The Good Time Coming.
There's a good time coming, boys.
A good time coming;
We may not live to see the day
When the world shall be
Of the good time coming.
Cannon balls may aid the struggle,
But though's a weapon stronger;
We'll win our battle by its aid—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
The pen shall suppress the sword,
And Right, not Might, shall be the lord
In the good time coming.
Worth, not Birth, shall rule mankind,
And be acknowledged stronger;
The proper impulse has been given—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
War in all men's eyes shall be
A monster of iniquity.
In the good time coming,
Nations shall not quarrel then,
To prove which is the stronger;
Nor slaughter men for glory's sake—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
Hateful rivalries of creed
Shall not make their martyrs bleed
In the good time coming.
Religion shall be shorn of pride,
And flourish all the stronger;
And Charity shall trim her lamp—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
And a poor man's family
Shall not be his misery
In the good time coming.
Every child shall be a help
To make his right arm stronger;
The happier he the more he has—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
Little children shall not toil
Under, or above, the soil
In the good time coming.
But shall play in healthful fields
Till limbs and mind grow stronger;
And every one shall read and write—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
The people shall be temperate,
And shall love instead of hate,
In the good time coming.
They shall use, and not abuse,
And make all virtue stronger—
The reformation has begun—
Wait a little longer.

There's a good time coming, boys.
A good time coming;
Let us aid it all we can.
Every woman, every man,
In the good time coming.
Smallest helps, if rightly given,
Make the impulse stronger—
'Twill be strong enough one day—
Wait a little longer.
—Charles Mackay.

GUNS THAT MAKE NO NOISE.

May Make Assassination a Much Safer Crime to Engage In.
With the modern high-powered rifle great battles not only can be, but have been fought without the two armies engaged getting more than occasional glimpses of each other. Now comes Hiram Percy Maxim and patents a "muffler" for the high-powered rifle. It will, he says, make the gun "comparatively noiseless," and he gently describes how easy it will be for skirmishers armed with such weapons to work along an enemy's outposts and shoot the pickets without alarming the main force or revealing their own position, says the New York Times.

War has already ceased to be a spectacle, and hereafter, apparently, it is to become as dull for the ear as for the eye. A silent gun, however, is a rather alarming thing to contemplate. Not since bows and arrows went out of fashionable use elsewhere than at an occasional lawn party has there been an engine that would kill at a distance without attracting the attention of everybody in the neighborhood, and, while this fact has not prevented all homicide by any means, it is yet a decidedly restraining influence on the less formal kinds, and in the days when murder was fairly certain to be punished by death the noise made in committing his crime brought many a murderer to the gallows.

One can easily imagine the interest with which the accounts of Mr. Maxim's invention will be read in Breathitt County, Kentucky. There the report will make assassination as safe as it is popular. There will be many other demands for the new weapon, but none of them that we can think of at the moment entirely innocent.

Wasp's Jaws Make Colony's Nest.

Wasps readily succumb before the increasing cold of autumn. The few that escape the merciless scourge of mortality are the queens of next season. They pass the winter in some warm cranny, and when the spring arrives each comes forth from its hiding place and seeks a suitable place for the nest that is to be. This found, the queen repairs to a fence or tree trunk and with her jaw rasps off a bundle of wood fiber which when moistened with saliva and kneaded forms the paperlike substance of which the nest is entirely constructed.

Just as bees have invented a peculiar nest building material in wax, so wasps have prepared a special durable paper for the same purpose. The queen mother lays the foundations of the city with her own jaws. She attaches a sort of stalk of wood paper to a chosen support. This may be the branch of a tree, a root in a cavity below ground or a beam in a garden shed. The stalk prepared, the queen builds a few shallow cells, in each of which she lays an egg. As these mature, hatch and develop into worker wasps the labor of the little colony is turned over to them, and thus a vast nest with thousands of cells is evolved.—Chicago Tribune.

THE HARD PART.

"How is your son getting on in his new position?"
"First rate!" answered Farmer Dobbs. "He knows more about the business now than his employer does. All he has to do now is to convince his employer!"—London Express.

And it is a good plan to cultivate the habit of getting your money's worth.

LESE MAJESTE IN ENGLAND.

Using Stamp Upside Down is Punishable.
Many people blissfully imagine that lese majeste—that is, insulting royalty—is a crime peculiar to foreign countries and unknown in free and happy Britain. That, however, is where they make a mistake, says Pearson's Weekly.

