The only departure we shall make from medical ethics in the conduct of Peruna affairs in the future, is the fact that we shall continue to advertise and sell our product TO THE PEOPLE.

If we would agree to sell to doctors only, to advertise for doctors only, then the medical fraternity would be obliged to recognize Peruna as being

entirely within their approval. BUT WE SHALL NOT DO THIS.

We shall continue to offer Peruna to the people. We shall continue to convey to the people our claims for Peruna as a household remedy. We shall continue to supply the people with free literature, teaching them how to use our medicine, teaching them how to avoid disease, teaching them many things of benefit to the home. We shall continue to do this, whether the medical profession like it or not.

We are proposing from this time on to take the public into our confidence. Notwithstanding that some imitators and substitutors will be attempting to put up something which they consider just as good as Peruna, we are going to draw aside the veil of secreey and allow any one who chooses to know exactly OF WHAT PERUNA IS COMPOSED.

This ought to disarm all honest criticism. We expect, however, that criticism will continue. On some pretext or other those who are envious of the

We will not do this without your

written request, without your entire consent. Peruna has cured thousands of people of chronic catarrh, in many phases and locations. At least, that is what the people say to us, through unsolicited testimonials. Peruna will cure many thousand more, in spite of fabricated

We are determined to beat our opponents by being fairer than they are, by dealing squarer than they dare to. We are determined to meet falsehood with truth, duplicity with candor, insincerity with sincerity.

We know that the users of Peruna will appreciate our stand. We believe that the dealers in Peruna will applaud our course. We expect even our opponents will be obliged to acknowledge finally that Peruna is not only an onest and useful remedy, but one of the GREATEST HOUSEHOLD MEDI CINES ON THE CONTINENT.

The problem of keeping sweet all the atensils used in connection with milk and cream selling, and butt'r making, has been a serious one with the farmer. He has come to realise fully that the slightest taint or hint of staleness left in a can, tin or churn may ruin a whole output; that the taint which is left is in the form of bacteria which grow and disastrous results.
