ENGLISH PRAISE PRES. WILSON'S WAR SPEECH

By Lord Northcliffe (Written by the United Press) London, April 4.—I have taken a few hours to collect opinions of members of both houses of parliament and many of the general public.

Experts in statesmanship regard the president's speech as likely to rank with the most notable utterances of Washington and Lincoln. Its dignity, restraint and insight are considered absolutely worthy of the chief of a hundred million of the republic's citizens at this tremendous moment. The joining with the allies by the United States is especially welcomed by Englishmen who are fighting side by side with the heroic French. We regard the coming in of Uncle Sam as the help of another big brother in France's fight against the Prussian bully. We will be able to take care of our own part of the war on land, on sea, in munitions plants and in the treasury, but the territories of France and Belgium have been chosen by the Hohenzollerns as their battle ground for the conquest of the world and it is fitting that we of the free English speaking nations—Americans, British, Canadians, Australians, New Zealanders, South Africans—should combine with Russia and with Italy to rid the world of kaiserism—just as the Russian people united against the domination of the czar. The intervention of the United States is the greatest event in the history of the war since August, 1914.

And it's all just the same today as when I bought it several years ago."
