(Special Correspondence.) Portland, Ore., Dec. 2nd, 1907.

The convention of the Oregon State Dairy Association December 12th and 13th continues the most interesting subject of statewide importance. In fact, its scope will be much wider than tions; reading notices, one cent a word this state, and speakers from each insertion (nothing less than 15 abroad include Prof. B. D. C., connected with the Dairy Department of the United States Bureau of Animal Industry; Joseph E. Wing. of Mechanicsburg, Ohio, an address on "The Dairy Cow at Home and Abroad": H. L. Blanchard, of Hadlock, Wash., "Practical Dairy Suggestions." Appreciating that these addresses and discussions will be equally valuable to those interested in the dairy business in Washington since conditions surrounding this great industry are identical in the two states, the Oregon association has extended a most cordial invitation to creamerymen and farmers from Washington to attend the convention at Portland. A butter wrapper, one of the very latest dairy appliances perfected, will be shown in the exhibit hall, and various dairy machines will be in actual operation with electricity as the motive power.
