

Bad Blood

Is the cause of all humors, eruptions, boils, pimples, scrofulous sores, eczema or salt rheum, as well as of rheumatism, catarrh and other troubles. The greatest blood remedy for all these troubles, proved by its unequalled record of cures, is

Hood's Sarsaparilla

In small liquid form and in chocolate tablets known as Sarsatabs, 100 doses \$1.

Preparations.
The owl was exhorting the jaybird to reform.

"I know I'm a tough proposition," acknowledged the jay. "But how can you expect me to turn over a new leaf when the trees are only in bud?"
Then with a mocking scream, she went and stole a nest that a trusting robin had just built.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

On Wagons Against Freight Trains.
In the Cape of Good Hope colony many of the short railroad branches and extensions do not pay on account of ox wagon competition. In the report for the year 1905, recently issued, the traffic manager of one of the lines reports in regard to a new nineteen-mile branch that as there was a very plentiful supply of wagons and an abundant supply of grass during the season ox wagon rates ruled low and the railroad secured little general traffic.

Crowded.
Secretary Taft was, on one occasion, in consultation with Senator Penrose of Pennsylvania. The Secretary is gigantic, and the Senator is taller and weighs more than any member of the Senate.

While these two statesmen were in earnest conversation, an aggressive politician endeavored to enter the room, but an alert secretary politely interferred.

"What are they doing in there?" asked the politician, inquisitively.
This impertinent question nettled the secretary, and he answered, tersely: "Holding a mass meeting, I presume."—Harper's Weekly.

DOES YOUR BACK ACHE?

Has Found Relief.
James R. Keeler, retired farmer, of Fenner St., Casnovia, N. Y., says: "About fifteen years ago I suffered with my back and kidneys. I doctored and used many remedies without getting relief. Beginning with Doan's Kidney Pills, I found relief from the first box, and two boxes restored me to good, sound condition. My wife and many of my friends have used Doan's Kidney Pills with good results and I can earnestly recommend them." Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Typewriters Catch Cold.
The employer looked on with a puzzled expression while the new stenographer carried the typewriter across the room and placed it on a chair in the immediate neighborhood of a steam radiator.
"I'll be ready in just a minute, Mr. L—," she said. "The typewriter got cold while the heat was turned off, and it sticks dreadfully."
"Does the cold affect them?" he asked. "That's something new."
"Yes, sir. I find that it does, very much. Some machines regularly take cold if left long in a cold room. It's especially hard on old machines that are pretty well worn, making them very unmanageable sometimes. I've known the cold to remain in an old one until it had been several hours in a warm room, when it gradually became better; but usually a machine yields to three or four minutes of warmth."—New York Press.

Speaking of Thaws.
"Thaw—" began Mrs. Stubbs the other morning.
"Thaw!" snapped Mr. Stubbs, irritably. "Now, look here, Maria, if you begin to talk about the Thaw trial I will leave the house. I am sick of hearing about it and—"
"Thaw—"
"Didn't I tell you to stop? This Thaw argument is a nuisance and—"
But Mrs. Stubbs was rapping on the kitchen table with the rolling pin.
"Ignoramus!" she hissed. "Will you give a poor, weak woman a chance to get in a word? I am not talking about the Thaw trial. I was merely telling you to go out and thaw the pipes. Of all the—"
But Mr. Stubbs had fed with the kettle of hot water.

Price of Protection.
Herkimer James, the well known agent, was talking in New York about the bill of \$25,000 that Dr. Frank Billings presented to the Marshall Field estate.
"It seems a big fee," said Prof. James. "But whenever physicians' fees seem extortionate I think of a certain famous eye specialist.
"A patient of this specialist's coming to pay his bill, growled:
"Doctor, it seems to me that \$500 is a big charge for that operation of mine. It didn't take you over half a minute."
"My dear sir," the other answered, "in learning to perform that operation in half a minute I have spoiled over eleven pecks of such eyes as yours."—Philadelphia Record.

Stay-at-Home Laborers.
Farm laborers in England are not migratory. A certain farm in Wiltshire has a regular staff of six men and two boys who have served for the following periods: Forty-six years eight months, forty-four years eight months, thirty-two years eight months, twenty-six years seven months, fourteen years eleven months, four years eleven months, five years six months, three years nine months. There is thus an aggregate period of 179 years of service.

Old Favorites

Morning.
But who the melodies of morn can tell? The wild brook babbling down the mountain side;
The lowing herd; the sheepfold's simple bell;
The pipe of early shepherd, dim described
In the lone valley, echoing far and wide
The clamorous horn along the cliff
The hollow murmur of the ocean tide;
The hum of bees, the linnet's lay of love,
And the full choir that wakes the universal grove.

