THE SPIRIT OF FORGIVENESS

Much has been written about man's inhumanity to man, but as the grind of the courts goes on there are so many cases in which leniency has been extended that they are passed by unnoticed by the public.

A man had broken into another man's place of business and stolen some goods. After a long search he was apprehended and confessed his guilt.

Those few hundred Americans who were yesterday surrounded by the Huns near St. Quentin simply acted in true American and gentlemanly fashion.

It is reported that only 14,000 out of the 6,000,000 American farmers have yet paid any income tax.

New York City's quota of the Fourth Liberty loan is \$1,800,000,000.

Judging from the number of "boners" lately executed by the Prussians, Germany will be invaded by many ivory hunters after the war is over.

It remained for a negro in Louisiana to bear off the palm for having sons at the front.

FARMERS EXPERIMENT IN SPRAYING APPLES

During the past growing season three fruit growers in the vicinity of Grants Pass have been cooperating with the extension service of the Oregon Agricultural College in spraying certain blocks of apple trees for the purpose of controlling the various diseases and pests that damage our orchards.

The object of this work has been to show the orchardists of the vicinity of Grants Pass that orchards may be handled on a commercial basis and produce the best of fruit if care is taken in spraying to use the right materials, at the right time and in a thorough manner.

At this writing not all the counts have been made and, so far, none of the cost accounts have been tabulated. One striking result of spraying has been noted, however, at the Riverbanks Orchard of which C. E. Niles is manager and Mr. Chergivin orchard foreman.

The first column of figures represents the per cent of perfect apples, the second wormy, the third aphid and the fourth scab.

The apparent overlapping of percentages is caused by a few apples that were affected with worms and

aphis at the same time. Nearly all the sprayed apples will go into the fancy and extra fancy grades and will sell for excellent prices this year.

The above spraying results speak for themselves. We expect to obtain at a later date the costs of labor, materials, etc., together with the profits resulting from spraying; all of which ought to make interesting reading to our fruit growers.
