WANTED.—Capable, reliable person to every county to represent large company of solid financial reputation; \$300 salary per year, payable weekly; \$2 per day also; sure and all expenses; straight, honest, 4-fifth salary, no commission; salary paid each Saturday and expense money advanced each week. STANLEY H. HOUSE, 304 DEARBORN ST., CHICAGO.

SUMMER RESORTS.
"To the mountains our people in increasing numbers yearly look for those days of relaxation and recreation necessary to maintain the human machine in fair working condition. The languorous sloth of the seashore proves very seductive while it lasts, but many have decided that the annual outing should provide not only radiant change of air and surroundings, but also such stimulation of flagging energies as will provide brain and vigor for the return to labor. For this they urge the mountain climb and ramble, the balmy air of the mountain pine, and the clear, unadulterated mountain air."
"In this direction the Shasta Route now affords a wealth of attractions. The entire line of road from Ashland to Redding is studded with charming and accessible hotels and camps, where are cheer and comfort and healing at reasonable cost, and where you can hunt, fish, ride, loaf, or play with equal facility."
"Or if you look for healing waters, none better can be found, hot or cold, than the springs of Ashland, Coalinga, Anderson, Bartlett, Byron and Paso Robles."
"Before visiting Europe, the people of the Northwest should see the glories of Yosemite Valley, and the wondrous groves of Mariposa and Calaveras; the Parisians are likely to make inquiries concerning these attractive resorts."
Send to Mr. C. H. Markham, General Passenger Agent, Portland, for new booklets on Castle Crags, Shasta Springs, McCloud River, Yosemite, and excursion rates thereto.

AN INDUSTRIAL CITY

ELABORATE PLANS PROPOSED FOR INDIANAPOLIS.

Purpose is to build a city where workmen may have pleasant homes near their employment. Model factories to be erected.

The proposed industrial city for Indianapolis is on a much broader plan than is generally understood, and things other than dollars are considered in projecting it. The plan is one of industrial improvement, applying to both employees and employers. The Journal of that city. The purpose is to build a city where laboring men will find it pleasant and profitable to live and at the same time be close to their employment. In considering the proposed enterprise the directors have given labor the same consideration as capital, realizing that upon a harmonious adjustment between employer and employee rests the success of the venture. So pronounced is this sentiment that the directors have made provision relating to manufacturers and sites that will prevent any friction.

A committee will be appointed to investigate each applicant for a site, the committee to consist of one representative of the board of trade, one of the Commercial club and two of the board of directors of the industrial city. This committee will ascertain the attitude of the company to its employees, the conditions imposed upon its workmen, the compensation and consideration they receive, its position regarding organized labor, the financial responsibility of the concern, the character of work and product manufactured as well as the personality of officers of the company and the employees and the future stability and permanency of the enterprise. Having passed upon these points, the committee will recommend or disapprove a site being granted to the applicant by the board of directors.

Taking these precautions to select the most desirable class of manufacturers, the board believes the success of the industrial city will in a great measure have been accomplished. From 4 to 12 acres are to be granted free for factory sites, besides bonuses ranging as high as \$5,000. All this being gratis, the directors feel that they cannot be too careful in choosing who their tenants shall be in order to attain the ideal purpose of the plan. So far as the actual construction of the factories is concerned the board will claim no directorship other than an understanding that they will be well ventilated and lighted, roomy, substantial and safe buildings and not cramped into close quarters. The class of manufacturers they desire are those who are interested in industrial betterment and are willing to adopt modern plans of factory extension, such as dining rooms, bath, factory laundry and other equipment found to be profitable in institutions where such arrangements have been made. These features are not compulsory, but it is the desire to interest men disposed to recognize the hygienic conditions necessary for the health and comfort of their employees.

In planning the residence part of the suburb as much care has been taken as in the business and industrial districts. Three main streets diverge from what is to be the central and business part of the city. These streets are to be beautified with grass plots in the center. The other streets run at right angles. Allowing for the maximum growth of the city provision is made for three school buildings, and in connection with each is a large public recreation ground. This feature has especially

commended itself to the architects and promoters, since it has been so highly approved in the large eastern cities. There are also a number of small reserves in the residence district that may be utilized for similar or other needed purposes. In addition to the provisions made for common schools and a high school, the board of directors also has in mind the establishment of a technical school for training in scientific and skilled trades.

The paramount feature of the whole plan is the provision for homes for laborers. As such it is not more attention has been paid to this phase of the suburb than any other. It is the intention to make the homes in the industrial city the most desirable, convenient and comfortable. The proposed plan is to furnish these homes with light, heat and water from the central power plant at a nominal cost.

The board of directors named in the prospectus are well known gentlemen of the highest business standing, and not a single one of them would lend his name to a doubtful enterprise. The plan will contain 23 factory sites, all lying along the north side of the grounds. South of the factory district will be the residence and business part of the city.

"What inducement will your company offer to factories to locate on your grounds?" one of the directors was asked.
"A reputable, well capitalized and substantial manufacturing company we will offer free factory sites, the best of shipping facilities and cheap heat, light and power, with a cash bonus where it is deemed advisable. This will bring the factories to us with a rush. Some old established companies that have outgrown their present locations or are unfavorably situated are already making inquiries, and new enterprises are being organized are also looking in this direction."