There are all sorts of pains and penalties on the statute book relative to peculiar British forms of lese majeste. Many of them have fallen into oblivion or abeyance owing to one cause or another, but they could still be enforced if those in high places claimed all they are strictly entitled to do.

It is, for instance, technically a punishable offense to stick a penny stamp on a letter upside down. Doing so is to insult the King through his effigy, and a few centuries ago—supposing penny stamps to have been then invented—might easily have landed the offender in prison on a charge of seeking to bring ridicule on the sovereign, or to express contempt for it, or authoritatively by causing his picture to stand on its head.

Also it is a punishable offense to deface a coin of the realm bearing the royal image and then deliberately put it into circulation again.

Any private individual who audaciously hoisted the royal standard over his dwelling would get into serious trouble. He would be peremptorily ordered to take it down and abjectly apologize, and if he escaped a heavy fine would have to thank his majesty's forbearance for his good luck. The royal standard is the emblem of the King's regal authority, to be displayed only where he is personally present, and for a subject to hoist it is nominally equivalent to high treason. The union jack, as the flag of the nation, is a different thing altogether, and can be displayed by anybody.

It is popularly supposed that in this country a man can get up and say whatever he likes about the sovereign with impunity. This is true only within strictly defined limits. A Socialist orator can publicly denounce the theoretical evils of monarchical institutions and announce a decided preference for a republic, and nobody can touch him. But if he once began to speak insultingly or slightly of the King personally he would be at once "run in" or at least effectually suppressed by the nearest policeman.

To strike the King would, according to the strict letter of the law, render the assailant liable to the death penalty no matter how trifling the blow was in reality.

Lieut. Pape, who is usually reckoned among those who attempted the life of the late Queen Victoria, could not have actually contemplated murder. He had no lethal weapon in his possession at the time of the outrage, but he struck her majesty across the face with his walking stick. This was sufficient to bring him within the shadow of the scaffold. He was condemned to death and would have been hanged had his sentence not been commuted.

Apart from direct methods of committing lese majeste in England—and the foregoing does not by any means exhaust the list—the English subjects can be guilty of the offense in a more roundabout way.

It is lese majeste to bring the King's uniform into contempt. Members of theatrical companies who have appeared on the stage as comic characters attired in discarded military or naval uniforms have occasionally been unpleasantly reminded of this fact. Careful stage managers put themselves on the safe side by seeing that no uniform, whether to be worn by the hero, villain or low comedian of the piece, is an exact copy of the real uniform of any branch of his majesty's forces.

SOCIETY ENTERTAINED IN HUT.

Woman of Wealth Seeks Health in a Mountain Shack.
The veriest cottage by the wayside may conceal treasures and the humblest shelter prove a palace, says the Denver Times. Costly hangings, delicate draperies, tinkling windbells, rare books and beautiful pictures have transformed the little tenement of Mrs. Josephine Tabour, woman of wealth, prominent writer and well known in New York society, and made life not only bearable but pleasant for her during her enforced sojourn in this land of sunshine for the benefit of her health.

A mile south of Englewood, back from the road, a little tent with a rough unpainted two-room addition stands, giving no hint from the outside of the beauties contained within. To the west is the long unbroken line of mountains with nothing between to obscure the view.

In the front room of the little house one could be entertained for hours by the curious and rare decorations. In various places are photographs of celebrities with international reputations. One stands on a genuine ceremonial rug, woven and used by the Navajo Indians thirty years ago, to examine a doeklin hanging on the wall which was killed on Thunder mountain years ago by a member of Mrs. Tabour's family, who was the first white man to ascend the peak. All the while little Chinese windbells are tinkling out their sweet music. Among Mrs. Tabour's most cherished possessions is an old book, yellow with age, "A Treatise on Religion," published in England in 1883.

"Like the Chinese, I celebrated New Year's this year on the day I wanted, and so a few days ago I had a little reception. We called it that, although there were only about a dozen here. Fort Logan and Denver people. We had such a good time. That's what makes life worth living any place. If I hadn't had friends out here I couldn't have stood it. As it is I never got lonesome."

The Hard Part.

GRA-SSE AND CLOVER.

Possibilities of Successful Growth in Idaho.
H. T. French, Director Idaho Experiment Station, Moscow, Idaho.

Much interest is being manifested in the possibility of growing grasses and clovers in the section about Moscow and other parts of Northern Idaho. This matter is of special interest at this time, for many new settlers are coming into this state from the older states, where these crops constitute a very important part of farm production.

Our experience extends over several seasons and we thought it might be of profit to some to know what is being done in this direction on the experimental station farm.

