VOLUME 35

HILLSBORO, WASHINGTON COUNTY, OREGON, FRIDAY, MAY 24, 1907

NUMBER 3

BIG MEETING IN PORTLAND

JUNE 21 AND 22.

Meeting of the Oregon Development League--This Will Be an Important Gathering.

(Special Correspondence.)

Portland, Oregon, May 20th, 1907.—The Oregon Development League will hold its next convention Friday and Saturday, June 21st and 22nd in the rooms of the Portland Commercial Club, second floor, Sixth and Alder streets. This date meets the approval of a large number of persons who want to be present, and is made for the special convenience of newspaper men who want to be present.

Every newspaper man in Oregon is a delegate-at-large to the Oregon Development League meetings. The president and secretary of every commercial, industrial, irrigation, and horticultural organization in Oregon is a delegate, and the president has a right to name such delegation as he desires.

Every county judge in the state is a delegate and has authority to name two others, and the same is true with regard to the mayors of the cities and towns.

Oregon must get full benefit of the colonist rates during September and October and one of the chief features of the convention will be a discussion upon the lines of how we are going to get the best out of this great Northwestern travel. There will be a number of good speakers present and questions vital to the development of this state will be discussed but the central idea of the

gathering will be how to make practical and effective the work of modern advertising; in other words, the best possible plan upon which we can work in harmony to add to the population and wealth of Oregon.

The business men of Portland who participated in the excursion to thirty-three Oregon and five Idaho cities and towns, report such an excellent time that they are planning similar trips in other directions. The high price of wheat will put many hundreds of thousands of dollars into the hands of the wheat growers of the Inland Empire, and the crop outlook is fine.

California teachers are much amused at the excitement in New York because women teachers want the same pay for doing the same work as men teachers. California has three grades of certificates and the salary is in accordance. Men or women are alike eligible and nothing revolutionary has resulted. In fact, California is said to have very good schools.

W. W. Newell and E. S. Truesdale of Broome county, N. Y., who have been recently traveling in Europe and Africa and elsewhere were among the president's visitors April 30. They told the president that he was the best-known man in the world, and that in Egypt they found at least 10,000 camels named after him.

N. J. Walker displayed at this office last Friday a hen's egg about the size of a small walnut. Mr. Walker thinks that although others have displayed eggs of unusually large size, to him (or rather his hen) belongs the honor of the smallest.—Forest Grove News.

For Sale.

WHAT ONE TOWN HAS ACCOMPLISHED

OTHERS CAN DO AS WELL.

Bandon to Build a Paper Mill to Cost a Quarter Million--Great Activity in that Coast City.

The Portland Journal of last Monday has the following to say of Bandon, a town that is forging to the front rapidly, and the article is reprinted here simply to show what a city can do if its people will wake up and reach out for what is coming to it. Hillsboro has without question the greatest opportunity ever offered any town of its size to double—yes, add five times to its population if the people living here will only "do things." This is not intended as a "kick," but is plain facts, and the sooner this Rip Van Winkle lethargy is thrown off the sooner will Hillsboro come into her own—that of a thriving, important city of from 5000 to 10,000 people.

A \$250,000 pulp and paper mill for manufacturing high grade white paper is the newest prize captured by the city of Bandon at the mouth of the Coquille river. The citizens are raising \$50,000 to be augmented by \$200,000 of Eastern capital. The mill will manufacture paper from white cedar and alder by a new process.

M. C. Bingham of Portland who returned yesterday from the Coquille region, said:

"There is great activity in building, and increase of business and population in the Coquille valley. The people of Bandon are entitled to much credit for the enterprise they are showing. At the J. H. Price & Company shipyard three ships are on stocks, and will be completed within a short time. All are steam schooners, and will run in

the lumber trade.

One has a lumber carrying capacity of 850,000 feet, and will go to Gray's Harbor. Another of 500 tons register has been chartered for 10 years by the Cody Lumber company, of Bandon. A third, of 350 tons register, will run lumber from Bureka to San Francisco, and bring back general cargo. The Price company has contracts for two more similar vessels. Mr. Price has offered to build a vessel for the Portland-Coquille run at actual cost.

Growth of business at Bandon is shown by the record of the Bandon woolen mills. If these mills did not get another order this year they would now have enough orders on hand to run until the first of next January. A single order from Detroit, Michigan, is for \$35,000 of one grade of cloth.

"If that is not pretty good for a small concern any out here on the Pacific coast, I would like to know," said Mr. Bingham, proudly. "The woolen mill people have just put in 500 new spindles. They will shortly increase their force and run the mill night and day, employing altogether about 70 men."

Johnson & Lyons, two local young men, are completing a new sawmill of 75,000 feet daily capacity on the Coquille river three miles above Bandon. All the equipment is new throughout.

L. M. White, a physician at Palouse, Washington, returned yesterday to Portland from Bandon, where he purchased property and will erect a hospital. It is said by Bandon people that their harbor and resources equal those of any point on the Oregon coast. The Coquille river is navigable for lumber vessels to Riverton, 18 miles above Bandon. There is a deep channel, accessible on both sides of the river for vessels.

The bar has a depth of more than 13 feet at low tide. The tide ordinarily at the mouth of the river is eight feet and the full moon tide is 10½ feet. Good progress is being made with the movement to build a vessel for the Portland-Coquille run.

Successful Farming.

John Henry came to Beaverton in 1867 and bought land at \$10 an acre of W. P. Patton, this land was very wild, he had to cut down the brush and grub it out of standing water, he hauled sand from Portland and made his own tile for years to drain this land. He has about five miles of tiling which empties into the beaverdam ditch.

After many years of hard work, Mr. Henry has now in cultivation 50 acres of the finest horse radish

and onion seed on the coast; he does all of his business by mail and ships to every state this side of the Rocky mountains.

By long experience he has gained a thorough knowledge of this trade; he is also known as the pioneer asparagus grower and his onion seed is very famous but horse radish is his specialty and is widely known.

This proves the theory that a man who is successful must put his time in on one branch of agriculture as Mr. Henry has done.

very little was known of horse radish until he made a special study of it and now he can not fill the demand.
