one year, \$2.

## THERE IS PROFIT IN RAISING ALFALFA

IS GOOD CROP FOR HOG FEED.

The Oregon Agricultural College  
Demonstrates This—A Valuable  
Crop to Raise.

The following special from Corvallis to the Oregonian is of interest to every farmer in Washington county, as the question of profitable alfalfa raising has been more or less discussed, and it is plainly shown that the crop can be raised with profit:

A profit of \$27.51 an acre for pasturage on alfalfa for three months has been proved to be a possibility by an experiment on the college farm. There will remain yet during the season three or four months more of pasturage on the same alfalfa field, and Dr. Withycombe, who is directing the experiment, is confident that more than \$50 an acre will be realized from pasturage of the field during the summer. The showing is considered to be of great value in that it is believed an almost equally favorable demonstration can be made on clover, rape or vetch. The results are of striking value in illustrating the possibilities of Western Oregon in the field, as the profit to be gained by the plan is more per acre than lands on which it can be done sometimes sell for.

In the experiment hogs were used. Thirty-two of the animals were put on a two-acre field of alfalfa April 1. All but five of the pigs were picked up in the open market, and were of ordinary grade as to breeding. Up to July 1 they had made a net gain of 1630 pounds. Besides alfalfa, they had consumed during the three months' period 11,850 pounds of skim milk, and 1420 pounds of chopped wheat. For the skim milk, which was produced on the college farm, 25 cents per 100 pounds was allowed, aggregating \$29.62. For the chopped wheat, also grown on the farm, 1 1/2 cents per pound was allowed, aggregating \$21.30, making the total cost of food, aside from alfalfa pasturage, \$50.92. At 6 1/2 cents live weight, the present market price of hogs, the value of the increase in weight is \$105.95, leaving a net balance for the alfalfa pasturage of \$55.03 or \$27.51 per acre.

Meantime the large profit obtained from the alfalfa pasturage, together with that yet to be realized during the next four months in which the pigs will remain on the field, is not the only profit in the demonstration. In addition, the skim milk produced on the farm went at 25 cents per 100 pounds, and did not have to be hauled off the premises. The wheat the pigs consumed brought 90 cents a bushel, instead of the 50 cents that has been the market price until recently.

Above and beyond all, however, is the process of restoration of the land to its originality by the growing of leguminous crops and the presence of livestock on the field with its fertilizing influence. The alfalfa field used has never had a pound of commercial fertilizer on it, is ordinary wheat ground on the upland, and has been subjected to no treatment that is not easily possible on any Western Oregon farm.

**A Wonderful Happening.**  
Port Byron, N. Y., has witnessed one of the most remarkable cases of healing ever recorded. Amos F. King, of that place says: "Bucklen's Arnica Salve cured a sore on my leg with which I had suffered over 80 years. I am now eighty five." Guaranteed to cure all sores, by all druggists. 25c.

London has twenty-seven cabs and five buses for every 10,000 inhabitants. Paris has forty-eight cabs and only two buses for the same number of persons. Naples has fifty-five cabs per 10,000 persons; Genoa has ten buses for every 10,000.

Glass bathtubs are made in Germany.

## Dog Sausage No Joke.

The old joke about eating "hot dog" is no joke in Germany any more, for no less than 7000 canines of various breeds were slaughtered and eaten by the subjects of Kaiser William last year, according to a report from Consul George N. Ifft at Annaberg. The eating of horse meat seems to be quite general in Germany, for no less than 182,000 horses were slaughtered for human food in 1906.

"Horseflesh is very generally advertised in the German papers," says Consul Ifft, "especially in those in large industrial centers, and most German cities have at least one market which makes it a specialty, claiming for it a higher percentage of nourishment than that of beef, veal, mutton or pork. Neither is it unusual to find advertisements of dog meat or for the purchase of dogs for slaughter. In the city of Cassel recently the police, in searching for a lost dog, discovered a private slaughter house and arrested the proprietors, who were apparently making a regular business of stealing and killing dogs."

In the city of Chemnitz alone, Consul Ifft reports 698 dogs were slaughtered for human food in 1906, this being an increase of eighty-eight over the previous year.

**Domestic Electricity.**  
The latest accessory to the already large equipment for the domestic utilization of the electric current was a novel feature of a demonstration of domestic electricity recently held at Dubuque, Ia., which is stated to have been the most complete exhibit of its kind yet attempted in this country.

By means of an electrically operated washing machine, an electric wringer and an electrically heated drying cabinet, a complete family wash was done by a single maid in three hours, including the ironing, which, of course, was finished with electric flatirons.