We have undertaken to establish a seedling of clover and grasses on a portion of the farm and herewith give a brief account of the results of our work during the past season.

Last April we plowed up ten acres of land on which wheat was grown the year before, and fitted it for the seed by harrowing twice with a fine toothed smoothing harrow. We then sowed broadcast the following mixture, covering six acres, leaving the balance until later, on account of the ground being in a lower portion of the field and too wet to sow.

40 pounds common red clover,
5 pounds Alsike clover,
20 pounds orchard grass,
5 pounds meadow fescue,
5 pounds Kentucky blue grass,
10 pounds timothy,
4 pounds tall meadow oat grass.

This made 100 pounds of the mixture per acre. The balance of the field was sown to the same combination, at the same rate per acre, except eight pounds of alfalfa seed was added to the mixture in place of the alsike clover and timothy seed.

No nurse crop was sown with the grass mixture. And here is where many farmers make a mistake, by sowing wheat, oats or barley with the grass or clover. It is the experience of the best farmers now that it is not wise to sow a crop of grain with the seeding. The more rapidly growing grain crop takes the moisture away from the tender grass, and clover plants, and when the grain is out the hot sun burns the tender plants up. The wild oat which is so abundant in the soil of this locality is quite enough of a nurse crop, and its attention should be given to cutting this out of the way when it reaches the proper stage. We cut two crops of wild oats from our field. The first crop made a fair yield of hay. In cutting the wild oats the mowing machine should be set high enough so that it will not cut the clover or young grass.

The last of November, when the yield was last examined, there was a fine stand of clover and of all the grasses sown, so far as we were able to detect them. Much of the clover headed out last season making a growth one foot high or more.

Unless last season was an exceptionally favorable one there is no reason why clovers and grasses should not be grown in the hill lands in this section.

The yield of wheat will not be less when the farmers learn to grow these crops which restore fertility, and the possibilities of diversified farming, with stock as an important factor, will be greatly strengthened.

GRA-SSE AND CLOVER.

Washington Professor Makes Study of Each Region.
By J. L. Ashlock, Washington State College, Pullman.

During the past year numerous inquiries have come to the State college department of horticulture asking questions which generally can be summed up in the one question: "What kinds of fruit will do best where I live?" This class of queries has given the staff of the state experiment station considerable trouble, since, as stated by Professor Thorber, head of the department of horticulture, unless the staff members know exactly the climatic and soil conditions of the region from which the question came, erroneous information may be given, leading the seeker for information to plant trees not at all adapted to his region.

"Now we have solved the problem," said Professor Thorber, recently. "During the last year we have made a careful survey of the state with reference to the particular varieties of fruits which are adapted to each region. We have classified the lists into 'Western Washington,' 'Inland Valleys,' and 'Upland Valleys.' In this list is included apple, pears, cherries, peaches, apricots, plums, raspberries, prunes, blackberries, gooseberries, currants, strawberries and nuts. Early, medium early and late varieties are given where it is necessary. We submit these lists to all inquirers now, and from a dozen or so good varieties of apples, pears, etc., he may choose as he likes, according to the adaptability of the fruit for his region.

"Another experiment we have in hand is one in which we have selected sixty-five good varieties of apples from the eight hundred or so varieties in the state experiment station orchard, and are sending two varieties of each of the sixty-five varieties to ten farmers or horticulturists of Washington. We wish to determine by this experiment how each variety will do in the particular region in which it is tried, and in this way we hope to collect much valuable data concerning the possibilities for new varieties of apples in this region."

Potato Soup.
Brown one-half cup of butter and two large onions (chopped) together until well done. Slice one pint of potatoes and add to the onions and butter. Add enough water to cover and cook until the potatoes are soft. Season to taste with salt and pepper, and last of all, add about a cupful of rich cream. Serve very hot.

STIFF AT IT.
From hymns that tell of marital doeds
Some folks would try to wear us
Which will recall to you and all
The mollycoddle genus.
—Cleveland.

Cabbage Salad.
One head of cabbage chopped fine, two cups of vinegar, one cup of sugar, one cup of water, one tablespoonful of mustard, two eggs; place this on the stove and let it come almost to a boil, then pour over the cabbage, add a little salt and pepper, and mix well together.

All papers left on the trains of the Belgian State railways are appropriated by the government and are utilized in the manufacture of card for tickets.