John L. Griffiths, who is one of the most active of the citizens pushing the matter, states that they have received already numerous letters of inquiry from large manufacturers in different parts of the country, some of them employing as many as 500 men each, asking for sites in the proposed suburb.

The Lobster's Birth Name.
"Did you ever see the name a lobster is born with?" asked a fishmonger. "It is marked on his person. No? Well, I'll show you one."
The fish vendor took a lobster out of a heap on the marble slab.
"It's name is Joe," he said after he had inspected one of its legs. "Now, can you find it?"
The customer took the lobster gingerly by the back of the neck, where it could not reach his hand with its pincers.
Turning it on its back, so that the short brown legs at its side flopped backward, a yellow streak half an inch long and as wide as an inch wide was seen on the inside of the thigh.
In this yellow streak, like a mosquito, were short lines, as though some one had printed on it with indelible brown ink in back hand the characters "Joe."
"Some lobsters are named Jim," the fishmonger said, "some Jack, others John, and I once clearly made out the name Julia."—London Telegraph.

Advertising Maxims.
We want the very tip toppest dressed man in town to see these neckwear sales.
Not cheaply made, but of materials and workmanship equal to the expensive kind.
Reasonable profits, reliable goods, right treatment, are three R's of this house.
Good—or they wouldn't be here at all, low priced—or we wouldn't be telling about them.

What most people want is something mild and gentle, when in need of a physic. Chamberlain's Stomach and Liver Tablets fill the bill to a dot. They are easy to take and pleasant in effect. For sale by the Delta Drug Store.

"My baby was terribly sick with the diarrhoea," says J. H. Doak, of Williams, Oregon. "We were unable to cure him with the doctor's assistance, and as a last resort we tried Chamberlain's Colic, Cholera and Diarrhoea Remedy. I am happy to say it gave immediate relief and a complete cure." For sale by Delta Drug Store.

A Minister's Good Work.
"I had a severe attack of bilious colic, got a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy took two doses and was entirely cured," says Rev. A. A. Power, of Emporia, Kan. "My neighbor across the street was sick for over a week, had two or three bottles of medicine from the doctor. He used them for three or four days without relief, then called in another doctor who treated him for some days and gave him no relief, so discharged him. I went over to see him the next morning. He said his bowel were in a terrible state, that they had been running off so long that it was almost bloody flux. I asked him if he had tried Chamberlain's Colic, Cholera and Diarrhoea Remedy and he said, 'No.' I went home and brought him my bottle and gave him one dose; told him to take another dose in fifteen or twenty minutes if he did not find relief, but he took no more and was entirely cured." For sale by Delta Drug Store.

THE TRUST INTERNATIONALIZED.
The queer economists who imagine that the way to crush trusts is to smash the tariff have still another illumination shed upon their bewildered intellects by the announcement of the organization of a great salt company, a tremendous trust that controls the salt product of the world.

For several years there has been a salt trust, the National Salt Company, in America. A year ago it organized the Spanish-American Salt Company, which controls almost the whole evaporated output of the Mediterranean. Then it gathered in the Canadian Salt Company in Canada, and now, after months of negotiation, it has formed a "combine" with the Salt Union of England.

"The Salt Union of England" we hear those credulous people say who depend for their economic knowledge upon the funny men of our free trade newspapers. "A salt trust in England? Why, there cannot be a trust under free trade. It is only the odious tariff that makes trusts possible!" But the hard, cold facts is that there has been a salt trust, or monopoly in Great Britain for many years. Its existence has been as well known there as the existence of the

House of Parliament. It has been a hard and fast combination that raised prices or reduced prices at its will, helping itself to generous profits from the pockets of the helpless consumer.

Now that the British salt trust, the American salt trust, the Canadian salt trust and the Mediterranean salt trust have gone into a close partnership, there is an end of competition as it is generally understood. The International Salt Company will have an annual output of between five and six millions tons, and will monopolize the markets of all Christendom except Russia.

How is tariff legislation going to reach a huge "combine" like this? Suppose the tariff duties were repealed! The salt trust could close its American mines or wells and bring all of our salt from Europe, but it could make American producers pay every cent as much as they paid when their salt was of domestic production. For the great trust monopolizes the chief sources of salt supply all over the world. It can defy congressmen and parliaments, and sell its product anywhere, and at any figure that it may desire.

What has been done in the salt trade can be done in other trades. Already several important industries have been internationalized. More will be if the tariff smashers give the signal. If Free-Trade could cure trusts there would be no trusts in England. But, as a matter of fact, there are probably stiffer and more successful trade combinations there than here. It will be a sorry day when all industries and business are internationalized. Tariff smashing is impotent to prevent this; it may hasten it. But this salt trust is an other convincing reason why no tariff smashing is likely to be tried.—Boston Journal.

