SWEDEN RESENTFUL OVER SHIPS LOST

Stockholm, May 22.—Growing popular and official resentment against Germany, due to recent losses of Swedish ships by submarines was intensified today by announcement that the steamers Lizzie, Goets and Kaell had been captured en route between Sweden and Finland. Presumably the German vessels which made the captures took the ships into port, but their disposition was not related.

Sweden, Norway and Denmark have recently suffered heavy losses through U boats. A statement received from Denmark semi-official sources detailed resentment there because of this campaign and declared that since the start of the war 150 Danish ships had been lost through submarines or mines, with 210 seamen lost. Of this 210, two hundred were said to have perished in last three months—since inauguration of German unrestricted submarine warfare.

GERMAN PAPER PREDICTS RUSSIA WILL MAKE PEACE

Copenhagen, May 22.—Prediction that Russia would soon accept a separate peace with Germany, was made by the Berlin Vossische Zeitung editorially today. Text of the article received here urges that Germany state as clearly as possible her own peace conditions and offer Russia financial help after the war.

\$200,000.000 LOAN.

British Ambassador, to Whom Government Handed Check.

Photo by American Press Association

The first loan of the United States to the allies was made when our government turned over \$200,000,000 to the British. Ambassador Cecil Spring-Rice of Great Britain received a draft for the amount from Secretary of the Treasury McAdoo. The money will be used as the basis for credit in this country, where the allies are spending enormous amounts daily.

A TONIC
Of Blood-Root, Golden Seal, Stone and Queen's Root

Also Cherry Bark and Sacred Bark with glycerine makes a wonderful tonic, called "Golden Medical Discovery," making thousands of Oregon people strong. Ask your neighbors how they can tell you.

Corvallis, Oregon.—"Doctor Pierce's remedies have been used in my father's family ever since I can remember. My mother took the 'Golden Medical Discovery' and the 'Pleasant Pellets' and was cured. Father took the 'Discovery' for torpid liver and indigestion and was greatly benefited. I, also, took the 'Discovery' for kidney, liver and stomach trouble and received great benefit. I am glad to tell others of the merits of Dr. Pierce's Golden Medical Discovery.—D. H. DULL, 527 S. 5th Street.

Get good blood through the use of Dr. Pierce's Golden Medical Discovery, and you will have no more weakness. It is the world's proved blood purifier and tonic. It's not a secret remedy for its ingredients are printed on the wrapper. For sale by druggists in liquid or tablets. Start to take it to-day and before another day has passed the impurities of the blood will begin to leave your body through the liver, kidneys, bowels and skin, and in a few days you will know by your steadier nerves, firmer step, keener mind, brighter eyes and clearer skin, that the bad blood is passing out and new, rich, pure blood is filling your arteries. Send Dr. Pierce, Buffalo, N. Y., ten cents for trial package.

Blind Points in Our Memory. "I don't remember" is a frequent answer from the witness box when the sudden question is put. And it is often a question such as any man might be expected to answer offhand. It would be a very intelligent jury that would understand the man who could not remember where he lunched every day. But there is probably not a jurymen on the lists who could not tell a story of his own sudden lapse of memory—when the name, the date of importance had come under the blinding point of the memory, just as the eye has that blind point which, as you turn the head and watch the dot on the paper, misses it and then regains it.—London Chronicle.

PORTLAND MARKETS

Portland, May 22.—Today's market quotations were:

Hens, 17; broilers, 17 @ 22;
geese, 11 @ 12.

AGRICULTURAL NOTES.

One-half to one pound of acid phosphate to every sixteen square yards of soil in addition to manure is often advisable for the home garden.
Crop yields may be increased sufficiently by the drainage in soils not naturally well drained to pay for the cost of tilling within a short time, according to the Ohio experiment station.
Potato seed is likely to rot before germinating because of cold wet soil if planted too early. Usually potatoes may be planted earliest on the lighter soils and at the lower elevations.
A common cause of poor results in vegetable gardening is too deep planting of the seeds. Germination will be much better in the spring when the plan of shallow planting is adopted.
A classified ad will give results.

