MERLIN BOY PROVES ARREST WAS MISTAKE

On a telegraphic instruction from Clarence Reames, U. S. district attorney, Sheriff Lewis last night liberated Leonard Kerlinger, of Merlin, who had been detained since last Sunday on a charge of being of registration age and having failed to register.

The boy proved to the satisfaction of Mr. Reames that he was only 20 years of age. The family Bible record was backed up by the records in the office of the county superintendent of schools for eight years back, all of which showed young Kerlinger to be only 20 years of age.

SIXTY PER CENT LIBERTY LOAN HAS BEEN PAID

Washington, July 26.—Although only 20 per cent of the loan was required on that date, more than 60 per cent of the Liberty loan was paid in on June 30, the treasury department announced late Monday. The total was \$1,385,024,458.

Fortunes in Picture Frames.

The finest and costliest frame ever made for a picture is that which encloses the "Virgin and Child" in Milan cathedral. It is made of hammered gold, with an inner molding of lapis lazuli. The corners of this valuable frame have hearts designed in large pearls and precious stones. Some idea of its value may be gained when it is stated that the frame is eight feet long and six feet wide. Its estimated worth is \$125,000. One of the pictures in the Vatican at Rome is in a frame studded with jewels. The picture is a valuable one, but the frame nearly equals the value of the painting.—London Telegraph.

Engraved calling cards—100 cards and plate, in script, \$1.50; if plate is furnished, 100 cards for \$1.

OREGON WILL HAVE LARGE POTATO CROP

Portland, July 26.—Oregon's potato output this year will exceed the 1916 yield by 10,000 cars, according to the estimates of dealers here today. Potatoes are one of the big items in food shipments, and the Oregon public service commission is urging farmers and dealers to ship their potatoes as early as possible so that transportation facilities may be released for other crops as soon as possible.

The commission has issued the following instruction to shippers:

"Do your shipping today, while cars are available. Store fuel and other crops ahead.

"Load and unload cars the day you receive them, regardless of the 48-hour free time limit permitted by our demurrage rules.

"Ask for cars only when certain of being ready to load.

"Give the railroad company immediate notice when car is released.

"Load cars to full capacity (10 per cent above the marked capacity.)

"Bear in mind freight cars are for the transportation of goods and are not freight warehouses, and while they are waiting for loading or unloading, from the standpoint of efficiency, they might as well be out of existence."

AMERICAN WIND JAMMER IS SUNK; CREW SAVED

London, July 26.—The American wind jammer Augustus Welt was sunk by submarines on July 21, according to an announcement made today by the admiralty.

—Except that the crew was saved, no details are available.

Dear Are Great Swimmers. If a boy were asked to name an animal that could swim a long way it is probable that he would think of almost any other animal before he named a deer.

If you told city folk that deer have been known to swim clear across the sound, from Long Island to Connecticut, they would probably laugh at you, yet boatmen along the coast know this to be true. Deer will often take to the sea when they are closely pursued by the hounds, and they have been known to stay in the water swimming until the dogs got tired and went away or until night fell and sheltered them.—New York Sun.

Easy to Talk But Hard to Walk

That is the experience of a great many people in this world—and there's a reason.

Some people buy shoes just because they are a cent or two below some other shoe in price. Of course they do not fit—they hurt the feet—and it is hard to walk in them.

When you buy a shoe from us you are not bothered with any of these discomforts—for we sell "easy walking" shoes.

Try the "easy way" next and come to us for them.

PORTLAND CHEMIST WARS ON FOOD WASTE

Portland, July 26.—A campaign to promote practical food economy is being conducted here today by City Chemist Callaway. After spending several weeks studying Portland's wasted food, Callaway now is urging that every housewife not only practice strict economy in preparing food, but also that she see to it that all scraps reach the poultryman or farmer. He has issued the following suggestions:

"Substitutes: Rye bread, oatmeal, cornmeal mush and cookies for bread.
"Eat more vegetables, fruit, fish, milk and dairy products and less bread and cake.
Provide a covered pail for all table scraps that may be fed to chickens or pigs. Through the garbage man this material will find its way into the market. All spoiled food, crab shells, fish bones, nut shells and non-edible scraps should be wrapped in paper and placed in the garbage can with the scraps and rubbish. But all feeding material should be kept separate for the use of poultrymen and hog feeders.
"In some sections of the city where chickens are kept the housewife and poultryman can strike a bargain that will be mutually advantageous.
"The scraps should be collected two or three times a week to insure good feeding.

Nervous Children.
In an article in the Woman's Home Companion on the care of children the writer says: "Nervousness sometimes is the result of some physical defect. Malnutrition, anaemia, defective eyesight, bad teeth or adenoids may be the predisposing cause. Nature offers the best cure. Plenty of nourishing food and wholesome outdoor life are essential, and these children should be encouraged to play and to take regular exercise, such as walking, rowing and swimming. Real country life is always the best, and camping is a cure in itself. First, for the outdoor life and healthful exercise and, second, because the nervous child needs the companionship of other children."

MOVIE MEN TO TAKE OREGON CAVE VIEWS

If it is the weird beauty and fame of Crater lake is not known in all parts of the United States, in fact all over the world, within the next year, it will not be the fault of the Balboa Amusement Producing Company of California.
E. A. Chinlund, expert cinematographer of the Balboa company, together with his assistants and an elaborate moving-picture-taking outfit, are preparing a big moving picture spectacle of Crater lake, which will include pictures of the lake and vicinity in the various seasons.
Incidental to the Crater lake pictures, Mr. Chinlund will make moving picture pictures of the Oregon caves, the lava beds in Klamath county, and some of the other striking scenery of southern Oregon.—Oregonian.