The cottage cures at early pilgrim bark;
Crowned with her pal the tripping milkmaid slings;
The whistling plowman stalks afield; and bark!
Down the rough slope the ponderous wagon rings;
Through rustling corn the hare astonished springs;
Slow tolls the village clock the drowsy hour;
The partridge burets away on whirling wings;
Deep mourns the turtle in sequestered bowers,
And shrill lark carols clear from her aerial tower.

Concord—April 19.
By the rude bridge that arched the flood,
Their flag to April's breeze unfurled,
Here once the embattled farmers stood,
And fired the shot heard round the world.

The foe long since in silence slept;
All like the conqueror silent sleep;
And Time the ruined bridge has swept
Down the dark stream which seaward creeps.

On this green bank, by this soft stream,
We set to-day a votive stone;
That memory may their deed redeem,
When, like our sires, our sons are gone.

Spirit, that made those heroes dare
To die, or leave their children free,
Bid Time and Nature gently spare
The shaft we raise to them and thee.

SUGAR MIGHT BE CHEAPER.
Suggested National Policy that Would Reduce the Price.
Including Cuba, whose interest is vital, four different groups are concerned by the American sugar situation. There are (1) the American government, which receives a little more than \$50,000,000 a year in revenue from the tariff on sugar; (2) our domestic and our insular producers, to whom that tariff is a direct benefit to the extent of about \$50,000,000 a year; (3) the consumer, who is interested in lower prices, and (4) the Cubans, who are so largely dependent upon the American market for their livelihood.

In an article in the *Interchange* Edward F. Atkins of Boston, the owner of a large plantation in Cuba, works out a plan among an interesting and probably correct line.
With a general assumption of the continuance of present political and fiscal conditions Mr. Atkins says:
"To all appearances our importations of foreign sugar, other than Cuban, will soon end and from that time, if domestic and Cuban production keeps pace with increased consumption, as is anticipated, a differential to Cuba would protect her against other countries and reduce cost to consumers in the United States." He holds that "the protection of even the Cuban rate (about 1.35 cents a pound) now gives the domestic sugar producers so large a margin of profit that they can well afford to drop prices below Cuba's cost in order to market their goods." He claims that in the almost certain event of the reduction of competition to our domestic product and the Cuban product a very material reduction could be made in the present Dingley rate.
Should that be done two results should follow: There should be reduction in selling prices and important increase in consumption. The initial loss of revenue to the government would soon be offset by increase in imports from Cuba. Increased demand should stimulate domestic production. The Dingley rate, practically a maximum rate, would keep out the sugar of other countries if Cuba were given a differential, or what might be regarded as a minimum rate. This differential would virtually assure to Cuba a market for her product and so divide the market between her output and our domestic supply.
The argument is certainly worth a careful consideration by the authorities.—New York Sun.

East Behind in Education.
A fact which will be surprising to some easterners is that people of the middle west are ahead of them in the matter of average education. The rate of illiteracy in cities of 25,000 or over in the North Atlantic States, which include New England, New York, New Jersey and Pennsylvania, was at the date of the last national census 5.8 per cent and outside the cities 7.3 per cent.

In the North Central States, which include Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North and South Dakota, Nebraska and Kansas, the percentages were 3.5 and 4.6 respectively. In the former division there are eighty-seven universities and colleges, with 29,965 undergraduates and 3,003 graduate students, while in the latter there are 187 institutions of this character, with 40,537 undergraduates and 2,827 graduate students.—New York Tribune.

SNOW ROLLERS OF VERMONT.

Simple Device in Use for Keeping Highways Passable All Winter.
Snow rollers are used extensively in Vermont and other States of the northern border, says the *Springfield Republican*. The snow roller is a new contrivance, but has been in use in Vermont for many years. Nearly all of the Vermont townships own several. It has never been displaced by a more modern device for opening the winter roads, and has proved to be not only the easiest and cheapest means of overcoming drifts, but also a producer of better winter roads.

One used in the town of East Hardwick has been in service for twenty years. It has rollers, both of which are six feet in diameter, each nine feet wide with a space of about nine inches between. Thus it will be seen that the whole roller presents a total width to the roadway of nearly twenty feet, enough to make ample room for traffic by going over a roadway once. The rollers are usually drawn by four heavy horses and are taken on circuits that vary from six to nine miles in length.

Of course the rollers cannot surmount all drifts, and the men who accompany them are often obliged to get down and shove. But even then the final results are way and beyond those obtained by the plow method. The rollers, heavy in themselves, are often ballasted, and they pack the snow down in an even roadway that is without ruts and is not cut up easily. As the winter progresses, with alternate snows and storms, and each succeeding snowfall is packed down by the rollers, a road of remarkable durability results. These hard, frozen roadways resist the coming of spring for a long time, prolonging the "sledding" through the sugar season, and obviating to a large degree the usual bad going of spring. The roads last so long that when they finally do succumb it is rapidly, owing to the advanced sun, and the mud and slush is soon gone.

