## AN INTIMATE BATTLE-LINE VIEW WARMS ONE'S SYMPATHY FOR PLUCKY LITTLE FRANCE

With the British Armies in the Field, May 27.—(By mail)—If America could know France today most likely American young men would flock to her aid by hundreds on every trans-Atlantic boat. The pity of those scores of villages behind the lines entirely stripped of able men, with many of the women in deep mourning as they carry on the work of departing soldiers, would appeal more strongly to the pure American than miles of recruiting posters.

Hop into a military auto and go for a tour behind the fighting lines, over the ridges from which the wide landscape unrolls itself in its spring splendor. The ride will convince you that the young men of the United States have before them a duty that can't be shirked without dishonor.

The car draws up at a railroad barrier where stands an elderly soldier of France, disabled in the war and now on light duty. He passes the car and you roll into the main street. Here are women driving farm wagons, women herding sheep, women carrying burdens that would cause a strike of the moving-men's union back home. Children may be seen through the cottage doors, assuming the burdens of housework. Women and children, no men, except the disabled. It is the war.

Beyond the village your car mounts a ridge. Miles of field are under cultivation. Women are following the plow or lawking down the ridges with one arm swing as they scatter seed from a bag. Women

pass by on the road, leading farm horses.

That is a sample and typical of what is to be seen. The French are stoic but they do need American help to whale the Boche. Their disillusionment if America should fail would be hard to picture. Their faith is so great in America, the slayer republic which honors La Fayette.

This is the district behind the lines. Up forward, where the war took to trenches after the Boche retreat, there are scarcely any villages left. Civilian inhabitants are rare. One scene of peace has been found before a French city by the Germans. The British expect to take the place by the pressure of indirect movements, thus sparing the town from bombardment. If it is destroyed, then Tommy will have another score to settle with the Boche dynamiting squad.

Before the town is a flat field of more than a mile. Underfoot are patches of dandelions. It is quiet and peaceful as a May day in Iowa. Overhead an aeroplane drones like a lazy bee in its patrol along the sky. Suddenly a battery wakes up at a vague spot and the shells make dark spots against the haze on the German horizon. The Boche bestirs himself, evidently trying to find a British gun. His gun thumps far away, there is an interval and then the shuttle is heard gradually growing louder.

"Here comes one," says a Tommy. The shell drops a quarter of a mile away. "Dud," says Tommy. "Boche throws lots of duds."

Mules and Warm Springs. It is an interesting fact that the mule is not mentioned in the Bible until the time of David, just at the time when the Israelites were becoming well acquainted with horses. The Hebrew word in Genesis xxxvi, 24, translated as mules in the authorized version, is believed to have been a blunder and that the term should have been as the Vulgate has it, "warm springs."
