Laetive Bromo-Quinine Tablets
The remedy that cures a cold in one day

GAINED FORTY POUNDS IN THIRTY DAYS.
For several months my younger brother had been troubled with indigestion. He tried several remedies but got no benefit from them. We got some of Chamberlain's Stomach and Liver Tablets and he commenced taking them. Inside of 30 days he had gained 40 pounds in flesh. He is now fully recovered. We have a good trade on the Tablets—Holley Bros., Merchants, Long Branch, Mo. For sale by Delta Drug Store.

EXPLANATION OF OUR PLAN

TRADER'S PREMIUM BOOK

GOOD FOR ONE YEAR

We have endeavored to give you one of these Ticket Books, but call and get one if you have missed, and when you make a cash purchase at our store bring this book with you and have the amount of your purchase punched out on the ticket which appears on the second page of the cover. When the entire ticket is used and goods to the amount indicated by figures have been bought, we will take pleasure in presenting to you a copy of our Premiums. Please bear in mind that we make no advance in the price of our goods on account of our Premium Offer. On the contrary, we positively assert that our goods and our prices will bear comparison with those of any other firm in our line of business. We accordingly invite you to call at our store and examine the choice selection of Premium Books we have bought from the publisher. Their elegance and merit cannot fail to please you.

MESSINGER TRADING CO., HILLSBORO

INAUGURAL ADDRESS.

Every successive administration of a college finds already prepared for it, in the previous history of the institution, the foundations upon which it must build up its own structure. There is a large element of permanence in every well established college which must in a general way determine its course in the coming years. Administrations may come and go, but in its essential principles the college remains the same. The purposes which actuated its founders, and the general policy followed out in its history constitute a sacred trust to be administered with the same fidelity as the funds which have been contributed to its endowment. It is fitting, therefore, upon an occasion like the present when we are about to take a forward look into the future, that we also take a backward look into the past; to take counsel of the years that are gone in order it possible to get into the spirit of those who have labored here before us. This obligation that comes to us out of the past to preserve sacred the best traditions of the college does not preclude, or in any way interfere with, the growth and expansion of the institution; it does not mean that there can be no changes in its work. It simply determines in a general way the courses along which its expansion may take place. The past of Pacific University speaks with no uncertain sound of its character, and the principles by which preceding administrations have been guided. The man who, more than any other, laid its foundations, and by his untiring zeal and persevering influence, determined the character of its superstructure to the present time is he who was for more than 25 years its first President at Sidney Harper Marsh. It lacks now but a few months of 50 years since he delivered his inaugural address on the occasion which marked the formal establishment of Pacific University, grown out of Tuslato Academy, and at the same time his own installation in the presidency of the infant institution. The closing paragraph of his inaugural sums up President Marsh's conception of the true function of a

good soldiers in the battle of life, and the skill to manage the evolutions, and control the movements in the conflict—that to make men and not scholars is our purpose—that this is not with reference to this class or the next, but it is to be a continued influence when the grave shall have received all of us, when we think of the place, the time and the circumstances, that we here, almost within hearing of the roar of Pacific, in this land so recently a wilderness; that we, the first, not in haste, but with deliberation, and to meet the exigencies of the country; not heedlessly, but prayerfully, are publicly organizing a college, we feel that neither energy nor philanthropy nor any human power can suffice to accomplish what is undertaken. We feel it a privilege as well as a duty to be able to commit this institution, consecrated in its infancy, now in the first flush and vigor of manhood, to that God who has guarded and guided, and who will, we hope and pray, yet crown it with his praise. This paragraph is the summing up of the address. In it we catch the spirit of the man, and we see clearly set forth two general principles which are to dominate his work and that of the college. The first is the purpose to make, not scholars merely, nor citizens, but men; men broadly and thoroughly educated, and so scholars as well and loyal citizens too, but first of all, men. There is also a distinct recognition of the religious element in the training which the college is to give. To produce christian men, then, was set forth at the very beginning of the life of Pacific University as the sole design of all its work. And this has remained its true purpose in the succeeding years, and its changing ad-

Weak Hearts

Are due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indigestion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach which fails of perfect digestion ferments and swells the stomach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that delicate but vital organ becomes diseased. Mr. D. K. Noble of Nevada, O., says: "I had stomach trouble and was in a bad state as I had heart trouble with it. I took Kodol Dyspepsia Cure for about four months and it cured me."

