TOMORROW ONLY

Presents Madame Petrova in

"The Law of the Land"

"The Law of the Land," an adaptation of a famous stage success by George Broadhurst, has furnished Madame Petrova, famous Russian emotional actress, with a vehicle of far more than ordinary attraction.

Mothers!
What would you do to a man who is cruel to your child?

See this picture for your answer.

This is the first big star picture of the Paramount-Artcraft Picture Company.

Grand Jury Reports

The grand jury returned its report yesterday and the only business to come before the body was the inspection of county property. They recommended that a dormer window be put in one of the north rooms at the county home and that the cement reservoir be kept in a more sanitary condition. No indictments were returned.

E. A. Special Tomorrow

Grants Pass Lodge, No. 84, A. F. & A. M., will have work in the Entered Apprentice degree Tuesday night. 52

Wanted Immediately

Absolutely clean old cotton rags, any color, that have been boiled, to be delivered at the Red Cross rooms in the court house next Thursday afternoon. These are greatly needed to make our quota of "comfort pillows" immediately. This emergency call for "comfort pillows" was received here yesterday and the committee wishes to supply them as soon as possible. All depends upon the quick response of our patriotic women in furnishing this old material for the "down clippings" with which to stuff the pillows. It is hoped that every woman will empty her rag bag and put on her boiler.

Could Exterminate Germans.

Experiments made since the German bombardment of Arras with a mysterious gas shell have disclosed that the poison was arsenic, known in the laboratory as arsenic acid, hydrogen, one of the deadliest fumes known to the chemists, according to a French correspondent.

In Arras the gas from the shells continued its deadly work for nearly a week, although the shells were all thrown in one hour. More than 4,000 men, women and children died, many in convulsions and many stark mad.

The significant fact in regard to the arsenic bomb which the Germans likely overlooked is that while the amount of the drug in Germany is limited, the allies have limitless supplies. If Britain and France wish to retaliate they could in less than a year manufacture these bombs in sufficient quantities to kill every living thing in the German empire.

It would be a question only of getting enough airplanes to carry and drop them.

ABOUT TRICORNS.

It is predicted that the tricorn, the four cornered hat, as well as the bicorn, will be quite smart for early hats. Many of the shaped hats will be made by hand, and this will, of course, make these hats a bit more expensive.

THE NEWEST WAISTS.

Sheer silk crepe retains a prominent place. Crepe de chine, wash satin and foulard are also used, either alone or in combination and with a touch of colored embroidery or beading.
