# Billsboro Independent. MOONLIGHT RIDE

Fully 500 Persons Enjoy the Trip Through a Delightful and Productive Country.

In response to invitations from President E. E. Lytle and C. E. Lytle, General Manager of the Pacific Railway & Navigation Co., fully 500 Hillsboro people boarded seven flat cars at the foot of Main street last week Thursday evening, and at 7:25 the train, laden with the happiest, jolliest and largest crowd ever drawn by railway out of this city, pulled out for Buxton, to which point the new line is completed. And such a ride! Not because of the magnificence of the rolling stock or the speed made, but because this was the first excursion train to run over the new Tillamook line, destined to be in the near future one of the best and most profitable railways in the whole of Oregon. And because, further, that every one of the 500 excursionists will remember the ride and the uniform kindness and courtesy of the officials who made

Within the next six months distilleries are to be installed at the sugar factories in Utah and Idaho, according to the Salt Lake Herald. for the manufacture of denaturized alcohol. General Manager Thomas R. Cutler, of the Utah Sugar company, said last night that in-

vestigations were being carried on along this line to obtain the alcohol from molasses, the uncrystalized syrup produced in the manufacture of beet sugar. From this product, which contains a large percentage of sugar, quantities of alcohol can be produced at low cost. The removal of the government tax on denaturized alcohol has opened up large possibilities in the manufacture for the arts and a substitute for gasoline for motive power.-Gem State Rural. A new pest to the fruit trees has

been found by S. A. Moulton, of Forest Grove. One of his plum trees, which seemed to be intected by some sort of pest, was killed in a few weeks. Upon investigation it was found that some insect had bored to the heart of the tree, making only a very small hole and hardly noticeable, but on further studying the effects of this pest A teaspoonful of lemon juice in a many insects were found boring to be acquainted with this new inthe experiment station at Corvallis, showed signs of their work, some his position there and will accept the goods.
