all the vantage ground for which he and his brethren had struck and struggled for a immerie years. The modicine of prosperity in manefacturing interests in Mexico is based on the degradation of their fabor, we do not want presperity at such a price, and we is based on the degradation of their labor. We do not want prespectify at such a price, and we are getting it randity without swindling our labor. When the inhorre prespects, he becomes a consumer and his prosperity racts upon and benefits all other interests. In Mexico they have many refined and wealthy beedle, but their laborer is a pron. In every allyer or does a handled constry in the world the same degradation of labor is apparent.

We are teld that alwer is the year man's money. This are it has prejudice and to wheally unifuse. were not in fact legal femilers prior to 1873, because the people did not tender them in payment of dishts nor in purchase of goods. They had not been in orrelation since Andrew Jackson was president, and hardly any middle aged man had ever sent one of them. The people had demonstrated them by melting them down or by sending them abroad for that purpose, and to this good day they have never been demonstrated in any other way.

The act of 1873 simply recognized what the people had done and for five years entitued the policy that the people had been pursuing for nearly haif a contary. The legal tender faculty of this dellar was restored to 1813 years and. The goor intitle thing never lives but that has been evolved from a mountain of demunication. The evil that it do not do lives after it in the shape of grasping mine owners, two pay editors and unseruption point politicians.

Thriving on Assassination.

We are told that the standard dollar is not primary money. It is not a promise to pay, it is a legal tender for all debta, and it does not have to be received at anything on the face of the carth. If any man can give a better definition of primary money the new new to be received the debt in this, would like to see it.

cannot pay, but for the rich as well, who pay, but want to beat their creditors. If the unlimited coinage of silver by our government could bring it to par, the immediate offect would be to start every mine and mill in the world ramaing at its utmost capacity, a large portion of the unemployed capital of the world would seek this field, and the bowels of the mountains of the earth would be torn asonder to get the benefit of the double price. In 1894 \$1,000,000 of silver was mined and sold at about 63 cents per cunce. If the price was raised to 129 cents per cunce, the lot of price, what would the harvest he? The old rule of three will solve the problem. If a railyary engine will run 00 miles an hour on 63 pounds of steam pressure, how fast would it run on 129 pounds of pressure? The blasted thing would have to stop once in awhite, and wait for its shadow to catch up. Semator Stewart and his crowd tell us there can be no flood of silver. In Noah's time there was a man of sanguine temperament like that. He was standing on the tip end of a high mountain and the waters were licking his toes. He hair-form the continued in a would the water would of a high mountain and the waters were licking his toes. The lifth proposition is that lift to I coinage
will increase the prices of property. If this
government should essen its mints to coinage
of the world's silver at lift to I, we would go at
once to silver monometalizm. This is the
roles of all history emphasized by the present
etatus of every free coinage country on the
earth. We can no more have himetallism in
setual use and unlimited silver coinage than
we can have a square, round object, or dry,
wet weather. Wherein would the people be
benefited if they get double prices in half valne money? If farmers' products brought
double prices so would the manufacturers'. The
benefits and advantages would be equal, except that impers would always deduct enough
to safely cover the fluctuations of silver, and
this amount would be a dead loss to producers
and a promium to speculators. I knew a boy
who sold, cur dog for 1806, but he took pay
in pupe at 130 appears, so he was not materially benefited by the inflated prices.

The inflationists admit that their scheme is

The other method suggested to bring about parity of the metals is to reduce the qualt in a gold dollar. Car government has intherromanifested brind, intreasoning projudice against that kind of statesmantsing, indeed it has lead its depoty marshale busy for 100 years hunting misquided patroids who were trying to take this near cut to weath.