It only requires a motor of one-quarter horse-power to operate a satisfactory washing machine.

**Soda as a Preservative.**  
A question of considerable importance to the people of the entire country now is under consideration by the board of pure food and drug inspection of the department of agriculture. It is whether the use of benzoate of soda as a preservative is inimical to human health.

Representatives of the Food Manufacturers' Association urge that if they are not permitted, under the pure-food and drug act, to use benzoate of soda as a preservative their business practically will be destroyed. They explain that a large part of their business consists of supplying bakers and restaurants with pie fillings, mincemeat, pickles and catsup, all of which they ship in quantities of 50 pounds or more. These articles, they say, are subject to fermentation.

**Long Live the King!**  
is the popular cry throughout European countries; while in America, the cry of the present day is "Long live Dr. King's New Discovery, King of Throat and Lung Remedies!" of which Mrs. Julia Ryder Paine, Truro, Mass., says: "It never fails to give immediate relief and to quickly cure a cough or cold." Mrs. Paine's opinion is shared by a majority of the inhabitants of this country. New Discovery cures weak lungs and sore throats after all other remedies have failed; and for coughs and colds it's the only sure cure. Guaranteed by all druggists, 50c and \$1.00. Trial bottle free.

After deliberating 35 minutes, a jury at Houston, Va., returned a verdict of not guilty in the case of ex-Judge William G. Loving, on trial for having shot and killed Theodore Estes. Judge Loving's daughter, Elizabeth, had previously told her father that during a buggy ride Estes had drugged and assaulted her.

The Linn County Condensed Milk Co. has filed articles of incorporation. Incorporators, L. H. Curl, M. H. Elbs, C. H. Stewart, J. R. Wyatt and H. Bryant; capital stock, \$100,000.

Have B. Lee Sears fix that broken umbrella.  
At the Ovelery.

## RAILROAD WORK MOVING NOW

1,000 MEN WANTED.

The P. R. & N. Working from Both  
Hillsboro and Tillamook. The  
Line Will Be Finished in 1908.

The Portland Bridge & Building company has the contract for grading, tracklaying and equipping the 20-mile section from Tillamook to the Nehalem, and construction work is in charge of A. C. U. Berry. A large number of men will be immediately needed on the grade and bridge work. Three bridge crews, three logging crews, two right-of-way parties and two grading crews are now engaged on the job.

The scale of operations will be greatly enlarged this week, and upward of 1,000 men can be employed at good wages. A vessel will be loaded at Albina and will carry six miles of track, a locomotive, a steam shovel outfit, 30 dump cars and other equipment to Bay City, on the Oregon coast, where docks have been built, and the company has an office.

"There will be lots of work for a large number of men on the Tillamook grade and bridges, and other employment along the line," said Mr. Berry. "The building of the road has stimulated other lines of work. The Wheeler Lumber company has started its plant. The road will require 5,000,000 feet of lumber and upwards of 7,000 sacks of piling for our section alone. We also have a 300-foot tunnel. The first bridge, north of Tillamook, will be 8,000 feet long. There are 37 bridges in all to be built."

The climate is fine and cool and conditions exceptionally good for workmen. The Hyland company's contract will complete the line to Balm, on the Nehalem river. It will be creditable as a scenic line.

The route from Tillamook city northward skirts Tillamook bay to Bay City, then along five miles of ocean beach, and thence into the timber, up the Miami and down Foley creek to the Nehalem. It passes through a dairying and timber country. The contract for this section is largely steam shovel work. A great deal of heavy grading is to be done, and the clearing of large trees from the right of way is an important item.

Passing up the Nehalem to the Salmonberry, the road will follow the later stream to the summit and cross over to the Kist. From that point a spur will run north to Vernonia, and the main line will run southeast to Buxton and join the present section now in operation to Hillsboro. When completed the road from Portland to Tillamook will be 103 miles. It is said the distance from Portland to Balm, at the mouth of the Nehalem, where the road first touches tidewater, is 85 miles. From that point southward to Netarts bay will be developed a number of new beach resorts.—Journal.

**The Charming Woman**  
is not necessarily one of perfect form and features. Many a plain woman who could never serve as an artist's model, possess those rare qualities that all the world admires: neatness, clear eyes, clean smooth skin and that sprightliness of step and action that accompany good health. A physically weak woman is never attractive, not even to herself. Electric Bitters restore weak women, give strong nerves, bright eyes, smooth, velvety skin, beautiful complexion. Guaranteed by all druggists, 50c.

The searchlight of the British Dreadnaught has a new feature in that it projects beams at the same time in opposite directions to facilitate signaling.