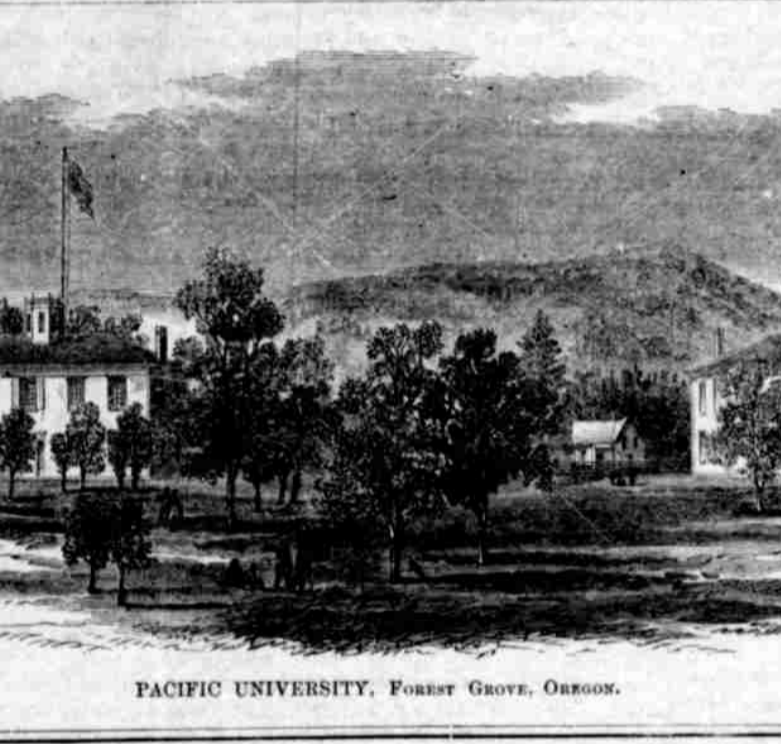

Kodol Digests What You Eat
and relieves the stomach of all nervous strain and the heart of all pressure.
Bottles only \$1.00 size holding 2 1/2 times the trial size, which sells for 50c.
Prepared by E. O. DEWITT & CO., CHICAGO.

CONFESSIONS OF A PRIEST.

Rev. Jas. S. Cox, of Wake, Ark., writes: "For 12 years I suffered from Yellow Jaundice. I consulted a number of physicians and tried all sorts of medicines, but got no relief. Then I began the use of Electric Bitters and feel that I am now cured of a disease that had me in its grasp for twelve years." If you want a reliable medicine for Liver and Kidney trouble, stomach disorder or general debility, get Electric Bitters. It's guaranteed by All Druggists. Only 25c

ministrations down to the present time. The passing years have witnessed progress and many changes, both in the outward equipment of the college, and in the breadth and extent of its work. President Marsh's inauguration took place amid surroundings quite different from those we enjoy today. The auditorium was an unfinished store-building standing at the street corner where is now Vert's Hall. The platform and seats were extemporized from rough boards and dry-goods boxes. In point of material equipment we are, as we ought to be, almost immeasurably in advance of the condition of that early day. There was nothing in way of laboratories, and the library had scarcely made a beginning. There were few students, and President Marsh with one or two assistants did practically all the work of teaching. If we consider the college curriculum, compare the present with that of President Marsh's day the change is not less noticeable. The courses of study have been extended from time to time, and the standard of scholarship raised as fast as the general conditions seemed to justify. It is quite possible indeed that in its desire to raise the standard the college has been at times even in advance of public appreciation, and has been compelled to sacrifice something of popular favor to this purpose. The number of young people who have been willing to pursue its courses of study through to the end has always been comparatively small, and relatively few of its students are found in the upper college classes. This is a pioneer college in a state which is even yet only sparsely settled. It is an important part of the work of such an institution to cultivate a popular sentiment that shall place a right estimate upon true education. All