We Trust Doctors

If you are suffering from impure blood, thin blood, debility, nervousness, exhaustion, you should begin at once with Ayer's Sarsaparilla, the Sarsaparilla you have known all your life. Your doctor knows it, too. Ask him about it.

You must look well after the condition of your blood, and if you find it impure, or thin, or otherwise diseased, you should begin at once with Ayer's Sarsaparilla. It is the only medicine that will purify the blood, and it is the only one that will not injure the system.

Made by J. C. Ayer & Co., Lowell, Mass.

HOTEL MOORE

OPEN ALL THE YEAR
CLATSOP BEACH SEASIDE OREGON

Directly on the beach overlooking the ocean. Hot salt baths and electric light. Fine walk to the Cliff House pier for fishing. For new parties, Electric Light, Fire, and other amusements. Rates, \$2.50 and \$3.00 per day. Special rates by the week. DAN J. MOORE, Proprietor.

Entirely Superb.
"A word to the wise is sufficient," remarked the man with the quotation habit.
"Wrong again," rejoined the contrary person. "A word to the wise is unnecessary."

In the Long Ago.
Cardinal Wolsey had fallen.
"I was trying to dodge an automobile," he explained, "and a roller skater ran into me."
The historians, however, with singular obtuseness, have persisted in placing the blame on Henry VIII.—Chicago Tribune.

\$100 Reward, \$100.
The readers of this paper will be pleased to learn that at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh is a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is a powerful, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving it a permanent strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Take HALL'S CATARRH CURE, Toledo, O., Sold by all druggists.
Take HALL'S Family Pills for constipation.

When Mrs. Carrie became she didn't quite forget:
She took her low, sweet voice along, and has it even yet.
But if hubby's just a little slow to answer to her call
She can jar him with a yodel that cracks the paper on the wall.
—Chicago Tribune.

For Infants and Children.
The Kind You Have Always Bought
Bears the Signature of *Dr. J. C. Watson*

Out of the Dim Past.
Samuel Woodworth had just written "The Old Oaken Bucket."
"Nothing in it," he muttered as he read it over and reflected upon the probable price it would bring.
But posterity evidently found something in it.
The proposed Henry Hudson memorial bridge will be the largest span of concrete or stone in the world. It will be 703 feet in the clear. There are some larger spans of metal.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Uncle Allen.
"Some men," muttered Uncle Allen Sparks after the fireman speaker had sat down, "remind me of an old water mill that's running with empty hoppers. Their wheels keep on going, but they don't turn out any grit."

Lightning in South Africa.
In South Africa, where thunderstorms are terrific, lightning often strikes the beds of ironstone, and blue flames, sometimes firing buildings, are alleged to play about such ironstone outcroppings two or three hours after a storm.

FITS
St. Vincent's Dance and all Nervous Diseases permanently cured by Dr. King's Great Peppermint Cure. Price 25c per bottle and 50c per dozen. Dr. R. H. King, Ltd., 211 Arch St., Philadelphia.

A Sorcerer.
Teacher—Freddy Fangle, you may give the German name of the river Danube.
Freddy—Danube.
Teacher—Donna! That is right. I am glad you have studied your lesson so well.
Freddy is surprised, but keeps still.

Closing the Incident.
The famous ball player was looking through the sporting columns of the newspapers.
"I see they've quit mentioning me," he said. "I may as well quit."
Upon doing which he secured one more mention in the newspapers.

Syrup of Figs and Elixir of Senna

acts gently yet promptly on the bowels, cleanses the system effectually, assists one in overcoming habitual constipation permanently. To get its beneficial effects buy the genuine.

HAD CATARRH THIRTY YEARS.

Congressman Meekison Gives Praise To Pe-ru-na For His Relief From Catarrh.

Old tin is put to a variety of uses. For instance, cheap trunks are covered with tin from discarded tin cans and other utensils, the tin having been first cut to desired size and straightened and smoothed out. There are also concerns in different parts of the country which make a business of removing the tin coating from old tin cans and scrap tin.

For the Housewife.
Some active women who pride themselves in housekeeping seem to forget that the object of keeping house is that human beings may be accommodated in it. Their sole idea seems to be that the house may be kept in a certain form and order; and to the performance of the form and order they sacrifice the comfort the house was established to secure.

Woman Railway Workers.
In the South of France one may see, at the little wayside stations, women attending to the signals of the half dozen daily trains; while the companies regularly economize at the level crossings by employing female labor. The husband can be seen at work at his vines upon the hillside, while the wife waves the green flag and keeps the children quiet.—Detroit News-Tribune.

