ACTING NATURAL

During the former riots in Berlin the kaiser's palace suffered not only from the bombardment, but also from looting. Larceny held sway. Like a gang of thieves in discord the Germans turned upon each other, each endeavoring to steal the most—and the kaiser proved himself pastmaster in the art.

But were those Germans to blame? They merely practiced, when they got back to Berlin, what kultur had taught them to do in every foreign land where they set their invading feet.

Such conduct should enable the Germans to see themselves as others see them and prove to them the old truth that chickens will come home to roost.

The Hun leaders sent Lenin and Trotsky into Russia to disrupt that country. The plot succeeded so well that the bloody doctrine of Bolshevism sown by those two hirings has receded to Germany and now the Boche empire is reeking with revolution.

The Germans are acting natural.

UNDESIRABLES

The department of justice will shortly recommend to congress the deportation of 3,000 or 4,000 aliens now interned in the United States.

The further suggestion is made that the subsequent return of any of these undesirables to this country, whose hospitality they have abused, shall be made impossible.

There should be a great wave of

public approval when congress takes up this matter, for the investigations of the department of justice have been thorough, and to them is added the proof presented by the alien property custodian as to the extent to which our business life has been imperilled.

Among the number of aliens now interned are some who are considered as not dangerous. The deportation of these will not be urged, pending good behavior. There are others, and this number includes some well known German women, whose speedy departure is considered desirable.

That the list of those whose removal is demanded includes many prominent and wealthy people should in no way hinder the proposed plans. These people have used their money, their social acquaintances, their business holdings, their unsuspecting American friends, for just one end—the furthering of German schemes and German propaganda in this country.

There is no room for them here. They are manifestly not good Americans, but may prove to be what Germany calls a good German.

DAN CUPID LOSES CASE

Court Does Not Consider Call of Romance Strong Enough.

Dan Cupid lost his case before Judge Andy Calhoun in the city court at Atlanta, Ga.

Just as the judge was about to pronounce sentence on a young woman who had been arraigned on a charge of vagrancy, a soldier stepped forth from the audience and announced that he wished to marry the accused young woman, Mrs. Maybelle Laver, the defendant, smiled her assent, and the court halted his sentence.

But Assistant Solicitor Ed Hill objected. He remarked to the court that nothing was known of the young woman, and that she might be permitted to commit bigamy; that she might already have a husband.

Mrs. Laver admitted that she had been twice married, but insisted that she is free now. She said she had been married in Florida, but would not give the name of the town in which she had lived, nor any further information.

Judge Calhoun did not consider the call of romance strong enough, and declined the request of the soldier. He proceeded to sentence Mrs. Laver to spend six months in the county home for girls.

Small Producers of Coal.

Portugal digs less coal than any other European country. Her total product of coal is only 22,000 tons a year. New South Wales digs yearly just twice as much coal as all Spain produces.

Avoid Brooding.

It is a salutary thing to regret past errors and sincerely resolve not to fall into them again, but it is a foolish and most dangerous thing to brood over mistakes we have made, sins we have committed. Brooding cannot possibly lead to healthy-minded action. Its tendency, rather is to develop a state of mind that may pass over into insanity. Yet many people indulge in this dangerous luxury of brooding. Particularly is this likely to be the case with people to whom life has not been as kind as it might have been.

Birth of "Peace" Baby.

Worcester, Mass.—A baby girl, born to Mr. and Mrs. A. Calloro of this city, during the armistice negotiations, has been christened "Peace Europe Calloro."

WANTS QUARANTINE THAT "QUARANTINES"

The Oregonian thinks it is high time to organize and wage a more effectual campaign against the influenza, says the Oregonian. It should be carried into every household and it should be supported by every citizen. It is futile to shut up the town, or close down business, or stop public congregations, for it has been tried, and has not stopped the epidemic.

But it is not futile and it will be helpful and probably effective, if a quarantine that quarantines is established. The present quarantine is not adequate, perhaps because the health department has not the force to make it so.

The mayor is urged to consider the plan of calling to his aid the most competent and forceful physician in the city with the purpose and courage to do his duty, and to put in his hands the quarantine campaign.

Let him have an adequate force. Let the city be divided into districts, as in other campaigns and let all houses where there is influenza, be isolated and the inmates with it. Let there be a systematic patrol and let all egress and ingress to such places be stopped, except upon written authority of the city, acting through its official agency. Let there be a system of daily reports from all physicians.

There is no occasion for panic, for it is evident that the percentage of mortality is lower than formerly. In other words the present form of the disease is milder. But there are, nevertheless, too many deaths and in a matter of life and death all other problems are unimportant.

"Western Reserve."

When Connecticut, in 1786, ceded her western lands to the United States, she reserved a large tract adjoining Pennsylvania, now forming several counties in the northeastern part of Ohio. From this the region came to be called "the Western Reserve." The reservation by Connecticut only lasted a few years, as in 1800 she completed the transfer of all the lands to the United States. The Western Reserve soon became famous for its good citizenship, fine farms and determined opposition to slavery.

The Kangaroo Industry.

In Australia kangaroo farming is an important industry. The hides are valuable and the tendons extremely fine; indeed, they are the best known to surgeons for sewing up wounds, and especially for holding broken bones together, being much finer and tougher than catgut, which is used extensively.

AT THE MOVIES

"Les Miserables"

William Farnum, the great American actor, will be seen at the Joy Theatre in a stupendous screen production of Victor Hugo's immortal story, Les Miserables.

This picture is well termed "stupendous." It is the only real screening of the remarkable story of the conflict of man with humanity and humanity's half barbarous laws.

In the character of Jean Valjean, Mr. Farnum gives a portrayal that leaves one believing that he walked out of the book. The hard side of the man is shown in all his revengeful feeling against the world that

caused him to serve 19 years at hard labor for stealing a loaf of bread for his starving relatives. And the softer side, when he, having changed his name and becomes wealthy, is lending a helping hand to every one around him. Then, too, the wonderful spirit that makes him renounce the few joys he has had in life is shown in remarkable bits of acting by this master artist, William Farnum.

Those who have read the book, or who know anything of Jean Valjean, are in for a rare treat when this picture is shown at the Joy Theatre on Sunday and Monday.