extent to that given in the larger and more richly endowed institutions in other states. But it is distinctly the aim of Pacific University to do thoroughly and well what it attempts to do. And we hope and expect to grow in the coming years, as we have in the past; to increase the endowment and the facilities for work so that we may offer courses more and more extensive; and in all the growth, to maintain the same worthy standards of excellence. While in point of magnitude Pacific University belongs in the list of the small colleges in our country, its field of influence has always been more than merely local. Every year its students have come from the remotest parts of our own state, and from the adjoining states as well. If our expectations for the future are realized, its reputation and its influence will have a yet wider scope, and it will continue to stand in the front rank of the christian colleges of Oregon and the Northwest. This institution was founded in faith and prayer as a christian college, and such it has continued to be in all its career. It looks with no hostile or envious eye upon the development of secular schools under the care of the state, but it firmly believes that it has its own peculiar province to include in its training an element that the state schools cannot give. It believes that the average young person needs to have religious instruction for the establishing of his moral character at just the formative age of the usual college student. Instruction in the Bible and religious truth constitute the real and solid basis for the development of moral character; and this can be neglected only at great profit to society and the state. It is a double standard of mental training and

religious instruction that Pacific University sets for itself. The changes which we have seen here are those that are taking place in the colleges generally over the country, and when considered in connection with changed conditions, are rightly accounted great improvements. The fact is, college life and work every where in America today are greatly different from those of even 30 years ago. We can imagine a Harvard graduate, for example, of the last generation who has not kept in touch with the growth of the University returning today to visit the old scenes. He will simply be lost in the laboratories with their appliances and apparatus of which he knows neither the names nor the uses. And he is utterly confused when he looks into the modern catalogue and attempts to find his way through the multiplicity of courses, regular and special, which are offered in the curriculum. In all the colleges the courses of study are now to a very large extent elective, the student being permitted to make his choice of such studies as best suits his taste or his judgment of what is best adapted to the career in life which he proposes for himself. The methods of teaching, too, particularly in the sciences, have been simply revolutionized, the work being now almost entirely confined to the laboratory, and the laboratory method is being adopted in nearly every branch of study.

The new system, as distinguished from the old restricted courses of study, is appreciated by the public generally to an extent that the old was not. The changes in the curricula of the colleges have come about in answer to an existing demand. This demand is felt everywhere, in our own section as well as in the older and more thickly settled parts of the country. It is a condition that confronts all the colleges in the land. It confronts us. How shall Pacific University meet it? Eleven years ago our courses of study, which previous to that time, had been almost wholly prescribed, were materially changed. A portion of the work only was still prescribed, the remainder being electives offered in increasing amount to the end of the course. In the words of President McClelland, it was an attempt "to provide for the special aptitudes and the prospective needs of the individual student." I believe this was the first institution of the state to offer such courses. From time to time since then, the number of electives offered has been increased, and to some extent the amount of prescribed work has been lessened. Here, as in the colleges generally over the country, the trend is plainly toward a yet larger freedom of choice for the student in the selection of his studies; although, of course, the amount that can be offered is limited by the capacity of the institution, and its ability to provide for the work. In order to conform to this evident trend it would seem advisable again to re-adjust our curriculum, and introduce what is known as the "Group system." In place of the three courses now offered, Classical, Scientific

and Modern Languages, we propose to offer four courses, each of which shall be a group of related studies. The first group shall be in the field of the liberal arts, the second in the field of the sciences, the third in the field of the humanities, and the fourth in the field of the fine arts. This system will give the student a broader and more comprehensive education, and will also enable us to offer courses of study which are more in keeping with the needs of the time. We are confident that this system will be appreciated by the public generally, and will result in a more thorough and more efficient education for our students. We are confident that this system will be appreciated by the public generally, and will result in a more thorough and more efficient education for our students. We are confident that this system will be appreciated by the public generally, and will result in a more thorough and more efficient education for our students.