MILK AS A FABRIC.

Chemistry Can Convert It Into Many Useful Materials.

Although any one will concede that man cannot live by bread alone, it has been thought possible to get along rather nicely if milk were added to the diet. But it remained for two French chemists, Francois Leblond and Raoul Desgeorge, to conceive an idea whereby milk may also be made to yield a fabric which may be converted into clothing and ornaments.
The curds of the milk are subjected to a chemical treatment by means of which the mass is converted into a plastic substance which may be rolled into sheets resembling celluloid, from which buttons and other articles such as combs, umbrella handles, bracelets and even imitation leather may be made, all of which are of attractive appearance and of excellent wearing qualities.
The milk is first robbed of its fat, after which it is warmed with rennet so as to form curds. It is then partitioned and exposed to the air and then treated with acetone to give it the required hardness, plasticity and transparency. The product may be made so soft that it can be used as a substitute for silk in the manufacture of fine underwear, or it may be made solid enough to serve as a good imitation of ivory.—Popular Science Monthly.

PRESERVING EGGS.
Water Glass Will Keep Them Fresh Six Months or Longer.
Eggs are much cheaper in the spring than they are later on in the year, and spring eggs can easily be kept over until the high price season by putting them down in water glass, which can be purchased at drug stores for about 25 cents a quart.
A quart of water glass mixed with twelve quarts of water that has been

boiled and then cooled will be sufficient to preserve about fifteen dozen eggs. A stronger solution should be used for eggs that are to be held six to eight months or longer.
Stir the water glass and water mixture until thoroughly mixed. Use a stone jar that has been thoroughly cleaned. The eggs should also be cleaned. Cover the bottom of the jar with eggs stood up on end, the small end down. Pack the eggs so they will cover the bottom. The eggs can all be packed at one time, one layer upon another, or the packing can be done from time to time. Pour in the mixture so the top layer of eggs will be covered fully two inches. A thin coating of paraffin poured over the top of the water glass mixture when the jar is filled will prevent evaporation; otherwise the mixture will require replacing as often as evaporation makes it necessary. Store the jar in a cool cellar.—New York Sun.

How Kaffir Smoke.
The natives of South Africa are inveterate smokers, but some of them indulge in the habit in a distinctly queer fashion. The natives of Harrismith, in the Orange River Colony, smoke in the following novel manner: A "pipe" is made by thrusting two sticks into the ground so as to meet at an angle; when they are withdrawn two tunnels are left behind. A hollow reed is stuck in one hole and the tobacco placed in the other and lighted. Before beginning operations the native fills his mouth with water, drawing in the smoke with a gurgling sound and blowing out the water and smoke through a second reed. It seems a mighty poor way of smoking to a white man, says a writer in the Wide World Magazine, but the Kaffirs are very fond of it.

The Sergeant's Threat.
Answering for absent comrades during roll call is quite usual with soldiers. Sergeants know themselves to be tricked in this fashion very often, but as detection of the culprits is almost impossible they have to content themselves with the use of a little threatening language toward their men. It was an Irish sergeant who recently delivered himself as follows when about to call the roll in a Dublin barracks:
"Now, mind ye, if I ketch any of ye sayin' yer here when yer not here ye'll go over there," pointing to the guard-room.—Atlanta Journal.

Varnish and Enamel.
Paints which dry with a high luster or gloss are called enamels. These are made from zinc oxide ground in varnish. Varnish is produced from fossil resins such as copal, kauri, etc. These resins, which originally flowed from trees, have been deposited for centuries in the earth. They are mined in Africa and New Zealand and are found in big lumps.—Popular Science Monthly.

Still Noisy.
"What's become of that noisy baby who used to live next door?" asked the visitor after an absence of fifteen years.
"That's it blowing that cornet," replied the afflicted house owner.—Youkers Statesman.
