Via, at Forest Grove, which he attributes to the poison derived in some manner from the San Jose scale. Perhaps eating fruit from the trees affected by the scale may be the origin of the disease. It is well known that an onion eaten at bed time will cure a cold, and as a plaster removes inflammation and hoarseness. But it is not generally known that it will cure sleeplessness. Resolution. Whereas, it is usually customary where application is made to the railroads for freight cars, they are furnished at the pleasure of the roads, regardless of loss or inconvenience to shippers; and yet when said cars are furnished they must be loaded within a specified

number of hours or demurrage charges have to be paid. We think this is unfair. Therefore, be it resolved by the members of Washington County Pomona Grange that we are unanimously in favor of a law by which all common carriers shall be compelled to furnish cars on reasonable orders or pay sufficient damage for all delays. Unanimously adopted by Washington County Pomona Grange. RUBY W. BOYD, Secretary. Anton Fritz Killed. A San Fernando, Cal., dispatch of December 2, says that Anton Fritz, of Portland, Or., was killed by the west-bound Santa Barbara passenger train there at 8 a. m. Sunday. He had been wandering aimlessly around the place for several days, and was seen that morning crossing the track a few feet ahead of the train. As soon as the train had passed out of the yard, his headless body was seen lying beside the track. It is suspected Fritz deliberately placed his head across the rail for the purpose of committing suicide. His body was placed in a vacant building, and on searching it the officers found about \$42, a gold watch, a check for \$9 drawn on the Monessen Savings & Trust Company, Monessen, Pa., signed by the same company. E. Jeffry, and manager of the real estate department of that company; also a small leather book containing the following addresses: A. Boesken, 216 Eddy street, San Francisco; also Randolph Cohn, 118 West Broadway. Fritz is the man who claimed he was robbed of \$9,500 by a woman in Portland some months ago. His brother is a saloon keeper of Portland. Oregon Kid Wins. In one of the hardest driving finishes ever seen in any of the Portland Hunt club chases E. B. Tongue, on Oregon Kid won the run today. James Nicol, on Will Wehring, was a close second, with R. H. Jenkins, on Mowytza, third. There was not a length separating the three horses as they passed the judges' stand. The course was about six miles long and was covered in 25 minutes. Numerous and difficult blinds had been prepared to snare the riders, and so skillfully had the course been laid out that all of the nine horses were bunched at the finish, the three winners being only slightly in the lead of the field. All of the riders gave credit for the success of the meet to Mr. and Mrs. F. O. Downing, who laid out the trail. The riders were unanimous in declaring that it was the best trail that they have ever followed and reported "at the close that in not one place was the main trail broken. This was laid out by Mrs. Downing, while the blinds were placed by Mr.

Downing. The chase started on West avenue and finished on Sandy road, with a fine straightaway quarter mile stretch for the finish. There were 100 spectators mounted, while more than a score of carriages were lined up along the finish course. All had an excellent view of the finish, which was one of the prettiest ever seen in Portland. Mowytza turned into the stretch in the lead, closely followed by Oregon Kid and Will Wehring. Half way down the stretch Oregon Kid could be seen creeping up, while Will Wehring never lost his position beside the final winner, and finished second. Mowytza made a game struggle to keep the lead and was only beaten out in the last 100 yards. The riders with their mounts, were: William Walters, on Cricket; J. C. Muehe, on Belerophon; Dr. Emmet Drake, on Tom Fox; W. M. Davis, on Stiney; J. N. Chapman, on Vince; John Latta, on Barnato; James Nichol, on Will Wehring, E. B. Tongue, on Oregon Kid and R. H. Jenkins, on Mowytza. Winter Evening Problems. An ice wagon serves 55 customers in the course of a day. Each family should receive 15 pounds of ice, but owing to the near-sightedness of the driver the average weight is only 10. How much does the wagon gain in one day, and why is it that the near-sighted collector never takes a three-cent piece for a dime? If one man with a lawn mower can arouse 35 people from sleep at 6 o'clock in the morning, how many could seven men with lawn mowers arouse if they tried their level best? It takes a district messenger boy 35 minutes to travel 170 yards while on business for the company, but only four when on his way home. What is the per cent compared to chain lightning? A has the sum of \$12 in his pocket, when B gives him a pointer on the races by which he can win 13 times his capital. What did the sum total amount to, and why was it that A had to borrow a nickel to get home on? By adding two quarts and one gill of water to his stock a milkman brings the total amount up to seven quarts and two gills and swears by the bones of his ancestors that it is pure milk. How much milk did he have in the first place? A and B buy a lottery ticket costing \$5 in partnership. A contributes \$2.50 and B \$2.50. In case the ticket draws \$50,000 what share will each take? Need not be in any hurry to work this out. A farmer has five miles to drive. He figures that while he is driving one mile his hired man ought to hoe three rows of corn across a seven-acre lot. He gets home to find that only seven rows have been hoed in all. What was the average per mile, and how long was the hired man roosting on the fence?
