 Copper, 39.

Goldbeaters' Skin.
 Goldbeaters' skin is prepared from the outside membrane of the large intestine of the ox. It is said that goldbeaters first tried paper for inclosing the metal, and mulberry fiber paper is still used in China and Japan, but animal parchment has been mostly employed for two or three centuries at least. While a thinner leaf can be beaten out between paper parchment sheets, it is damaged by adhesion. A special German paper is coated with isinglass or albumen, and paper parchment of some kind is much used in the first stages, but goldbeaters finish their product between goldbeaters' skins, still pounding an ounce of gold into 200 square inches of leaf.

Early Precept.
 Kind Lady—How'd you learn to pick pockets? Pickpocket—By watchin' me mother fishin' fer change in th' old man's trousers.—Albany Kalkreuth's Press.

ROUMANIAN CITY OF NANESTI TAKEN

Berlin, via Sayville, Jan. 20.—Capture of the Roumanian city of Nanesti, on the river Sereth yesterday by storm in hand-to-hand fighting, was announced in today's official statement.
 The capture was made, it is stated, despite a heavy snow storm and poor light, which impeded activity of the German artillery.
 Capture of 400 prisoners from Roumanian forces that repeated desperate assaults on German positions north of the Susita valley was also announced.
 In addition to these losses by capture, the Roumanians left several hundred dead before the German positions.

SWISS RESERVISTS ARE ORDERED HOME

Washington, Jan. 20.—Swiss Minister Ritter, acting on instructions from his home government, today issued orders, through Swiss consuls in America, that all reservists on conditional leave are ordered home immediately.
 At the same time, Minister Ritter was ordered to issue these instructions, he received notification that three additional Swiss army corps are to be mobilized on Jan. 24.
 Dr. Ritter said today his government's dispatch declared Switzerland had no fear of any hostile move by either group of belligerents. The new troops, he believed, are to be used to relieve part of the two army corps now mobilized, it was said.
 London reports have recently mentioned massing of large German forces on the Swiss frontier, and fear was expressed that Switzerland's neutrality might be violated.

Every brave man is a man of his word.—Cornell

PERSHING READY TO QUIT MEXICO

Washington, Jan. 20.—Announcement of orders for General Pershing's withdrawal from Mexico may be expected at almost any time, war department officials suggested today. The preliminaries of such withdrawal are already staged.
 General Pershing is ready to move his entire force northward. This will be done gradually, it was said.
 When Pershing retrains his men will be distributed along the border. That this will be sufficient to guard the border, with other valuable regulars, is the military view.

CARPENTER MAY BE LOVE PIRATE

Tacoma, Jan. 20.—In the county jail here today charged with perjury as a result of his testimony in a damage suit, Fred E. Carpenter, 57, bids fair to rival the matrimonial achievements of Charles Wax, of "Oliver Osborne" fame, according to the prosecuting attorneys of the court.
 Carpenter was arrested yesterday in a corridor of the court house. His bail was fixed at \$3,000 which he was unable to furnish.
 Carpenter's arrest was largely due to the testimony of Mrs. Mary G. Creamer, his last wife of the seven he is alleged to have acquired during a long career. He testified he had been married only twice and that both of his wives were dead; that his name was Ernest E. Carpenter; that he had never been arrested before.
 Mrs. Creamer appeared on the witness stand very much alive and declared she had him arrested for non-support and that he had served a term in the county jail after conviction on that charge.
 Mrs. Mary Kistler, who divorced him prior to his marriage to Mrs. Creamer, was also subpoenaed. She, too, appeared in living form, but was

not called to the stand.
 Carpenter testified that he was born in Milwaukee. It is said by a former wife, however, that he was born in Germany and that his real name is Fritz Zimmerman.

MURPHY

Mrs. J. W. Gilmore received the sad news that her son who lives in Missouri had been killed by an accident while working in a brick yard.
 L. W. Carson attended the K. P. banquet in Grants Pass Monday night. The boys and girls basket ball teams played at Applegate Saturday night. The games ended in favor of Murphy girls and Applegate boys.
 Letters from the Sweeney's at Salem report them as very pleasantly located near the state house and that they are enjoying themselves very much.
 The work done on the Murphy road last fall has certainly kept it in fine shape and is a big improvement over previous winters when all were in danger of breaking their neck bouncing over chuck holes to say nothing of the wear and tear of their tempers. When the work is finished to the river we will have a road equal to the Crescent City road.
 A. H. Carson has completed the deal whereby D. E. Wright of Edgar, Neb., takes possession of the Geo. Baer ranch at Hugo. The consideration was \$3,000. Mr. Carson is showing a gentleman from Ft. Collins, Colo., over the valley with a view of locating him here.
 Sugar beet planting is the topic of general interest here and nearly all of those who planted them last season will increase their acreage this year.

CANADIAN WOMEN IN MUNITION PLANT

Ottawa, Canada, Jan. 20.—Canadian women are working in munition factories. There are 5,000 women workers, according to estimates compiled today, who are helping make the shells which England and her allies and dominions are hurling against the German lines. And today—comes the "romper suit" for women. That is "rompers," like children wear, is the article of clothing that most nearly approaches the style of a garment which Canadian manufacturers are preparing for their women employes. Canada bars the overalls, which sister workwomen are wearing in England. The designers of the new habit think it will not only be popular in the machine shop and fuse room, but in the kitchen as well.
 When Mark Irish, director of labor of the Imperial munitions board, first broached the possibility of having women work in munitions factories, Canadian shellmakers declared it was "impossible," because they could not be found.
 "Why God bless 'em," Director Irish replied, "we are deluged with them and I'm asking women on the waiting list not to get discouraged."
 The Canadian plan is a dilution of labor—not replacement of women for men in plants, but introduction of feminine workers so that male labor can be spread over a greater time and a greater number of machines.
 Four hundred women entered the factories at first. Some of these, of the leisure class, found their French heels did not fit in with making munitions and they dropped out. Some did not like the grime and dirt. But forty of the original number stuck. Then Canadian women awoke to the necessity for munitions and real and earnest workers started to pour in applications. Most of these have stuck right on the job. They have been careful, efficient, steady, reliable and, in many cases, better at work requiring delicate workmanship than men. No heavy labor is attempted. The chief work which the woman do is on primers, time fuses, in assembling, inspecting, sorting and packing. On some of these operations measurements to the thousandth part of an inch are required.
 The women are paid from \$10 to \$22 a week—just as much as male workers in similar places. The plants where they work are airy and well lighted. In some places the Y. W. C. A. and W. C. T. U. and other organizations have started buffets where meals served at reasonable prices.

Written is the main nutritive element in all flour made from grain, though it exists in larger proportion in some varieties of wheat than in others, and in hard wheat more than in soft. Gluten flour is flour from which the starch element has been wholly or partly removed, thereby bettering it for the use of diabetic patients.

Start the Year with The Electric Servant

It has solved the "help problem" in hundreds of families.
 It renders silent, efficient, flexible service.
 It does not talk, complain of long hours, has no callers.
 Works Sundays, holidays and week days; will do
 WASHING, COOKING, HEATING
 DUSTING AND IRONING
 It is at home, willing to work in kitchen or parlor.
 In city residence or country ranch house.
 In no other place in the world is electric service so thoroughly developed and so generally used as in the Pacific Coast States.
 Why not try doing your work in 1917 the Electric Way?
