SUGAR BEET HARVEST COMMENCES OCT. 15

The Utah-Idaho Sugar company has issued the following circular letter, which is being mailed today to beet growers of Josephine and Jackson counties:

October 9, 1917.

Dear Sir: You are hereby notified that the harvesting of sugar beets will begin next Monday, October 15.

As our entire crop will only amount to about a 30 days' run for the factory, we request you to be sure and harvest and load all your beets before November 15. This gives you 30 days in which to harvest your crop.

Owing to the serious world's shortage of sugar, our government is anxious that we save every beet possible and manufacture sugar therefrom. Please assist us in this important matter and see that there is no waste of beets on your place.

Begin to make preparations for increasing your beet crop next year. Fall plowing will mean on the average from 2 to 4 tons of beets more per acre than spring plowing, or from \$14 to \$30 more per acre.

We will guarantee you \$7 per ton for all beets loaded on the cars in 1918. For further particulars inquire of our field superintendent, or write to this office.

Yours truly,
UTAH-IDAHO SUGAR CO.

FOUL PLAY FEARED FOR ASHLAND MAN

A man giving the name of Harry Martin may turn out to be the victim of foul play and not an insane man, which was the opinion held until yesterday by Ashland officers. Martin was found wandering aimlessly about the Ashland streets shortly after noon Sunday.

He was taken in custody by the police and lodged in jail until Monday when he was brought to this city in transit to Jacksonville, where it was intended to have him examined and committed to the state hospital at Salem. Sheriff Jennings examined Martin and concluding that he was suffering from something other than dementia called in Dr. E. H. Porter who made a careful examination. As a result of this Martin will be taken to the Sacred Heart hospital for an X-ray examination of his head.

Martin continually lifts his hand to the right side of the head and Dr. Porter believes that not long ago he may have received a blow there which fractured his skull.—Medford Sun.

Mr. Currier was born at Bath, O., in 1845, coming to Oregon and to Grants Pass about 11 years ago, devoting the greater part of his time while here to mining interests. He was a member of the G. A. R., the Modern Woodmen, and the Knights and Ladies of Security. The funeral will be held at the family home, 124 Overland avenue, on Wednesday afternoon at 3:30 o'clock. The remains are to be shipped to LaPlata, Mo., for burial.

Too Near

Once upon a time some fishes in the sea were discussing the ocean, of which they had heard. The wisest old fishes dismissed the whole subject as ridiculous, saying: "There isn't any ocean around here. We have lived here all our lives and have never seen a sign of it."

Once upon a time the birds of the air were discussing the subject of atmosphere. "There isn't any atmosphere," they said positively and with a wise air: "There isn't no such thing! If there had been it would have come across it when flying around at night, and I have never seen a trace of it in the daytime."

Moral: There is such a thing as being too near a thing to perceive it.—Advanced Thought.

great need of the staples at the front. If we stop to figure that the saving of one slice of bread a day by each of the hundred million people would mean a saving of 10,000,000 loaves a day, and that the saving of an ounce of meat a day will mean the saving of 5,000 tons of meat a day, we will realize the small part we can render to the general help of our allies and her armies. Carrying this out for a month or a year will mean immense supplies saved with no serious loss to ourselves."
Mr. Plummer explained that a home card of instruction for conservation will be placed in the schools on Monday, the 15th, and the scholars will spend the entire week studying with the teachers the different problems set forth so they will be thoroughly saturated with the ideas of conservation. The week beginning the 21st cards will be taken home from the schools by the children to their parents and the mother will be asked to sign a pledge card agreeing to live up, as far as possible, to the conditions set forth in the instruction card. Upon signing this pledge card a membership card with the emblem of the United States food administration will be furnished which is to be displayed in the most conspicuous window of the home, indicating that that household is signed up for food conservation.
Mr. Plummer has been several days on this trip and all the way down from Portland he finds every community a ready response by the chairmen and the executive committees of the townships, and he believes there will be a hundred per cent registration in Oregon.
There will be an open meeting tonight at the Chamber of Commerce rooms to which all are invited and it is hoped that the rooms will be crowded with those who are willing to do their bit. Mr. Plummer says he will not make a speech but will confer with the people of this section, and to gain some ideas which will be of help to some other community.
INTERNED SHIPS GIVE CHILE LARGE TONNAGE
Santiago, Chile, Oct. 9.—La Nación calls the attention of the government to the decision of Peru and Uruguay, respecting the breaking off of diplomatic relations with Germany. It says it would be pertinent promptly to solve the problems arising from the international situation, as Chile might remain isolated and in a condition of disadvantage, so far as concerned those countries which, by seizing interned German ships will have at their disposal a large tonnage.
UNCLE TOM'S CABIN GETS FUNDS FOR RED CROSS
El Paso, Texas, Oct. 9.—An Uncle Tom's Cabin, made of rough barked lumber to resemble the old southern negro's cabin before the war, was one of the unique booths at the recent festival of the state which was held here to raise money for the Red Cross. The negro colony of El Paso planned and installed the exhibits in the cabin, which included work of the negro children in the public schools and relics of slavery days.
