

LIST OF REGISTRANTS OF JOSEPHINE COUNTY

The following list contains the serial number and names of persons who registered on September 12. They are arranged in the order of the draft. It does not, however, mean the order in which they will be called, as only class 1 men will be called first. Those marked with an asterisk (*) are those coming within the ages of 19, 20 and 21, and 32 to 36 inclusive, who have received their questionnaires. Questionnaires are now being sent to all other registrants:

Flightless Parrot.
When Macquarie island, situated 600 miles to the south of New Zealand, was discovered in 1810, it was inhabited by a peculiar flightless parrot described by a contemporary who saw numbers of the birds which were brought to Sydney by sealers as "the gibbets of the loquacious tribe." Recent investigation of the island makes it almost certain that this strangely isolated specimen of the parrot family is completely extinct, probably as a result of the introduction of cats, which have become wild and overrun the island.

First Use of Toilet Vinegar.
Perhaps the ladies who use toilet vinegar would like to know its origin? The story runs like this: During the great plague that visited Marseilles, four highwaymen who had formed a gang, invented an aromatic vinegar by means of which they could rob the dead and dying without any fear of infection. This vinegar was for a long time known in France under the name of "Vinaigre de quatre voleurs," and eventually became toilet vinegar.
