SPEAKER HENDERSON.

Speaker Henderson, who was renominated for congress by the republicans of his district in Iowa, declines to accept the nomination for the reason that he does not agree with the people on some political questions which he deems vital. The matter of disagreement is the tariff policy. The plank in the platform upon which the distinguished congressman refused to stand is in these words:

"We favor any modification of the tariff schedules that may be required to prevent their affording shelter to monopoly."

Commenting on this, Sec. Shaw states that the resolution is variously construed by Iowa politicians. In fact the plank is really a straddle and Congressman Henderson refused to be put in an equivocal position. He does not believe that the trust question can be solved by lowering or removing entirely the duty from trust made products, or by free trade. He is opposed to tariff tinkering, though he favors Cuban reciprocity, presumably along the lines of the House bill of last winter which removed the differental of one cent per pound on refined sugar imported.

Henderson was first elected to Congress in 1882 and has served continuously since. This nomination which he declines is for his eleventh term.

Henderson, who has declined the congressional nomination tendered by the republicans of the 3rd Iowa district, received in the 1900 election 30,181 votes to 18,856 cast for his opponent.

Now that Speaker Henderson is not to be in the next congress, the name of Congressman Sherman of New York attracts attention for speaker. Sherman was thought of as presiding officer when Henderson was chosen. Although an eastern man he has many friends in the West. He has well wishes for the Great West.

The same newspapers that clamored for punishment to be meted out to poor old General Jake Smith are now urging General Chaffee not to trifle with the Moros, but to give them a blow "so prompt, so sharp and so severe that it will never be forgotten." To do that in Mindano will require quite as much severity as General Smith ever thought of.—Astorian.

Southern Illinois seems to be enjoying a boom in big red apples this season. A Richland county paper mentions some large sales in that vicinity among which is the crop off 100 acres for $10,000, or $100 per acre, and another of 320 acres for $11,500 or about $36 per acre. These crops are produced under less favorable conditions than prevail in the Willamette valley, as the codlin moth is a worse pest and the bitter rot, unknown here, has to be reckoned with. Our foothills could be turned to good use by planting to apple trees, enough of them to induce buyers to come here for the product.

ATTEND THE STATE FAIT.

To be Held at Salem, September 15-20

Take a few days after haying and harvesting and go away for a change of scene and air. Too few farmers and farmers' wives take any vacation during the year. There is nothing so good as a change of living and a few days' rest to brace one up, both physically and mentally. Most of the large city business houses give employees one or two weeks' vacation during the year and they find it pays well in the better health of their men and greater interest taken by them in their duties. A week's rest attending the state fair is both educational and recreative. The exposition will be filled with the finest exhibits of farm, field and orchard. The livestock show will surpass anything of the kind ever given on the coast and no progressive farmer can afford to miss seeing the possibilities of improved breeds and breeding. Good racing every afternoon between the fleetest-footed racers on the coast. Good music and high class entertainment in the evening. Reduced rates will be made by the Southern Pacific for the occasion. Ask your agent for full information.

A few weeks ago two independent cargoes of salt were brought to Portland. Prices fell 50 percent even before the second ship was in the Columbia. But capital, except when it is in a combine, is timid, and the independent importers sold to the salt trust. And now trust prices prevail.

AN EXHIBITION PIANO.

We note from the Portland papers that Miss Maude Wilson has secured one of the choice exhibition pianos included in the Eilers Piano House exhibit that has attracted so much unstinted praise and enthusiastic admiration during the Portland Carnival. The piano is a beautiful English mottled walnut case and is the largest orchestral size, and will undoubtedly prove a source of much pleasure and satisfaction to Miss Wilson and her extensive circle of friends for all time to come.

The Banfield-Veysey strike has been given up, and the company is now fair. The striking teamsters think they could have won the strike were there fewer non-union men willing to take their places. There is free labor enough to do the work of the country could it be assured of personal safety—if it did not have to fight and work at the same time.

THE HESSIAN FLY.

How to Detect This Pest--A Valuable Bulletin.

Chas. E. Thorne, director of the Ohio agricultural experiment station has issued the following bulletin on "How to Circumvent the Hessian Fly."

So little complaint of the Hessian fly has been heard at the Ohio experiment station this season that there is ground for the hope that there will be no trouble from it for a few years to come, but it will be wiser for farmers to be on their guard lest it may appear suddenly as it did in 1899.

It is possible for every farmer to determine for himself whether the fly is likely to appear in destructive numbers in his wheat this season. To accomplish this, let a small strip of wheat be sown along one side of the intended wheat field about two weeks before the time when the main crop is usually sown in that particular locality.

As soon as the wheat comes above the ground examine the young shoots carefully every day with a magnifying glass. A cheap lens, magnifying about three diameters, which can be bought of any optician or department store for a dollar or less, is sufficient. If the fly is present, its minute, reddish eggs, one-fiftieth of an inch long, will be found in the creases of the young wheat blades. Once seen under a glass these eggs can easily be seen by the unaided eye as red specks. Often two or three are found together, living end to end.

Usually egg laying occupies about a week, and if the fly, on her appearance, finds a little wheat ready for her, she will soon deposit all her eggs, after which the main crop may safely be sown in the assurance that by the time it appears above ground the eggs will have been laid on the earlier sown wheat.

Many farmers suppose that the so-called "flaxseed" which are found in October and November at the base of the wheat stalk, are the eggs of the fly, but this is a mistake; these "flaxseeds" are the full grown larvæ of the fly, which undergo their transformation into the winged insect within the brown cases called "flaxseeds."

BRIGHT'S DISEASE.

The largest sum ever paid for a prescription, changed hands in San Francisco, Aug. 30, 1901. The transfer involved in coin and stock $11,500.00 and was paid by a party of business men for a specific for Bright's Disease and Diabetes, hitherto incurable diseases.

They commenced the serious investigation of the specific Nov. 15, 1900. They interviewed scores of the cured and tried it out on its merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases, and administered it with the physicians for judges. Up to Aug. 5, eighty-seven per cent of the test cases were either well or progressing favorably.

There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address JOHN J. FULTON COMPANY, 40 Montgomery St. San Francisco, Cal.

Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflamation is taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.
