Chester, Pa., April 27.—Indications that the Eddystone munitions plant disaster may have been caused by Russian plotters came to light today at the coroner's inquest into the deaths of 102 victims of the explosion.  
Federal authorities are searching for a Russian government inspector known as Waskoff, who sent a message saying "explosion occurred today, our crowd safe," to a radical Russia newspaper in New York immediately after the blast. Walter Durman, Russian, who, witnesses say, was the man that urged a rebellion in the city, has vanished.