A LOVE LETTER.

Would not interest you if you're looking for a guaranteed Salvo for Sores, Burns or Piles. Otto Dodd, of Ponder, Mo., writes: "I suffered with an ugly sore for a year, but a box of Bucklen's Arnica Salvo cured me. It's the best Salvo on earth. 25c at All Druggists."

BROKE INTO HIS HOUSE.

S. Le Quinn of Cavendish, Vt., was robbed of his customary health by invasion of Chronic Constipation. When Dr. King's New Life Pills broke into his house, his trouble was arrested and now he's entirely cured. They're guaranteed to cure, 25c at All Druggists.

A PERFECT PAINLESS PILL.

Is the one that will cleanse the system, set the liver to action, remove the bile, clear the complexion, cure headache and leave a good taste in the mouth. The famous little pills for doing such work pleasantly and effectually are DeWitt's Little Early Risers. Bob Moore of Lafayette, Ind., says: "All other pills I have used gripe and sicken, while DeWitt's Little Early Risers are simply perfect."

HE LEARNED A GREAT TRUTH.

It is said of John Wesley he once said to Mistress Wesley: "Why do you tell that child the same thing over and over again?" "John Wesley, because once telling is not enough." It is for this same reason that you are told again and again that Chamberlain's Cough Remedy cures colds and grip; that it counteracts any tendency of these diseases to result in pneumonia, and that it is pleasant and safe to take. For sale by Delta Drug Store.

THE SALVE THAT HEALS.

Without leaving a scar is DeWitt's. The name Witch Hazel is applied to many salves, but DeWitt's Witch Salve is the only Witch Hazel Salve made that contains the pure unadulterated witch hazel. If any other Witch Hazel Salve is offered you it is a counterfeit. E. C. DeWitt invented Witch Hazel Salve and DeWitt's Witch Hazel Salve is the best salve in the world for cuts, burns, bruises, tetter, or blind, bleeding, itching and protruding piles.

SAVES TWO FROM DEATH.

"Our little daughter had an almost fatal attack of whooping cough and bronchitis," writes Mrs. W. K. Haviland, of Armonk N. Y., "but, when all other remedies failed, we saved her life with Dr. King's New Discovery. Our niece, who had Consumption in an advanced stage, also used this wonderful medicine and today she is perfectly well." Desperate throat and lung diseases yield to Dr. King's New Discovery as to no other medicine on earth. Infallible for Coughs and Colds, 50c and \$1.00 bottle guaranteed by All Druggists. Trial bottles free.

A CURE FOR DYSPEPSIA.

I had dyspepsia in its worst form and felt miserable most all the time. Did not enjoy eating until after I used Kodol Dyspepsia Cure which has completely cured me.—Mrs. W. W. Saylor, Hilliard, Pa. No appetite, loss of strength, nervousness, headache, dyspepsia, constipation, bad breath, sour risings, indigestion and all stomach troubles are quickly cured by the use of Kodol. Kodol represents the natural juices of digestion combined with the greatest known tonic and reconstructive properties. It cleanses, purifies and sweetens the stomach.

DO GOOD-IT PAYS.

A Chicago man has observed that, "Good deeds are better than real estate deeds—some of the latter are worthless. Act kindly and gently, show sympathy and lend a helping hand. You cannot possibly lose by it." Most men appreciate a kind word and encouragement more than substantial help. There are persons in this community who might truthfully say: "My good friend, cheer up. A few doses of Chamberlain's Cough Remedy will rid you of your cold, and there is no danger whatever from pneumonia when you use that medicine. It always cures. I know it for it has helped me out many a time." Sold by Delta Drug Store.

For a pleasant physic take Chamberlain's Stomach and Liver Tablets. Easy to take. Pleasant in effect. For sale by Delta Drug Store.
