—the "Hyatt Roller". This veteran Buick, official figures prove, has gone farther than any other automobile—261,800 miles, equal to ten times around the world. It is making a circuit of the U. S. A. still running on its original Hyatt Bearings.

When it arrives in
Grants Pass

This trip is showing motorists everywhere the wear and tear that Hyatt Roller Bearings can actually stand.

The original bearings are located at points of greatest strain. Eight years old, but having delivered thirty years of normal service, they are still on the job, still giving perfect Hyatt Service—quiet, self lubricating, self cleaning, requiring no adjustment from the driver.

The bearings in your Hyatt-equipped car are identical in quality with these. You can measure the satisfaction you

may expect from your Hyatts by their demonstrated record.

261,800 miles, the world's record for mileage—long drives over the roughest of country roads—winter drives through hub-deep snow, the abuse of livery and haulage service.

And now, sturdy indifference to the most strenuous conditions that cross-country driving or daily use can present.

Make sure your new car is equipped with Hyatt Quiet Bearings.
