

The Typewriter That Completes the Modern Business Organization.

The Royal Typewriter is necessary to make a big business organization complete. It was invented and designed and built to meet the typewriter needs of the business world today.

It is the finishing touch to that office efficiency which the aggressive business organization must have.

It fits exactly into the high standard of organization, of personnel and of equipment that the live business house must maintain.

It rounds out the effectiveness, the sureness, the exactness, the specialized ability of the organization.

It ends excessive repairs, because it is built for long life and for the finest work. It is bought with the confident knowledge that it will not have to be "traded-out" after one or two years of use.

And this very quality of excellence is what makes the work done on the ROYAL stand alone as an exhibit of superiority. The precise harmony of all moving parts, the swift and sure mechanical response, the perfect presswork—all these enable the typist to do more work, to do it better—and to do it with less effort.

Compare the work. Get the facts. Know the ROYAL. Put it to the deciding test of actual results in your own office, under your own working conditions. The user of but one ROYAL enjoys the same advantage as the organization which requires a hundred and more.

Telephone or write us now, and a representative will call. A demonstration does not place you under the slightest obligation. Let the ROYAL prove itself to you and for you. Then come to your own conclusion.

WHERE TO LOOK FOR WIFE

Seek Her in Butcher's Shop, Says This Writer, and Mark Just How She Buys.

A good housewife will look at least two square meals ahead of her nose. The modern system of marketing during the high cost regime is such a fine art that a youth contemplating matri-

mony should hie to the market place for selecting a bride. My boy, Zim advises in Cartoons Magazine, when you see a maiden pinching, smelling and pricing a soup bone, you may rely on her sense of economy, for she is looking forward not less than two meals. The soup bone, when cooked, is merely food in the rough or primitive state. Its choicest by-products are realized after bouillon stage. Thereafter comes goulash, the croquettes and the luscious hash. By all means avoid the girl who orders choice cuts of porterhouse or English mutton chops. She will not make a good helpmate. But the girl who selects the chuck or neck piece or the tall end of a ham bone, and renders them into dainty, palatable dishes is the one you want. So take my advice and seek the market place when you feel that you have had your fill of bachelor loneliness and wish a taste of wedlock. Follow such a girl around until you are perfectly satisfied, then nail her.

Way to Success. Power is the goal of every worthy ambition and only weakness comes from imitation or dependence on others, says a writer in Success. Power is self-developed, self-generated. We cannot increase the strength of our muscles by sitting in a gymnasium and letting another exercise for us. Nothing else so destroys the power to stand alone as the habit of leaning upon others. If you lean you never will be strong or original. Stand alone

or bury your ambition to be somebody in the world. The man who tries to give his children a start in the world so that they will not have so hard a time as he had is unknowingly bringing disaster upon them. What he calls giving them a start probably will give them a setback in the world. Young people need all the motive power they can get. They are naturally leaneers, imitators, copiers, and it is easy for them to develop into echoes or imitations. They will not walk alone while you furnish crutches; they will lean upon you just as long as you will let them. One of the greatest delusions that a human being could ever have is that he is permanently benefited by continued assistance from others.

Miners Live Long. It is an extraordinary fact that even when deaths from accident are included, the rate of mortality among miners of Great Britain is materially lower than that among any other big class of labor, except agriculturists, and appreciably lower than the average rate of mortality among males. This fact was discovered by Doctor Tatham, while acting as superintendent of statistics in the office of the registrar general. Doctor Tatham points out that while the risk of fatal accidents among the coal miners is much greater than among other males generally, their risk of death by disease is much lower, being 16.6 per cent less than all occupied males, and 23.2 per cent less than

that of all males. While coal miners appear to suffer more than the average mortality from bronchitis, they show marked immunity from consumption, their mortality from that disease being less than half the average. From diseases of the nervous system their mortality is 18 per cent lower; heart disease, 10 per cent lower, and from disease of the liver, 10 per cent lower than among all males.

Sprat. As long ago as Elizabeth's time "sprat" was used as a term of contempt and as an article of diet it has always been deemed but humble fare. With which, however, good economists are very well content today, remarks the London Chronicle. But though despised in its adult state, it is in its infancy that highly esteemed delicacy, whitebait. We were a long time, however, in recognizing the fact, for naturalists disputed among themselves whether the honor should be accorded to the fry of shad, pilchards, or herring and only lately did they decide that it belonged to the herring and sprat.
