

CONDENSATIONS

Chiefly for roofing automobiles an imitation glass that resembles celluloid has been invented in Europe. Many old-time knitting machines have been dragged from the garret to duty in the present emergency. Telephone operators in Egypt are required to speak five languages, English, French, Italian, Greek and Arabic. The wages of able British seamen are now \$30 a month and food, as against \$25 before the opening of the war.

Bavaria has a suspension bridge with but one tower, the cables at the other end being anchored in a high rock bluff. Doug Johnson of Providence, Ky., had a sow which gave birth to eight pigs, and not a pig in the litter has an eye. It is said that a pair of night hawks, which have made the roof of a Bath (Me.) bank building their summer home for 30 years, are back again. To increase the volume of sound from a phonograph a Parisian has invented an instrument that will play three records simultaneously.

SOME FARM LABOR TO BE IN DEFERRED CLASS

In the new draft the district boards are charged with the duty of putting into deferred classes those persons who are more likely to further the war by remaining in civilian occupations than by entering the army.

An advisor for each district board is to be appointed whose duty it shall be to furnish to the board facts relative to farm labor requirements. He will be expected to advise District Boards as to a shortage or surplus of necessary farm workers for any given district.

He may examine the records and files of the board to find out whether persons entitled to deferred classification have actually claimed it, and in case he finds the names of such registrants he may file for them application for deferred classification with the district board.

Under certain conditions employers of necessary farm workers may file a claim for deferred classification in respect of any registrant who has failed or refused to file a claim for deferred classification in his own behalf.

Farmers should see that all of their necessary employees, whether sons or other laborers, of draft age have made for them just claims for deferred classification.

The new regulations provide that in Class II shall be placed any registrant found to be engaged in a "necessary" agricultural enterprise and found to be necessary to such enterprise in the capacity of farm laborer especially fitted for the work in which he is employed.
