QUESTIONS ANSWERED.

To the Editor—Last evening Mr. Ed. Schulmerich stated, while I was speaking at the court house, that the official records show an excess of imports over exports greater in '95 than under the McKinley law. Not having the figures at hand, I was obliged to pass the question, but on examining the Statistical Abstract of the United States, I find that our exports were in 1892 \$1,030,278,148 and in 1895 they were \$67,538,165. The excess of exports over imports, or balance of trade in our favor was, in 1892, \$292,873,687, in 1893, \$75,568,200. In other words, under the McKinley law not only was the volume of business one-fifth larger but the profits on the business were nearly three times as great.

Mr. Garrison stated that our exports of wheat were greater last year than under the McKinley law. I find from the same source that reduced to bushels, our exports of wheat were, in 1892, 225,965,812, in 1895, 144,812,716, balance in favor of McKinley, 80,853,094. Under McKinley we sold more wheat and at better price than under Wilson.

As the bullion value of silver and the quotation of Mexican dollars fell, prices of goods in Mexican money advanced in the stores of Nogales, until now the Mexican dollars buys but half as much as it once did. But the wages of Mexican workmen remained stationary. Consequently their living was reduced by half. But prices in American money remained as before, and those paid in that coin fare as well as ever. Free and independent coinage of silver would affect workmen all over the United States in the same way. The republican party pledges itself to a policy of international bimetalism. This is the only policy which can rehabilitate silver without robbing the workman. It is the only policy which American workmen should support.

The Bryan supporters have been industriously telling what James G. Blaine did not say, but here is a paragraph that he did publish: "If we coin a silver dollar of full legal tender below the current value of the gold dollar, we are simply opening our doors and inviting England to take our gold. With our gold flowing out from us we shall be forced to single silver standard, and our relations with the leading commercial countries of the world would be not only embarrassed, but crippled. What gain should we make, therefore, for the circulating medium if on opening the gate for silver to flow in we open a still wider gate for gold to flow out?"

P. M. Arthur chief of Locomotive Engineers, E. P. Sargent of Locomotive Firemen and F. W. Arnold secretary of Locomotive Firemen, who have been quoted as free silver advocates have published a statement to the workmen of the United States that the document circulating as a Bryan campaign document is a forgery, and that their signatures are those attached to a petition to congress asking for redress of other grievances. The petition was signed three years ago, and the proclamation as now paraded by the Bryan people in no wise reflects the sentiments of the gentlemen pretended to be quoted.

Value of the Government Stamp. ("I took five twenty-dollar gold pieces to my bank to-day," said the St. Paul man. "I wanted to get a \$100 bill for them. The cashier took them and put them on the scales. Then he said, 'Seventy-five cents more, please.' 'What! I asked, 'Is paper money at a premium?' 'No,' he replied, 'paper money is not at a premium, but some of these coins are worn, and they are light.' " "Well, you know," concluded the St. Paul man, "I came away from that bank wondering how it was if the government stamp on \$99.25 worth of gold couldn't make it worth \$100, the government stamp on 50 cents worth of silver with no gold behind it could make it worth a dollar. I'm going to ask Bryan about that next time I see him."

Mortgages are bad, but not the worst thing that can befall a community. If an individual mortgages his realty with judgment, using the money obtained by the hypothecation for improvements, there can be no objection to the transaction. He usually is able to pay out; but even if he does not and a foreclosure results the community loses nothing, even a gain may result, since a more enterprising citizen takes hold of the property. But far worse is that policy that cuts the wealth of a community in two and destroys one-half. And that is what the adoption of independent free coinage of silver at 16 to 1 would do. The Bryan supporters boldly assert that their policy will give a cheap dollar, therefore they want the policy so they can pay debts. Well, now we have, according to Waldron's Handbook of Currency and Wealth, in silver and paper in circulation, \$1,075,475,342. Adopt the cheap dollar and this accumulated wealth would shrink in a day to \$537,737,671. What a fearful mortgage foreclosure this would be! Not individuals would suffer, but the whole community. Talk about gold contraction! It is but a dot beside the proposed contraction of Bryan. Mortgages are not the worst things.

GREAT TORCHLIGHT PROCESSION

M. L. Pipes, Sound Money Democrat, Will be the Speaker.

On Monday evening the supporters of the republican ticket will close the campaign. A torchlight procession will march through the principal streets of Hillsboro and converge at the auditory of the court house, where the eloquent M. L. Pipes will address the electors of Washington county.

Judge Pipes is a sound money democrat, but he, like thousands of others, are entirely and unreservedly supporting McKinley. We have heard sound money republicans and free silver republicans, democrats and flat money populists, but this opportunity is the only and last one we will have for giving attention to the reasoning of a sound money democrat. Everybody attend.

Thos. E. Watson, populist candidate for vice president, has withdrawn his name from the official ballot in Kansas for the reason that the electors named as Bryan and Watson electors are all democrats, who, if elected, will vote for Sewall, and that he does not want to be a party to such betrayal of the true populists of the state.

The rowdism of Yale has more than been matched by the boarism of Kentucky. Secretary of the U. S. Treasury J. G. Carlisle spoke in Covington, Ky., on Thursday evening, when the Bryan supporters not only booed but egged him. Carlisle had to be guarded from the speaking hall to his lodgings by a police squad.

The Democratic Campaign Book of 1896, page 144, has this paragraph: "Munnah says, after reviewing the census of 1890, 'it would be impossible to find a parallel to the progress of the United States in the last ten years. Every day that the sun rises upon the American people it sees an addition of \$2,500,000 to the accumulation of the wealth of the republic, which is equal to one-third of the good thing—gold—of the United States outside of the United States.'" Now, if this was the condition during the decade between 1889 and 1899, when the republican party controlled the administration, would it not be a fair thing to find a parallel to the same policy now that the lines are out of joint.
