

Denatured Alcohol.
The value of free alcohol to the public can be better appreciated when the many uses of this product are known to the farmers of the country. Uncle Sam being desirous of giving the public the full benefit of the opportunities in store, purposes having an exhibit at the Jamestown Exposition showing the development and uses of denatured alcohol, which is made from the products of the farm and garden. This exhibit will be in charge of competent Government officials of the experiment stations of the Department of Agriculture.

In connection with this Government exhibit will be exhibits of various kinds of internal combustion engines using denatured alcohol for fuel. Farmers will learn at the Jamestown Exposition how to save labor in a thousand different ways. They will be shown how they can utilize machinery for sawing wood, chopping stock feed, pumping water and many other things. And the farmer's wife can employ machinery for doing her churning, washing, operating her sewing machine and in many other ways to save labor. Special machinery is already being made for utilizing this new and cheap fuel, and so economical will be this fuel alcohol that every farmer can make his own supply from the waste products of his farm.

Uncle Sam will also show the public how to use denatured alcohol as a fuel for heating and cooking purposes at home and for lighting the houses and country roads. He will teach the farmers how they may save time and expense by making their fuel and lights at so small a cost that their living expenses will be reduced to a minimum and their conveniences so greatly increased that they will find real luxury in living on a farm.