There is no small truth in the remark that a home grown, hand spanked, bare-footed, hard-fisted country boy makes a much better fighter in the battles of life than does the pampered, high-collared youth of our town and villages whose clothes have been dusted with a whisk broom instead of a shingle. It doesn't seem to make much difference what regiment or company he is fighting in either. If he enlists with the agriculturists he is at home with them; if he goes into business he applies the discipline of his early training and successfully meets all comers; and should he be called into professional pursuits, he equips himself with the necessary study and wins the battle there. There is something about such a start that makes him equal to his ambitions and his opportunities.

ONLY \$5.00 TO KANSAS CITY.
For Tourist Berth.

If you are going to any point east you can purchase your ticket over the Burlington Route by telling the Ticket Agent at your own Railroad Station that you want to go over his line and the Burlington either by way of Salt Lake City, Denver, Billings, Mont., St. Paul or Omaha. The rates via the Burlington are the lowest, service the very best to be had, time the quickest and if you want a Berth in the Tourist car it will cost you only \$5.00 to Kansas City, Omaha, or St. Paul. Reclining Chair Cars on all Burlington Route trains, seats free.

Write for rates and full particulars before making other arrangements. We sell you over the Southern, Northern, Great Northern, Canadian Oregon Short Line, Union Pacific and Rio Grand—Scenic Line of the World. Address R. W. Foster, Ticket Agent Burlington Route, Corner Third and Stark Streets, Portland, Ore.

Are you going east? Write to R. W. Foster, Ticket Agent, The Burlington Route, Portland, Ore., for the lowest rates, quickest time and best service. Choice of routes.

Would you like to get the very lowest rate and quickest time to that point in the east where you expect to go sometime in the future. Write to R. W. Foster, Agent Burlington Route, Corner 3rd and Stark Streets, Portland, Ore., and receive a letter by return mail giving just the information desired and a free book describing our Chair Car Service.

A new steel plant, to employ 1,500 men, is to be built at New Castle Pa., with a capitalization of \$2,500,000 to compete with the United States Steel Corporation. This goes to help prove that the so-called "trusts" under protection engender competition, which benefits consumers and workers alike.

NEWS OF THE STATE.

The Florence salmon cannery will start up next week.

Mert Boddy, of Eugene, must serve 30 days in the county jail for the larceny of a bicycle bell.

A telephone line from Baker City to Corvallis is projected and will be built as soon as wire can be delivered.

During the past few days many prospective Oregon Agricultural College students have been canvassing Corvallis for rooms during the coming school year.

Reports from Willamette University, Salem, are to the effect that the attendance of pupils will be larger than ever before. The law department is especially prosperous.

The following schools in Polk county are without teachers, and in each case a good one is wanted; Concord, Lincoln, Bridgeport and the primary department at Falls City.

A gasoline launch at St. Helens on the Columbia caught fire when a match was struck to light a lantern. Vapor was leaking from the tank. The boat was saved by sinking it in the river.

Work on the new gravity water system at Cottage Grove is progressing rapidly. The ditch for laying the new pipe line is fast nearing completion. The pipe is on the road from the east.

From several sources come reports that Bartlett pears will be scarce this fall, says the Aurora Borealis. In many orchards the trees did not bear at all, while in others the trees seem to be drying up.

Hoppeking in the Independence section will commence a little later than it did last year. The crop will be good and it is believed that 50 cents per box of nine bushels will be the price paid for picking.

Workmen at Whitney a small place near Baker City in Baker Co., struck a quartz vein where they were excavating for the foundation of hay scales. The quartz is free milling and is said to assay \$500 to the ton. The residents are much excited because of the find.

To judge from the "scurrying" of people about town, one is inclined to believe that commodious dwellings are rather hard to rent in Corvallis at present says the Times. That paper thinks this is a good indication that things about Corvallis are going to liven up a bit.

It is expected that the Southern Oregon district of the state will ship 275 carloads of apples during the present crop year, and the fruit will all be first class. The unusual demand for Oregon apples is created by the partial failure of the crop in the Middle States and by the long season of drought in Missouri.

The Willamina Flouring Mills, warehouse and stable in Yamhill Co., above McMinnville were destroyed by fire at 2 o'clock on Monday morning last. The blaze is supposed to have been due to a stroke of lightning. The mills had not been running for two days. The loss is estimated at \$6000 with \$2500 insurance. The county bridge, a covered structure near the mill, was also burned and cannot be replaced for less than \$1500.

Harvest hands are in demand as Moro. There is not an idle man in the town. Wheat will be ground into flour in Moro within the next four months. W. E. Getz has finished all financial arrangements, and is now considering whether he will run his mill by electricity or put in a steam engine. Taking into consideration the lighting of the town by electricity and the possibility of transmitting the power to other towns for various purposes it is probable that Mr. Getz will decide to take advantage of the splendid water power of the Deschutes.

Dexter Field, a farmer living two miles east of Salem sowed three bushels of wheat last January on one and five eighths acres of ground, from which he harvested the crop the last day of July, threshing it August 20, and obtaining a yield of 80 bushels, or 50 bushels to the acre. The ground had been well manured and had not grown wheat for some years, but it is an ordinary, undrained field, and it is thought the general wheat yield of this valley could be brought to about that amount by proper cultivation and attention to change of crops, manuring, etc.
