Downing and her assistant, Miss. Ethel Norman the school is doing excellent service. The char- acter and thoroughness of the work done, entitles the school to rank among the very best in the county. Mr. Efftor: The other day we had one of them teecher instituots in the skale hous, so leavin the boys at home dig- in taters, I put on a pair of overhalls which had been rescally washed and combed out my whiskers a little and thot I'd see what they done there. When I got there and looked in I seed more good lookin-teechers than bad ever been my privilege before st any one time, some from Multnoma, some from Beverton and some from your town Mr. Editor and others. They was already discussin the best to	Farm Implements. 78095 50640 Money	There they are heated by the incluing and become glowing, red-hot bodies, in many cases being actually burned up by the heat. At first that it might seem impos- sible that so rare a substaace as the air could generate by friction suffi- cient heat to produce this result. But it must be remembered that the me- teors move at a velocity almost incre- diable—in many cases as high as 1000 miles per minute. The effect upon the meter of its tranendous rush into the earth's atmosphere is much like that of being immersed in a flame having a tempature of many thou- sand degrees. It sometimes occurs that a meteor is so large and moving directly toward the earth that it reaches the surface, and, striking the earth with tremen- dous force buries itself in the soli where it is subsequently found; but in the vast majority of cases the tiny meteor is wholly consumed and appears as a spart in the higher regions of air. There are certain times of the year when meteors are much more sumer- ous than usual, and instead of ap- pearing here and there in the sky at irrigular intervals, are seen in great showers of thousands in number. Several well defined dates are recog- nized when these showers are promin- ent—the most notable tring in the math of November from the 12th 'to toth. It may be well to remember that shooting stars are more frequent in the morning than the evening hours of night, and if one will scan the clear sky in the early morning of Nov. 12 or 13, of any year he will not fail to see an unusual number of meteors. The explanation of these showers is simply that the meteors and the shout the sun in great belts and	Mrs. Emerson's baby a child about a year old pulled a tea pot full of hot ten, off the table and spilled the con- tents over itself. The childs arms, chest and legs are badly scalded, and at one time most prious results were feared, but at hast advices the little patient was resting easily and compes- tion, which is to the feared when broad surfaces are burnafi, had not alarmingly developed. Dr. T. A. Bailey dressed the burn. Mr. Emer- son lives in a house bryond Cauton's such and door factory and is a now comer. A farmer in South Tupletin plant- ed late in May last 14 acres to field corn. It grew welt till the Agenst rain after which it grew too well and was in no hurry about rippining. About 5 acres was cut and put into the silo then the Eilling foot of the stalks were ruined but not the ears if taken in time. The farmer took them, prime rossting ears and put them in his silo with the 60 toms of stalks and corn from the first five area housed. There are forty tons of cast. The frost bitten stalks will the rolled fiat on the ground and plowed and in fine condition for next year's crop. The farmer is not discouraged bat next year will plants a field of 17 acres to c.rn.