LEGAL INFORMATION.
Where A holds a mortgage on a farm and assigns the same to B, and B assigns the same to C, only C need to give a satisfaction of the mortgage when the same is paid. By recording the assignments of mortgage, the records show that C is the owner thereof, and that he is the proper party to satisfy the mortgage.

One has no right to shoot a strange dog, that simply happens about his premises, and is liable to the owner in any damages for so doing. One, however, has the right to shoot a dog that is a nuisance because of his killing sheep or other animals, or because of the likelihood that he will otherwise do injury to a party either in person or property.

The railway company is not liable for killing a calf upon public crossing, unless it could be avoided by the killing by due diligence. The railway company is bound to fence its track and is liable for damages done to all stock straying upon its tracks because of a failure to build such fence, upon the theory that such killing is through the negligence of its railway. But it is not bound to lookout for stock upon crossings.

"When a teacher at a public school of a common school district in Minnesota refuses to pay a board bill, can the wages of such teacher be garnished in order to repay payment of such bill?"—Ans.—In Counties, towns, cities, village and school districts are liable to garnishment in Minnesota, the same as is an individual, since 1901. As a general rule public corporations are not garnishable, upon the grounds that it is against public policy, but the statute in many States has changed the rule; it should be. There is no more reason why a municipality should not be garnishable than a railway company, a corporation, or any individual.

"Does a railroad company have to construct crossings for farms?"—Ans.—"Any railroad company constructing a railroad so as to leave a part of a farm on either side of the railway, shall construct a proper farm crossing convenient for such farm." This provision seems to apply to the road when it is first put through. Another provision of the statute provides that "persons owning land abutting upon a railroad may construct at their own expense, crossings and drains in such place and in such manner as not to impair the use of such railroad, which crossings and drains shall be maintained and kept in repair by the company." From this it would seem to follow that the railroad companies are not obliged to put in crossings for farms that have been set up after the railroad was put through.

None Lost.
Sand Bar Ferry, near Augusta, Georgia, is a flatboat affair, frail and rickety. Two timid ladies, hesitating to cross, plied the negro boatman with questions about it.
"And are you perfectly sure no one has ever been lost here?" they demanded.
"No, missus," replied the ferryman. "No one ain't never been los' here. Marse Jake Bristow done got spilled out and drowned last week, but dey found 'im agin nex' day. We ain't never los' nobody, no, ma'am."

GAVE HIM TIT FOR TAT.
Bit of Conversation Heard at an English Railway Station.
Young Stevens was on his way north to spend the week end with his parents and fell in a particularly jovial mood, says Tid-Bits.
The train in which he was traveling stopped at a small village and as a farmer, who was sauntering up and down the platform, came opposite Stevens' compartment, he was asked by that youth if he knew that the Duke of Devonshire was in the train.
Immediately the man showed great interest and said:
"No! Is he?"
"I think he is not," answered Stevens. "I only asked if you knew that he was."
The farmer said nothing but continued his walk on the platform. As he came opposite the window again he remarked that their town had been experiencing some excitement.
"What's the matter?" Stevens asked.
"The authorities wouldn't let some folks bury a woman," replied the farmer.
"What was the reason for refusing?"
"She wasn't dead," was the laconic reply.
And then he strolled away, leaving young Stevens biting his lip.

Awful Break.
The man of the house had shown the caller the leaky roof, the insecure foundation, the unfinished upper rooms, and the generally wretched condition of the premises.
"Now," he said, "I think you ought to make the assessment about half what it was last year."
"You must have misunderstood me, Mr. Glimpawitch," remarked the caller. "I didn't say I was the assessor. What I said was that my name is Eleasor. I am thinking of buying some property in this neighborhood."—Chicago Tribune.

His Chance.
Young Prof. McGoogle was calling on Miss Grout.
"Duckie," said her younger brother, who happened in, "you don't get your hair all tousled up now like you used to do when Mr. Kleengawa was comin' here."
"You impudent boy!" exclaimed his sister, indignantly, but retaining her self-possession. "You go right back to the sitting room, and stay there!"

Companionship of Books.
Will you go and gossip with your housemaid or your stable boy when you may talk with kings and queens, while this eternal court is open to you, with its society wide as the world, multitudinous as its days, the chosen and the mighty of every place and time? Signs of Coming Earthquake.
Can an earthquake be "felt" approaching as a shower of rain can be felt and a fall of snow? On the Riviera in 1887 the horses laid their ears back and gave every sign of uneasiness. In Chile the birds have been observed to fly inland just before a convulsion. In Talcahuano in 1835 all the dogs fled from the city. These actions, of course, as a scientist who has collected a valuable list suggests, may be mere coincidences, for birds will fly inland and kites become nervous when no earthquake is nigh. On the other hand, as the lower animals are singularly sensitive to any changes of weather and to pressure of the air they may even be conscious of subterranean movements which do not come within human ken or are even not detectable by the most delicate instruments.
