Uncle Sam prefers to buy what silver he needs in the world's markets and at the prices which are paid for it by other nations. He is held up on his way to market by the silver mine and silver bullion owner, who insists that Uncle Sam shall agree to buy and sell silver at twice its actual value. He tells Uncle Sam that in 1873 he committed a great crime against silver and for that reason is responsible for the fall in price from \$1.29 to 62 cents per ounce. He flatters Uncle Sam by telling him that he is great enough and wealthy enough to double the price of silver the world over if he will begin to coin it in unlimited quantities and to treat it in every way as if it were worth its old price. Will Uncle Sam be taken in by this bunko steerer?

DO PRICES DEPEND UPON AMOUNT OR UPON KIND OF MONEY!

Facts Which Will Help to Dispel the Conducting the "National Financial School"-Why Are Prices High and Pe Capita Money Low In Silver Standard Countries? - Should Deposits In Banks Be Included In Estimating Amount of

which the free silver delusion is founded is the assumption by all silverites and cheap money advocates that prices are regulated by the amount of money in circulation and that there is any beo essary relation between prices and amount of money. When driven from one position, the bimetallists take refnge in another just as insecure and illogical, but perhaps a little more hidden by sophistry. The more enlighten ed among them do not now assert that and Diarrhora Remedy, which gave to double the amount of money's to that the rapidity of circulation and the to sign the bill in order to "stop agit use of credits affects the efficiency of tion."