General Debility

Day in and day out there is that feeling of weakness that makes a burden of itself. Food does not strengthen. Sleep does not refresh. It is hard to do, hard to bear, what should be easy—vitality is on the ebb, and the whole system suffers.

Hood's Sarsaparilla
It vitalizes the blood and gives vigor and tone to all the organs and functions.

In usual liquid form or in chocolate tablets known as Sarsatabs, 100 doses \$1.

Telephone Girl's Romance.
Conscientious Carrie always tried to do her best.
Never lost her temper—she was different from the rest;
Carrie was a "central," with a voice of sweetest tone,
And that is why Miss Carrie has a cottage of her own.
—Portland Oregonian.

CONGRESSMAN MEEKISON RECOMMENDS PE-RU-NA

"I have used several bottles of Peru-na and I feel greatly benefited thereby from my catarrh of the head. I feel encouraged to believe that if I use it a short time longer I will be fully able to eradicate the disease of thirty years' standing."—David Meekison.

OTHER REMARKABLE CURES

Mr. Jacob L. Davis, Galena, Stone county, Mo., writes: "I have been in bad health for thirty seven years, and after taking twelve bottles of your Peru-na I am cured." Mr. C. N. Peterson, 132 South Main St., Council Bluffs, Iowa, writes: "I cannot tell you how much good Peru-na has done me. Constant confinement in my store began to tell on my health, and I felt that I was gradually breaking down. I tried several remedies, but obtained no permanent relief until I took Peru-na. I felt better immediately, and five bottles restored me to complete health."

A SINCERE RECOMMENDATION.

Mr. D. C. Prosser, Bravo, Allegan Co., Mich., writes: "Two years ago I was badly afflicted with catarrh of the stomach. I had had a run of typhoid fever, was very depleted. I could find nothing I could eat without causing distress and sour stomach. Finally I came to the conclusion that I had catarrh of the stomach, and seeing Peru-na advertised, began to take it. It helped me soon, and after taking three or four bottles I was entirely cured of stomach trouble, and can now eat anything."

W. L. DOUGLAS SHOES

\$300 SHOES \$350
SHOES AT ALL PRICES FOR EVERY MEMBER OF THE FAMILY.
MEN, BOYS, WOMEN, MISSES AND CHILDREN.
W. L. Douglas makes and sells more men's \$2.00 to \$3.50 shoes than any other manufacturer in the world, because they hold their shape, fit better, wear longer, and are of greater value than any other shoes in the world to-day.

S.S.S. FOR BAD BLOOD

The most important part of the human system is the blood. Every muscle, nerve, tissue, bone and sinew is dependent on this vital fluid for nourishment and strength necessary to maintain them in health and enable each to perform the different duties nature requires. Even the heart, the very "engine" of life, receives its vigor and motive power from the blood. Since so much is dependent on this vital fluid it can very readily be seen how necessary it is to have it pure and uncontaminated if we would enjoy the blessing of good health. Bad blood is responsible for most of the ailments of mankind; when from any cause it becomes infected with impurities, humors or poisons, disease in some form is sure to follow. Muddy, sallow complexions, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores or ulcers, which break out on the flesh, often from a very insignificant bruise or even scratch or abrasion. If the blood was pure and healthy the place would heal at once, but being loaded with impurities, which are discharged into the wound, irritation and inflammation are set up and the sore continues. Bad blood is also responsible for Anemia, Boils, Malaria, etc.; the weak, polluted circulation cannot furnish the nourishment and strength required to sustain the body, and a general run-down condition of health results. S. S. S. is nature's blood purifier and tonic; made entirely of healing, cleansing roots and herbs. It goes down into the circulation and removes every particle of impurity humor or poison that may be there, restores lost vitality, and steadily tones up the entire system. It adds to the blood the healthful properties it is in need of, and in every way assists in the cure of disease. S. S. S. neutralizes any excess of acid in the blood, making it fresh and pure, and permanently cures Eczema, Acne, Tetter, and all other skin diseases and eruptions. S. S. S. cures Rheumatism, Catarrh, Sores and Ulcers, Malaria, and all other diseases or disorders arising from bad blood. Book on the blood and any medical advice desired free to all who write.

There is Only One "Bromo Quinine" That is Laxative Bromo Quinine USED THE WORLD OVER TO CURE A COLIC IN ONE DAY.

Always remember the full name. Look for this signature on every box. 25c.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask dealer, or we will send post paid at 10c a package. Write for "ten books" how to dye, wash and care of dyes.