The Bank of England property covers over two acres.

The village of Elm, in the canton of Glarus, Switzerland, is so surrounded by mountains that it has no sunlight all winter.

## Circles Globe in 40 Days.

Col. H. Burnley-Campbell has just completed a journey around the world from Liverpool to Dover in forty days, nineteen and one-half hours, using the ordinary means of transportation. His timetable was: May 3, Liverpool; May 10, Quebec; May 15, Vancouver; May 26, Yokohama; May 28, Baraga; May 30, Vladivostok; May 31, Harbin; June 4, Irkutsk; June 10, Moscow; June 11, Warsaw; June 12, Berlin; June 13, Dover.

**A Memorable Day.**  
One of the days we remember with pleasure, as well as with profit to our health, is one on which we became acquainted with Dr. King's New Life Pills, the painless purifiers that cure headache and biliousness, and keep the bowels right. 25c at all drug stores.

**Don't Invest in Guayule Lands.**

The Mexican government is seeking the aid of its American consuls to thwart the designs of scheming land agents in Mexico, who are accused of putting into effect a clever scheme to defraud foreign investors. It has recently been proven that the guayule, a wild shrub native to Mexican soil, produces to per cent rubber, and this industry has grown to large proportions. Land agents in Mexico have taken advantage of the reputation of the guayule shrub and have sold to investors thousands of acres of land, which apparently contained vast quantities of the rubber-bearing plant. This land, however, is covered with a plant known as the mariola, which contains only one per cent of rubber.

Dr. J. P. Crozier Griffith does not have a very high opinion of the so-called intuition of mothers. Some people are inclined to believe that intuition will teach a mother how to take care of her child, notwithstanding the overwhelming amount of fact to the contrary. The baby animal is cared for by its animal mother, but the doctor thinks the human mother, without education in the matter, is not as able as the animal to care for her young. He is not very fond of the grand-mother, either, who spoils children. Mothers are foolish enough to give babies bananas, and then wonder why they have dysentery. This is the one food that should not be given to children.

Fish live in the ocean at a depth of 18,000 feet.

English sheep are sometimes fattened on snails.

The railroads of England and Ireland are of different gauge. Those of Ireland are 5 feet 3 inches and England's 4 feet 8 1/2 inches.

Perhaps you need a bracer—something that will give you energy, life and ambition. A suggestion—try I. W. Harper whiskey. Sold by F. R. Cornelius.

## SCHMITZ GETS HIS DOSE

JUDGE DUNNE IS ALL RIGHT.

He Scores the San Francisco Hood-  
ler Without Mercy and is Cheer-  
ed by the Crowd.

San Francisco, July 8.—The sentencing of Mayor Eugene Schmitz to five years in San Quentin penitentiary for extortion was one of the most dramatic scenes ever witnessed in a Western court. The effectiveness of the fearful denunciation of the convicted mayor, as delivered by Superior Judge Frank M. Dunne prior to the passing of judgment, was heightened by the demeanor of the prisoner, who time and again interrupted the court to demand that those "humiliating remarks" be desisted from and that "the court do its duty by pronouncing sentence at once."

Once, while the sentence impended, the Judge threatened to send Mr. Metcalf, of the mayor's counsel, to jail for contempt because he described the court's comments as "cruel and unusual punishment," and Mr. Metcalf was told by Judge Dunne that he ought to be "begging a day in court to defend himself against the charge of having tampered with a witness in the case."

The defense filed a bill of exceptions after motion for a new trial and motion for the arrest of judgment had been denied and Judge Dunne granted a certificate of probable cause, upon which Schmitz will go to the district court of appeals for a new trial.

**COURTROOM RINGS WITH CHEERS.**  
As the last words of the sentence fell from the Judge's lips, the great crowd that had stood throughout the dramatic scene, sent up a thunderous cheer.

"Good for you," snouted a man in the back of the room. His ejaculation was echoed and re-echoed by one after another of the spectators. Several threw their hats into the air. Others scrambled upon chairs to look over the shoulders of the crowd. The greatest confusion prevailed.

**The Weather.**  
Very favorable temperatures prevailed during the week. In the northwestern counties it was about two degrees warmer than usual, and in the southern and eastern counties the temperature was nearly normal. Thundershowers occurred generally throughout the state on either Tuesday afternoon or Wednesday, and the rains attending them were in many places unusually heavy. Thundershowers occurred again in the southern and eastern counties during the night of

the 7th, and the rainfall during the week was sufficient for present needs in nearly every agricultural county. The sunshine averaged about normal, and there were no damaging winds.
