

SCHOOL MEETING TO BE HELD ON MONDAY

The annual school meeting of the Grants Pass district No. 7, will be held on Monday at 10 a. m. at the Junior high school for the purpose of electing two directors for a term of two years each to succeed Dr. Macy and L. B. Hall, whose terms of office expire. The names of Dr. L. O. Clement and A. C. Holcomb have been prominently mentioned for the office.

In years past it has been customary to allow the business of the school district at the annual meeting to be transacted by a dozen or less interested parties, notwithstanding the fact that the school meeting is always important. The board desires a large attendance this year.

ELECTRIC COOKING EFFICIENCY PROVED BY ACTUAL TESTS

Tests conducted over a period of two or three years at the Home Economics Practice Cottage of the State College of Washington prove that of all cooking mediums electricity is by all odds the most efficient. These tests show:

First—That the average cooking efficiency of the kitchen range is actually only from 2 to 3 per cent.

Second—That the average efficiency of an average Electric Range is 67 per cent, or 30 times as great as the former.

The Ideal Fuel For Cooking

A bulletin issued by the foregoing College states: "Electricity is the ideal fuel for cooking * * * its use for domestic cooking cannot be too strongly urged, not only as a means of saving coal to meet the present war emergency, but also as a means of conserving the supply of coal and other fuels in time of peace."

We shall be glad to explain in detail the many timely advantages of Electric Ranges. Telephone 108-J today and our representatives will call at your convenience.
