

**The Typewriter That Completes the Modern Business Organization.**

The Royal Typewriter is necessary to make a big business organization complete. It was invented and is designed and built to meet the typewriter needs of the business world today.

It is the finishing touch to that office efficiency which the aggressive business organization must have.

It fits exactly into the high standard of organization, of personnel and of equipment that the live business house must maintain.

It rounds out the effectiveness, the sureness, the exactness, the specialized ability of the organization.

It ends excessive repairs, because it is built for long life and for the finest work. It is bought with the confident knowledge that it will not have to be "traded-out" after one or two years of use.

And this very quality of excellence is what makes the work done on the ROYAL stand alone as an exhibit of superiority. The precise harmony of all moving parts, the swift and sure mechanical response, the perfect presswork—all these enable the typist to do more work, to do it better—and to do it with less effort.

Compare the work. Get the facts. Know the ROYAL. Put it to the deciding test of actual results in your own office, under your own working conditions. The user of but one ROYAL enjoys the same advantage as the organization which requires a hundred and more.

Telephone or write us now, and a representative will call. A demonstration does not place you under the slightest obligation. Let the ROYAL prove itself to you and for you. Then come to your own conclusion.

**First English Hackney Coaches.** Captain Bailey introduced hackney coaches into England in 1625, and by his wide-awake advertising methods got all London talking about them. Samuel Pepys, a wily old politician, was first induced to take a ride, although it is said the old man insisted upon a large consideration for placing his life in jeopardy.

**OLD METHOD OF TRANSPORT**

Raft as Used in America Today Has Its Counterpart in Every Country in the World.

"The raft has been used for centuries for carrying various cargoes," writes Day Allen Willey in St. Nicholas. "It carried Egyptian cotton on the Nile; it is in service on the Congo river in Africa and the Ganges in India; but the raft which is its own cargo is that composed of logs—a method of water transportation that originated in Nova Scotia a half century ago.

"Tree trunks cut from Nova Scotia forests were moved on wooden rollers to one of the harbors, where the logs were piled in layers and bound together with twisted wire rope. The raft was to be taken to a lumber mill on New York harbor, where the logs were to be cut into timber for building purposes. To haul the raft while on the sea, one end of a heavy wire rope was fastened to its bow, the other was secured to the rear deck of a steam tugboat. It started on its ocean journey, but never reached its destination, for a gale of wind sprang up, the towing rope parted, and the raft drifted out to sea. Later, some of the logs were found washed ashore on the Norwegian coast.

"In the Northwest the transportation of lumber in rafts is very extensive. They are of enormous dimensions, in shape closely resembling a cigar, hav-

ing its greatest number at the middle and tapering to a point at both ends. While these rafts are of varying sizes, the smallest usually contains at least five thousand pieces of timber, ranging from 80 to 110 feet in length and from two to nearly five feet in diameter at the butt.

"Consequently, some of the rafts made in this peculiar fashion are nearly as long as the largest transatlantic liners, measuring no less than 650 feet from end to end."

**EXPLAINS LAUGH OF BABIES**

We Come Into This World of Sorrows With a Mysterious Sense of Humor.

The human love of nonsense is a divine mystery. We have often heard pessimists declare that we come into the world weeping. It is truer, I think, to say that we come into it laughing. For laughter in a baby seems to be its first conscious apprehension of something outside its small needs and pains. It may cry merely because a pin is sticking into it, but it laughs because already it sees something that makes it laugh. It knows not why, something that catches the eye or ear and seems irresistibly funny to it.

There is nothing more mysterious than a baby's sense of humor. It frequently loses it as it grows up, together with the other trailing clouds of glory, but most babies are born with it. To satisfy its nursery rhymes were invent-

ed, and to satisfy the same instinct in grown people "The Hunting of the Snark," that incomparable classic, came into being, and Caverly and Gilbert and Lear stood on their heads, so to speak, and performed such verbal antics before high heaven as must have made the very angels laugh.

When the Owl and the Pussy Cat, having dined on mice and slices of quince, "hand in hand, on the edge of the sand," "danced by the light of the moon," there is something which, as Stevenson was fond of saying, delights the great heart of man. But, of course, with these modern artists of nonsense there is usually a deliberate attempt at the grotesque and the absurd. We know why we are laughing, but with the old-fashioned rhymes of which I am chiefly thinking, we laugh—or, for that matter, cry, perhaps—without having any reason to give.—Richard Le Gallienne, in Harper's Magazine.

**Powerful Pump.**

Your heart is a very busy organ. While you breathe once it beats four times. At each beat it sends four pounds of blood through your veins and arteries. The weight of the circulating blood is 29 pounds. When you run your legs and other parts of your body need more blood, so your heart must pump faster.—Popular Science Monthly.
